premier's offices and ministers' offices the book presents a detailed account of partisan advisers' involvement in policy work and a new theoretical framework for understanding this work and its impact. As Jonathan Craft shows, partisan advisers often engage in policy work with public servants outside stakeholders and often in types of policy work that public servants cannot. *Backrooms and Beyond* is a rich and rigorous look at an important aspect of contemporary Canadian politics, essential reading for scholars and practitioners, journalists, students of the Westminster system from around the world, and those wanting to understand just how policy is made today.

Between Colliding Worlds Jonathan Malloy, Institute of Public Administration of Canada, 2003-01-01 Jonathan Malloy's *Between Colliding Worlds* examines the relationship between governments and external activists through a comparative study of policy units dedicated to aboriginal and women's issues in Australia and Canada. Malloy identifies these units or special policy agencies as sitting on the boundary between the world of permanent public servants and that of collective social movements working for broad social and political change. These agencies at once represent the interests of social movements to government while simultaneously managing relations with social movements on behalf of government and thus operate in a state of permanent ambiguity. Malloy contends that rather than criticizing these agencies for their inherently contradictory nature, we must reconsider them as effectively dealing with the delicate issue of bridging social movements with state politics. In other words, the very existence of these special policy agencies provides a forum for social movements and the state to work out their differences. Relying heavily on interviews with public servants and external activists, Malloy argues convincingly that special policy agencies, despite or because of their ambiguous relationship to different communities, make critical contributions to governance.

Court Government and the Collapse of Accountability in Canada and the United Kingdom Donald Savoie, 2008-05-10 There is a consensus throughout much of the western world that the public sector is in urgent need of repair. This study seeks to understand why this is so by comparing developments in Canada and the United Kingdom. It looks to changes in values both in society and inside government and to the relationships between politicians and civil servants at the top and between civil servants and citizens at the bottom. Donald J. Savoie argues that both Canada and the UK now operate under court government rather than cabinet government. By court government, he means that effective power now rests with their respective prime ministers and a small group of carefully selected courtiers. For things that matter to prime ministers and their courts, the decision-making process shifts from formal to informal, involving only a handful of actors. For things that matter less to them, the decision-making process is horizontal, cumbersome, and consultative and involves a multitude of actors from different government departments and agencies as well as a variety of individuals operating outside government. Court governments undermine both the traditionally bureaucratic model and basic principles that have guided the development of our Westminster Whitehall parliamentary system. Nonetheless, Canada and the United Kingdom still cling to accountability requirements better suited to the past and the traditional bureaucratic model. Savoie concludes with a call for new accountability requirements.

that correspond with court government as well as the new relationships between politicians and civil servants and civil servants and citizens Behind the Scenes Robert Alexander Wardhaugh, Douglas MacEwan, 2010-01-01 Robert A Wardhaugh chronicles Clark's contributions to Canada's modern state in Behind the Scenes which reconstructs the public life and ideas of one of Canada's most important bureaucrats
