Red Rising In Bavaria:

Red Rising in Bavaria Richard Grunberger, 1973 **Hammer of the Gods** David Luhrssen, 2012 Public interest in Adolf Hitler and all aspects of the Third Reich continues to grow as new generations ponder the moral questions surrounding Nazi Germany and its historical legacy One aspect of Nazism that has not received sufficient attention from historians of the Third Reich is the doctrine's origins in the Thule Society and its covert activities A Munich occult group with a political agenda the Thule Society was led by Rudolf von Sebottendorff a German commoner who had been adopted by nobility during a sojourn in the Ottoman Empire After returning to Europe Sebottendorff embraced a form of theosophy that stressed the racial superiority of Aryans The Thule Society attempted to establish an anti-Semitic working class front for disseminating its esoteric ideas and founded the German Workers Party which Hitler would later transform into the National Socialist German Workers Nazi Party Several of the society's members eventually assumed prestigious posts in the Third Reich David Luhrssen has written the first comprehensive study of the society's activities its cultural roots and its postwar ramifications in a historical critical context Both general readers and academics concerned with European cultural and intellectual history will find that *Hammer of the Gods* opens new perspectives on nineteenth and twentieth century Europe [The Radical Tradition](#) Richard Gombin, 2009-10-15 Originally published in 1978 Richard Gombin's book traces the recurrent attitudes in the history of the European revolutionary movement which have criticized socialist and communist parties for their authoritarian and bureaucratic tendencies and which have stressed spontaneity and decentralization as the correct basis from which to change society From a critique of Marx through to an examination of Soviet practice under Lenin Trotsky and Stalin as a factor in the disillusionment of the left with the methods of the Russian Revolution Gombin's study examines the concepts of workers councils as they emerged in several countries after the First World War This comparative study develops the idea of a council communism as opposed to a party communism which he suggests is the fundamental concept in the criticism of orthodox Communism from the left [Economic Writings](#) Otto Neurath, 2006-03-03 This book makes available for the first time in English a substantial part of Otto Neurath's economic writings The essays and small monographs translated here extend from his student years to his last ever finished piece They chart not only Neurath's varied interests in the economic history of antiquity in war economics and schemes for the socialisation of peacetime economies in the theory of welfare measures and social indicators and in issues of the theory of collective choice but also show his philosophical interests emerging in his contributions to seminal debates of the German Social Policy Association This volume shows that Neurath's important contributions to the socialist calculation debate are but one aspect of a many-sided and original oeuvre The translations are preceded by an introductory essay by one of the editors which contextualises the selections by locating them in the various debates of the time that provided their original setting This book is of interest to economists philosophers of social science and of economics as well as to historians of philosophy of science and of analytic philosophy *Kantian Ethics and Socialism*

Harry Van der Linden,1988-01-01 Awarded the 1985 Johnsonian Prize in Philosophy **Anarchism and the Avant-Garde**

,2019-11-04 Anarchism and the Avant Garde Radical Arts and Politics in Perspective contributes to the continuing debate on the encounter of the classical anarchisms 1860s 1940s and the artistic and literary avant gardes of the same period probing its dimensions and limits Case studies on Dadaism decadence fauvism neo impressionism symbolism and various anarchisms explore the influence anarchism had on the avant gardes and reflect on avant garde tendencies within anarchism This volume also explores the divergence of anarchism and the avant gardes It offers a rich examination of politics and arts and it complements an ongoing discourse with theoretical tools to better assess the aesthetic social and political cross pollination that took place between the avant gardes and the anarchists in Europe **In Hitler's Munich** Michael Brenner,2022-03-22

In 1935 Adolf Hitler declared Munich the Capital of the Movement It was here that he developed his anti Semitic beliefs and founded the Nazi party Though Hitler s immediate milieu during the 1910s and 1920s has received ample attention this book argues that the Munich of this period is worthy of study in its own right and that the changes the city underwent between 1918 and 1923 are absolutely crucial for understanding the rise of antisemitism and eventually Nazism in Germany Before 1918 Munich had a decidedly cosmopolitan flavor but its open atmosphere was shattered by the November Revolution of 1918 19 Jews were prominently represented among many of the European revolutions of the late 1910s and early 1920s but nowhere did Jewish revolutionaries and government representatives appear in such high numbers as in Munich The link between Jews and communist revolutionaries was especially strong in the minds of the city s residents In the aftermath of the revolution and the short lived Socialist regime that followed the Jews of Munich experienced a massive backlash The book unearths the story of Munich as ground zero for the racist and reactionary German Right revealing how this came about and what it meant for those who lived through it *Killing Strangers* Tim Wilson,2020 A bewildering feature of so much contemporary political violence is its stunning impersonality with every city centre a potential shooting gallery every metro system a potential bomb alley *Killing Strangers* explores how acts of political violence have changed over time becoming unchained from inter personal relationships Max Weber and the Dispute over Reason and Value Stephen P. Turner,Regis A. Factor,2014-04-04 The problem of the nature of values and the relation between values and rationality is one of the defining issues of twentieth century thought and Max Weber was one of the defining figures in the debate In this book Turner and Factor consider the development of the dispute over Max Weber s contribution to this discourse by showing how Weber s views have been used revised and adapted in new contexts The story of the dispute is itself fascinating for it cuts across the major political and intellectual currents of the twentieth century from positivism pragmatism and value free social science through the philosophy of Jaspers and Heidegger to Critical Theory and the revival of Natural Right and Natural Law As Weber s ideas were imported to Britain and America they found new formulations and new adherents and critics and became absorbed into different traditions and new issues This book was first published in 1984 **Unholy Trinity** Mark

Aarons, John Loftus, 1998-06-15 Written in riveting fashion by the coauthors of *The Secret War Against the Jews* Mark Aarons and John Loftus's *Unholy Trinity* tells one of the darkest tales of World War II After the war had ended fearing a surge of Soviet growth the Papacy entered into an espionage alliance with British and American intelligence agents Subsuming justice to the nascent Cold War ideology these three powers ferreted Nazi criminals out of Europe so that they could be used in the supposedly greater fight against Communism The Vatican's Nazi smuggling network was penetrated by Prince Anton Turkul the great Soviet double agent who turned the operations into a sting for his masters in the Kremlin *Unholy Trinity* exposes Turkul's Red Nazi operation for the first time and shows how Kim Philby the infamous British Soviet double agent and his network were nearly sacrificed to preserve Turkul's Vatican operation Exploring the Vatican's role in aiding Nazi criminals to escape punishment for their crimes this book originally published in 1991 first revealed the Vatican Swiss bank connection to Nazi gold and documented the hidden links to Western investors in Nazi Germany Since its publication major revelations about the role of Swiss banks have confirmed *Unholy Trinity*'s expose of the flight of the Nazi's stolen treasures the new introduction and new final chapters written by Aarons and Loftus for this edition bring the book completely up to date and show how the media have missed the vital Vatican connection in the Swiss bank story Among other things the authors demonstrate that U S and British code breakers were fully aware of the Holocaust as early as 1941 but lied to the Western press that the code breakers bugged the Swiss banks and then buried secrets of Nazi gold transfers to protect U S intelligence chief Allen Dulles and that the Australian British and Canadian governments are still waging a campaign to keep their citizens ignorant about the Nazi war criminals living among them Covering all these topics and more *Unholy Trinity* is the definitive history of a series of profoundly disturbing cover ups involving the Holy See Allen Dulles the Swiss banks and the remnants of the Third Reich
