National Competitiveness In A Global Economy

Timo J. Hämäläinen

National Competitiveness In A Global Economy:

National Competitiveness in a Global Economy David P. Rapkin, William P. Avery, 1995 This volume examines the causes and consequences of changes in economic competitiveness The authors locate the issues in the context of the debate in the late 1980s and early 90s over relative US decline and survey the various definitions and conceptual approaches to the subject

National Competitiveness in Global Economy Attila Chakán, Erzsébet Czakó, Zita Zoltay-Paprika, 2002 The Hungarian economy is on a new development path after coping successfully with challenges raised by national economic transition and the increasing globalization in the first half of the 1990s Competitiveness has become a key issue for both macroeconomic analysts and for decision makers in business and government Recognition of the above in 1995 led the Budapest University of Economic Sciences to start a research program titled In Global Competition Microeconomic Factors of Competitiveness of the Hungarian Economy A focal element of the research program was an opinion survey The analysis of the database of two surveys makes it possible to provide an overview of the changes in the behavior performance and selected operational fields of Hungarian companies between 1995 and 1999 The main findings of this analysis are published in this book Besides the description of the Hungarian developments the authors provide some more general conclusions for those interested in micro

and National Competitiveness and Economic Growth Timo J. Hämmäläinen, 2003 The current paradigm shift in the world economy is challenging the traditional competitiveness and growth theories with their few explanatory variables This book offers a more holistic framework to synthesise the key findings of the various branches of competitiveness and growth research The author illustrates this framework with a new long wave theory of socio economic development This theory emphasises the competitiveness and growth benefits of rapid structural adjustment in the rapidly changing techno economic environment Based on thorough analysis the author argues that both markets and governments have become less efficient due to the current transformation of the world economy His empirical data from 22 OECD countries in the 1980s and 1990s illustrates that efficiency and growth oriented governments have significantly contributed to their countries economic success National Competitiveness and Economic Growth will furnish its readers with a better understanding of the interdependencies of many important but seemingly unrelated aspects of modern economies and societies for example the dynamics of business and technology and cultural and institutional change It will appeal to economists business professionals and policymakers with a special interest in the competitiveness and growth of firms and national economies as well as the long term development of socio economic systems

The Global Economy, National States and the Regulation of Labour Paul Edwards, Tony Elger, 2014-06-03 The implications of globalization for labour are more often asserted than analyzed This collection and its companion volume Globalization and Patterns of Labour Resistance edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It considers the ways in which national and supra national regimes of

labour regulation are being actively reconstructed in the context of the internationalization of production The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards **Current Issues of Science and Research in the Global World** Vlasta Kunova,Martin

Dolinsky,2014-12-01 This book contains the papers presented at the International Conference on Current Issues of Science and Research in the Global World held at the premises of the Vienna University of Technology from May 27 to May 28 2014 The book represents a significant contribution to Law Economics Information Communication Technologies Journalism and Psychology including topical research work in the presented fields This interdisciplinary volume is also essential reading for all those interested in international pluralism in terms of scientific contributions The Pan European University respecting its own vision and ambition to become a well known institution within the Global Research Area traditionally elaborates research and scientific collaboration across national borders The educational principles and research attitudes of the Pan European University grasp the traditions of many cultures and geographic areas The International Conference on Current Issues of Science and Research in the Global World was part of a series of similar top rated international events organized by the Pan European University bringing together scientists professionals policymakers and representatives of culture from many countries **Africa's Competitiveness in the Global Economy** Ifedapo Adeleye,Mark Esposito,2018-01-10 This

book highlights the key issues opportunities and challenges facing African firms industries cities and nations in their quest to compete successfully in the global economy Exploring a topic which has grown in importance as Africa faces a period of subdued economic development this edited collection takes a unique multi disciplinary multi industry and multi country approach The authors provide insights into a broad range of issues including competitiveness measurement and evaluation sectoral competitiveness of declining and emerging industries threats of the Dutch Disease and talent competitiveness This timely book offers a response to the urgent need for the diversification of economies and the advancement of manufacturing in Africa appealing to scholars of international business and economics **Global Economy, Global Justice** George

DeMartino,2002-09-11 This text presents a devastating critique of the currently fashionable idea of globalisation Using comprehensive and non technical language this book looks at the world's cultural and value diversity and questions whether it is possible to impose a global policy given these differences Topics covered include theories of distribution and welfare what leads to a good economic outcome Egalitarian theories of welfarism global neoliberalism and the free market culture

Cooperation and Competition in the Global Economy Antonio Furino,1988 *The Societal Foundations of National Competitiveness* Michael J. Mazarr,2022-06-21 Nations rise and fall succeed or fail in rivalries and enjoy stability or descend into chaos because of a complex web of factors that affect competitive advantage One critical component is the package of essential social characteristics of a nation The ultimate story of the Cold War is that the United States was simply a more

competitive society than the Soviet Union more energetic more vibrant more innovative more productive more legitimate Through analysis of comparative studies of historical eras and trends historical case studies and the findings of issue specific empirical research the report explores how seven characteristics of a society determine its competitive standing and distinguish dynamic and competitively successful nations If the history surveyed in this report provides an accurate guide to the future the fate of the United States in today's rivalries will not be determined solely or even in significant degree by the numbers of its weapons or amounts of defense spending or how many proxy wars it wins but by the basic characteristics of its society The author applies the seven leading characteristics that affect national standing to the United States to create a snapshot of where the country stands That application provides some reason for optimism The United States continues to reflect many of these characteristics and the overall synergistic engine more than any other large country in the world However multiple trends are working to weaken traditional U S advantages Several such as the corruption of the national information space pose acute risks to the long term dynamism and competitiveness of the nation raising the worrying prospect that the United States has begun to display classic patterns of a major power on the far side of its dynamic and vital curve

Economic Reforms for Global Competitiveness Ushakov, Denis, 2017-09-13 Reforms are a necessary part of social and economic regulation Each year political pressure for economic reform becomes more prevalent especially from various international organizations and business associations Economic Reforms for Global Competitiveness is an essential reference source for the latest scholarly research on important factors of modern countries social and economic dynamics Featuring coverage on a broad range of topics such as human capital project management and fiscal reforms this book is ideally designed for academicians researchers and students seeking the latest material on the role and impact of economic reforms

Competition Policy in the Global Economy William S. Comanor, Akira Goto, Leonard Waverman, 2005-10-26 International agreements on competition law and policy are notoriously difficult to implement This collection of essays examines the complexities involved when the issues of international coordination and harmonization of competition law and policy are considered

Transnational Corporations and the Global Economy Richard Kozul-Wright, Robert Rowthorn, 1998-08-12 This book brings together papers written by representatives from UN agencies and academics who take a fresh look at the expanding role of transnational corporations and foreign direct investment in the world economy These papers deal with such issues as the nature and extent of globalisation the shifting relations between transnational corporations and national economies and the opportunities and obstacles facing policy makers in the rapidly changing global economy

National Politics in a Global Economy Philip A. Mundo, 1999 In our increasingly globalized world U S trade policy stands at the intersection of foreign and domestic affairs This book explains trade policy in terms of domestic politics presenting a concise account of its origins and political significance Although trade policy is a component of foreign policy Philip A Mundo explains how it is rooted in the domestic policy process and carries with it enormous implications for domestic affairs He

reviews the growing importance of trade policy since World War II particularly over the past twenty years and shows how recent policies like NAFTA are shaped by the domestic agenda Mundo explains trade policy as the product of a three stage process comprising agenda setting program adoption and implementation He reviews this process in terms of the ideas that inform trade policy the interests that seek to influence it and the institutions that shape it He also addresses the importance of specific measures such as administrative relief and trade sanctions This book distills the essence of the trade policy process into a concise innovative framework accessible to students and general readers With the growing importance of trade policy it makes explicit many of the subtleties surrounding policymaking while fully explicating the legal and international context in which trade operates

The Influence of National Competition Policy on the International Competitiveness of Nations Andreas Mitschke, 2008-05-05 Does every open economy profit from economic globalization Why do some countries profit more than others What role does national economic policy play with regard to a nation's potential to profit from economic globalization Is there a need for an international harmonization of economic policy in order to protect global competition and to prevent international conflicts or to the contrary is national economic policy a crucial and indispensable instrument for fostering the international competitiveness of an economy These questions were the starting point for a research project of the Department of Economics at the University of Nuremberg in 2003 The intention was to take a fresh look at the various harmonization claims which have been raised both in economic literature and by politicians As politicians in general simultaneously also strive for enhancing the international competitiveness of their nation the project aimed at the relation between harmonization claims on the one hand and the competitiveness debate on the other The decision to set the focus of this project on the role of competition policy has been triggered against the background of the ongoing debate on international competition rules In October 2001 the International Competition Network ICN has been established in New York Furthermore the Doha Ministerial Declaration of November 2001 envisaged WTO negotiations on international competition rules

National Economic Strategies for a Global Economy United States. Congress. Senate. Committee on the Judiciary, 1993

Regional Competitiveness Ron Martin, Michael Kitson, Peter Tyler, 2012-11-12 There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation This important book considers the factors that influence and shape the competitive performance of regions This is not just an issue of academic interest and debate but also of increasing policy deliberation and action However as the readings in this book make clear the very idea of regional competitiveness is itself complex and contentious Many academics and policy makers have used the concept without fully considering what is meant by the term and how it can be measured Policy formulation has tended to rush ahead of understanding and analysis and the purpose of this book is to close this important gap in understanding This book was previously published as a special issue of *Regional Studies*

The Princeton Encyclopedia of the World Economy. (Two volume set) Kenneth A. Reinert, Ramkishan Rajan, Amy Joycelyn Glass, Lewis

S. Davis, 2010-08-02 An essential reference to all facets of the world economy Increasing economic globalization has made understanding the world economy more important than ever From trade agreements to offshore outsourcing to foreign aid this two volume encyclopedia explains the key elements of the world economy and provides a first step to further research for students and scholars in public policy international studies business and the broader social sciences as well as for economic policy professionals Written by an international team of contributors this comprehensive reference includes more than 300 up to date entries covering a wide range of topics in international trade finance production and economic development These topics include concepts and principles models and theory institutions and agreements policies and instruments analysis and tools and sectors and special issues Each entry includes cross references and a list of sources for further reading and research Complete with an index and a table of contents that groups entries by topic The Princeton Encyclopedia of the World Economy is an essential resource for anyone who needs to better understand the global economy More than 300 alphabetically arranged articles on topics in international trade finance production and economic development International team of contributors Annotated list of further reading with each article Topical list of entries Full index and cross references Entry categories and sample topics Concepts and principles globalization anti globalization fair trade foreign direct investment international migration economic development multinational enterprises Models and theory Heckscher Ohlin model internalization theory New Trade Theory North South trade Triffin dilemma Institutions and agreements European Union International Monetary Fund World Trade Organization World Bank Doha Round international investment agreements Policies and instruments dollar standard international aid sanctions tariffs Analysis and tools exchange rate forecasting effective protection monetary policy rules Sectors and special issues child labor corporate governance the digital divide health and globalization illegal drugs trade petroleum steel Strengthening America to Compete in the Global Economy United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 1993

Conflict and Cooperation in National Competition for High-Technology Industry National Research Council, Kiel Institute for World Economics, Hamburg Institute for Economic Research, Board on Science, Technology, and Economic Policy, 1996-10-15 This unique volume contains a powerful set of recommendations on issues at the center of international discussions on investment trade and technology policy They take into account the globalization of industrial activity and the special characteristics of high technology industries while recognizing the continued policy role of national governments The book identifies the rationale for promotional measures for high technology industries delineates sources of friction among the leading industrial countries and proposes policies to enhance international cooperation and strengthen the multilateral trading regime This volume also examines the factors driving collaboration among otherwise competing firms and national programs highlights the need to develop principles of equitable public and private international cooperation and emphasizes the linkage between investment government procurement and other trade policies and prospects for enhanced international

cooperation *The New Global Economy in the Information Age : Reflections on Our Changing World ,*
