**The Modern Prison Paradox** Amy E. Lerman, 2013-08-19 In The Modern Prison Paradox Amy E Lerman examines the shift from rehabilitation to punitivism that has taken place in the politics and practice of American corrections She argues that this punitive turn has had profoundly negative consequences for both crime control and American community life Professor Lerman's research shows that spending time in America's increasingly violent and castigatory prisons strengthens inmates criminal networks and fosters attitudes that increase the likelihood of criminal activity following parole Additionally Professor Lerman assesses whether America's more punitive prisons similarly shape the social attitudes and behaviors of correctional staff Her analysis reveals that working in more punitive prisons causes correctional officers to develop an us against them mentality while on the job

and that the stress and wariness officers acquire at work carries over into their personal lives straining relationships with partners children and friends

**The Urbanism of Frank Lloyd Wright** Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city. Stunningly comprehensive, *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism. Neil Levine places Wright's projects produced over more than fifty years within their historical, cultural, and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century. Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City. Rather, Levine reveals Wright's larger, more varied, interesting, and complex urbanism demonstrated across the span of his lengthy career. Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial, mixed-use, civic, and cultural centers for Chicago, Madison, Washington, Pittsburgh, and Baghdad, Levine demonstrates Wright's place among the leading contributors to the creation of the modern city. Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis. Lavishly illustrated with drawings, plans, maps, and photographs, this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives. *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come.

Who's Who in America Marquis Who's Who, Inc, 2002 Subject Guide to Books in Print, 1975 Who's who in the Midwest, 2005 *Designing the Civic Commons* Jennifer Jean Sloan, 2020 In modern America, people gather in civic public spaces for many reasons: to celebrate, family, gather as a community, engage in commerce or protest injustices. The design of these spaces is critical to their ability to foster civic participation. Jan Gehl has argued that public spaces should be designed for people and encourage social interactions that build social capital. Gehl 2006 Social capital is beneficial to individuals and communities in many ways, including political engagement, the economic prosperity of individuals and communities, and the safety and security of the community. Putnam 1995 It has been said that in public spaces we learn to be citizens. Kaufman Tepper 1999 and therefore we can say good citizens are made in good places. While sociologists have emphasized the connections between public space and social capital, there is little research that looks specifically at the design features and programming that make these connections possible. This research focuses on the role of design in creating public civic spaces that encourage social interaction and build social capital. While architects and planners have established formal typologies for civic space in large cities, there is little research that evaluates their success in supporting social interaction. What is the role of the government in the creation of civic public spaces that encourage social interaction and build social capital? Are there civic space typologies that are more successful than others for building social capital? Which design features are most successful in bringing people together and thus creating social capital? These questions are addressed through the development of an audit framework to allow the study of three case study investigations of Texas edge cities on the northern urban fringe of the Dallas-Fort Worth metropolitan area: Denton, Southlake, and Frisco. This original framework combines a study of the physical layer, code layer, and content layer. Nemeth with a Public Space Index. Vikas and applies them to three case studies. These case studies will include qualitative and quantitative data gained through public space audits, behavior mapping, survey data, and participant observation. The intended result of this research is to determine how successful each civic public space is in regards to building social capital and what role the government plays in facilitating and maintaining it. Additionally, this research seeks to understand the space typology and features present in the most successful public spaces, both from the perspective of policy and of design, proposing new ways for these separate disciplines to communicate about their shared concerns. If you build a good place, people will gather in it. Walljasper 2005 Local governments have a vested interest in building social capital with their citizens. As public administrators understand the ways that civic space can be

designed and used the better designed spaces will be
