

Psychosocial stress: Population, environment and quality of life

Levi, Lennart

Psychosocial Stress Population Environment And Quality Of Life

**Joachim F. Wohlwill, Gerald D.
Weisman**

Psychosocial Stress Population Environment And Quality Of Life:

Psychosocial Stress Lennart Levi,Lars Andersson,1975 Monograph based on a conference paper on overpopulation and environmental deterioration as causes of mental stress considers the effects of future population growths on the quality of life Bibliography pp 108 to 130 maps and statistical tables Conference held in bucharest 1974 aug 19 to 30 Psychosocial Stress. Population, Environment and Quality of Life Lennart Levi,Lars Andersson,ROYAL MINISTRY FOR FOREIGN AFFAIRS STOCKHOLM (Sweden),1975 *The Age of Stress* Mark Jackson,2013-03-28 We are living in a stressful world yet despite our familiarity with the notion stress remains an elusive concept In *The Age of Stress* Mark Jackson explores the history of scientific studies of stress in the modern world In particular he reveals how the science that legitimates and fuels current anxieties about stress has been shaped by a wide range of socio political and cultural as well as biological factors stress he argues is both a condition and a metaphor In order to understand the ubiquity and impact of stress in our own times or to explain how stress has commandeered such a central place in the modern imagination Jackson suggests that we need to comprehend not only the evolution of the medical science and technology that has gradually uncovered the biological pathways between stress and disease in recent decades but also the shifting social economic and cultural contexts that have invested that scientific knowledge with meaning and authority In particular he argues we need to acknowledge the manner in which enduring concerns about the effects of stress on mental and physical health are the product of broader historical preoccupations with the preservation of personal and political as well as physiological stability *Behavior, Health, and Environmental Stress* Sheldon Cohen,Gary W. Evans,Daniel Stokols,David S. Krantz,2013-06-29 Eight years ago four psychologists with varying backgrounds but a common interest in the impact of environmental stress on behavior and health met to plan a study of the effects of aircraft noise on children The impetus for the study was an article in the Los Angeles Times about architectural interventions that were planned for several noise impacted schools under the air corridor of Los Angeles International Airport These interventions created an opportunity to study the same children during noise exposure and then later after the exposure had been attenuated The study was designed to test the generality of several noise effects that had been well established in laboratory experimental studies It focused on three areas the relationship between noise and personal control noise and attention and noise and cardiovascular response Two years later a second study designed to replicate and extend findings from the first was conducted *Healthy People : the Surgeon General's Report on Health Promotion and Disease Prevention, 1979* Institute of Medicine (U.S.),United States. Public Health Service. Office of the Surgeon General,United States. Office of the Assistant Secretary for Health,1979 **Social Change and Psychosocial Adaptation in the Pacific Islands** Anthony J. Marsella,Ayda Aukahi Austin,Bruce Grant,2006-05-31 The Pacific Island oceanic and rim nations include many traditional societies and emerging nations that have experienced abusive histories of colonization exploitation and social change and upheaval Their peoples are struggling to restore traditional cultural heritages

and identities in a world community dominated by Western values and lifestyles The conflicts uncertainties and instability of this transitional time are reflected in these populations current social and psychological difficulties This volume is one of the few devoted to these issues and covering a range of problems including substance abuse hopelessness violence crime abuse juvenile delinquency suicide and AIDS *Healthy People* Institute of Medicine (U.S.),1979

The Physical Environment and Behavior Joachim F. Wohlwill,Gerald D. Weisman,2012-12-06 The field of Environment and Behavior This bibliography is aimed at the researcher and advanced student working in the field of environmental psychology as it has come to be designated over the past decade A more appropriate term might be environment behavior studies to suggest the important characteristic of this field as one that transcends the province of the psychologist and brings together workers as well as problems methods and concepts from a great diversity of disciplines and professional fields Among these we may include geography and sociology architecture landscape architecture and planning forestry natural resource management and leisure and recreation research to name only the most important of the diverse fields from which material for this bibliography has been drawn This is in fact one of the primary reasons for our belief in the value of such a volume The literature in the environment behavior field is scattered through the most diverse sources including not only the major periodical and monographic literature in each of the above mentioned disciplines and professions and others as well but also a variety of more specialized publications of varying degrees of accessibility Thus it seemed to us helpful to the researcher teacher and student in this area to bring this far flung literature together in a single volume that might be used as a guide to the field We aimed at a comprehensive treatment including both basic and applied aspects and relations of behavior both to the man made or artificial and to the natural environment

Biological and Psychological Factors in Cardiovascular Disease Thomas H. Schmidt,Theodore M. Dembroski,Gerhard Blümchen,2012-12-06 An opening address should ask the right questions which we expect to answer during the coming years A good opening address should formulate hypotheses for falsification during the conference or in the near future Mter Dr Groen s excellent lecture yesterday I feel better about my task because I feel I am not alone in asking the ten questions in my abstract It is an honor for me to give this short paper largely based on my experiences during 15 years as medical director of a rehabilitation center in Bavaria as a teacher at two medical schools in Munich and Innsbruck and as an old fashioned holistic cardiologist However it also is a difficult task for me because the subject of this conference concerning biobehavioral factors in coronary heart disease is controversial not only in the medical society but in my own mind as well When I organized one of the first conferences on stress and coronary heart disease in West Germany in 1976 followed by conferences in 1979 and 1980 the semantic problems between physicians and psychologists were very significant However communication has improved in this area during the last decade The most encouraging event in this field was a symposium in May 1984 in Rotenburg Fulda on the topic Return to Work after Bypass Surgery organized by a cardiac surgeon Dr Walter

Environmental Design and Human Behavior Leonard

Krasner,2013-10-22 Environmental Design and Human Behavior A Psychology of the Individual in Society outlines the fundamental principles that govern the concept of environmental design in the context of human behavior The first part of the text deals with theoretical and historical influences of environmental design along with the ethical and value context The selection also covers methods for assessments of environment and interactionists approach to environmental design The next part details the application of environmental design this part tackles topics such as environmental design in the classroom designing an ideal classroom and implementation process and personal experience The book will be of great use to behavioral scientists sociologists community health and social workers and professionals involved in the designing of environment such as city planners

Toward a New Definition of Health P. I. Ahmed,2012-12-06 It is generally recognized today that the United States has a need to contribute to the improvement of health throughout the world The need stems from the interrelationships that exist between the health of Americans and the health status of the rest of the people on Spaceship Earth Disease does not respect national boundaries and the frequency of travel and trade between countries increases each year It further relates to the opportunities found in international settings to help solve health problems more effectively and efficiently This includes the unique human resources that are found throughout the world as well as certain natural ecological conditions that cannot be duplicated in the United States The United States also has a responsibility to contribute to improved health status Our tradition of humanitarianism alone supports such a responsibility but our comparative wealth of technical and financial resources dictates a requirement to participate Modern political realities define relationships between developed and developing countries that will not allow us to isolate ourselves from the compelling health needs of a majority of the world's population

Balancing the self Mark Jackson,Martin D. Moore,2020-03-05 This electronic version has been made available under a Creative Commons BY NC ND open access license Many health environmental and social challenges across the globe from diabetes to climate change are regularly discussed in terms of imbalances in biological ecological and social systems Yet as contributions to this collection demonstrate while the pressures of modernity have long been held to be pathogenic strategies for addressing modern excesses and deficiencies of bodies and minds have frequently focused on the agency of the individual self knowledge and individual choices This volume explores how concepts of balance have been central to modern politics medicine and society analysing the diverse ways in which balanced and unbalanced selfhoods have been subject to construction intervention and challenge across the long twentieth century Through original chapters on subjects as varied as obesity control fatigue and the regulation of work and the physiology of exploration in extreme conditions Balancing the self explores how the mechanisms and meanings of balance have been framed historically Together contributions examine the positive narratives that have been attached to the ideals and practices of self help the diverse agencies historically involved in cultivating new balanced selves and the extent to which rhetorics of empowerment and responsibility have been used for a variety of

purposes from disciplining bodies to cutting social security With contributions from leading and emerging scholars such as Dorothy Porter Alex Mold Vanessa Heggie Chris Millard and Natasha Feiner **Balancing the self** generates new insights into emerging fields of health governance subjectivity and balance **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **Emotions and Psychopathology** Manfred Clynes, Jaak Panksepp, 2013-11-11 This book summarises the proceedings of a symposium on Emotions and Psychopathology which was held by the Department of Psychology of Bowling Green State University from September 26-27 1986 It is coming to be realized that to understand the underlying structure and dynamics of many psychopathologies it is essential to understand the nature of emotions The aim of this symposium was to gather a group of investigators and thinkers who would have valuable and unique perspectives on the nature of emotions and on their relationship to psychic disorders The main participants were Manfred Clynes Helen Block Lewis Michael Liebowitz Marvin Minsky Robert Plutchik John Paul Scott and Jaak Panksepp Ted Melnechuk chaired the half day of round table discussion on the day following the symposium and Gail Zivin and Larry Stettner presented informal position statements on ethology during the round table On the evening before the symposium Elliot Kalin approaches Valenstein of The University of Michigan presented a pre symposium colloquium entitled Great and Desperate Cures which summarized his most recent contribution to the Psychosurgery debate We should like to refer you to his excellent book on the subject with the same title Basic Books 1986 which can help forewarn us of possible future worries in the application of biological technologies Paul Byers who did not attend the meeting was invited to write a chapter summarizing cultural and societal issues which were not formally covered at the meeting **Perceptual and Cognitive Image of the City** Chiranj Singh Yadav, 1987 **Despair and Deliverance** Benjamin Beit-Hallahmi, 2012-02-01 The author examines the varieties of religious and secular salvation that have recently appeared in Israel as evidence for Israelis willingness to embrace private salvation in the face of immense cultural upheavals Drawing on interviews field observations clinical data and media reports collected over ten years he surveys four roads to private salvation the return to Judaism new religions sects or cults psychotherapy movements such as EST and occultism These dramatic forms of conversion are unique to Israeli society within the last decade and Beit Hallahmi provides a social history and social psychology of this transformation **Growing Points Ethology** P. P. G. Bateson, R. A. Hinde, 1976-10-07 First published in 1976 this volume is a collection of essays by some of the most prominent and active ethologists It is organized into four sections motivation and perception function and evolution development and human social relationships The first three sections reflect the four questions which are basic to ethology what were the immediate causes of a behaviour pattern what is its biological function how did it evolve and how did it develop in the individual The last section involves questions of all four types The sections are introduced and linked by editorials and the book concludes with an important statement on asking the right questions The essays are forward looking and identify areas of importance for the study of behaviour The volume is a source of formative

ideas for students their teachers and research workers in a wide variety of disciplines in the biological psychological and social sciences

Two Cultures of Policing John Leo, 2017-09-08 The emergence and functioning of two competing and sometimes conflicting cultures within police departments demonstrates how competition between street cops and bosses is at the heart of the organizational dilemma of modern urban policing Unlike other works in this field that focus on the monolithic culture or familial quality of policing this study demonstrates that which might look cohesive from the point of view of outsiders has its own internal dynamics and conflicts The book shows that police departments are not immune to the conflict inherent in any large scale bureaucracy when externally imposed management schemes for increasing efficiency and effectiveness are imposed on an existing social organization Based upon two years of extensive field work in which the author covered every major aspect of policing at the precinct level in the New York City police department from manning the complaint desk to riding in squad cars Ianni shows how the organized structure of the police department is disintegrating The new Management Cop Culture is bureaucratically juxtaposed to the precinct level Street Cop Culture and bosses loyalties to the social and political networks of management cops rather than to the men on the street causes a sharp division with grave consequences for the departments The study concentrates on a series of dramatic events such as the suicide of a police officer charged with corruption a major riot and the trial of an officer accused of killing a prisoner while in police custody Ianni traces how these events affected relationships among fellow officers and between officers and bosses

Human Scale Revisited Kirkpatrick Sale, 2017 Big government big business big everything Kirkpatrick Sale took giantism to task in his 1980 classic Human Scale and today takes a new look at how the crises that imperil modern America are the inevitable result of bigness grown out of control and what can be done about it The result is a keenly updated carefully argued case for bringing human endeavors back to scales we can comprehend and manage whether in our built environments our politics our business endeavors our energy plans or our mobility Sale walks readers back through history to a time when buildings were scaled to the human figure as was the Parthenon democracies were scaled to the societies they served and enterprise was scaled to communities Against that backdrop he dissects the bigger is better paradigm that has defined modern times and brought civilization to a crisis point Says Sale retreating from our calamity will take rebalancing our relationship to the environment adopting more human scale technologies right sizing our buildings communities and cities and bringing our critical services from energy food and garbage collection to transportation health and education back to human scale as well Like Small is Beautiful by E F Schumacher Human Scale has long been a classic of modern decentralist thought and communitarian values a key tool in the kit of those trying to localize create meaningful governance in bioregions or rethink our reverence of and dependence on growth financially and otherwise Rewritten to interpret the past few decades Human Scale offers compelling new insights on how to turn away from the giantism that has caused escalating ecological distress and inequality dysfunctional governments and unending warfare and shines a light on

many possible pathways that could allow us to scale down survive and thrive Therapy, Ideology, and Social Change Leith Mullings, 2024-03-29 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1984
