Modern Roots Alain Dieckhoff, Natividad Gutiérrez, 2017-07-05 Interest in the study of national identity as a collective phenomenon is a growing concern among the social and political sciences This book addresses the scholarly interest in examining the origins of ideologies and social practices that give historical meaning cohesion and uniqueness to modern national communities It focuses on the various routes taken towards the construction of cultural authenticity as an inspirational purpose of nation building and reveals the diversity of the themes practices and symbols used to encourage self identification and communality Among the techniques explored are the dramatization of suffering and tragedy the exaltation of heroes and deeds the evocation of landscape nature and the arts and the delimitation of collective values to be pursued during reconstruction in post war periods

Making Religion and Human Rights at the United Nations Helge Årsheim, 2018-07-23 This volume examines the different and sometimes contradictory approaches of four UN human rights committees to the concept of religion Drawing on critical perspectives from religious studies the book combines a genealogical assessment of the role of religion in international law with a detailed textual study of the reporting practice of the committees monitoring racial discrimination civil and political rights women s rights and children s rights Årsheim argues that the role of religion within the rights traditions monitored by the committees varies to the extent that their recommendations risk contradicting one another thereby undermining their credibility and potential to bring about real change on the ground Where some committees view religion singularly as a core individual right others see religion partly as an inherent threat to the realization of other rights but also as a potent social force to be reckoned with In order to remedy this situation Årsheim proposes the publication of a joint general comment by all the committees spelling out their approach to the role of religion in the implementation of human rights

Liew, Shaoguang Wang, 2012-11-12 This book examines the changing role of nationalism in China in the light of the immense political and economic changes there during the 1990s It analyses recent debates between the nationalists New Left and liberals in China and examines the roles played by state sponsored and populist nationalism in China s foreign relations with the West in general and the USA in particular The issues of Taiwanese nationalism and Tibet and Xinjiang separatism are discussed with a focus on the questions of the impact of globalisation on national integration or fragmentation and the relationship between democracy and national integration should democracy precede national integration or could democracy be realised only after national integration or are democracy and national integration mutually exclusive objectives The book also examines the roles played by the People s Liberation Army and fiscal system in China in promoting Chinese nationalism and national integration

Exemplary Life Andreas Bandak, 2022-06-29 Based on over five years of ethnographic fieldwork in Syria Exemplary Life focuses on the life of a Damascus woman Myrna Nazzour who serves as an aspirational figure in her community Myrna is regarded by her followers as an exemplary figure a living saint and the messages apparitions stigmata

and oil that have marked Myrna since 1982 have corroborated her status as chosen by God Exemplary Life probes the power of examples the modelling of sainthood around Myrna s figure and the broader context for Syrian Christians in the changing landscape of the Middle East The book highlights the social use of examples such as the ones inhabited by Myrna s devout followers and how they reveal the broader structures of illustration evidence and persuasion in social and cultural settings Andreas Bandak argues that the role of the example should incite us to investigate which trains of thought set local worlds in motion In doing so Exemplary Life presents a novel frame for examining how religion comes to matter to people and adds a critical dimension to current anthropological engagements with ethics and morality Secular Government, Religious People Ira C. Lupu,Robert W. Tuttle,2014-08-02 In this book Ira Lupu and Robert Tuttle break through the unproductive American debate over competing religious rights They present an original theory that makes the secular character of the American government rather than a set of individual rights the centerpiece of religious liberty in the United States Through a comprehensive treatment of relevant constitutional themes and through their attention to both historical concerns and contemporary controversies including issues often in the news Lupu and Tuttle define and defend the secular character of U S government **Religion and the Specter of the West** Arvind-Pal S. Mandair,2009-10-23 Arguing that intellectual movements such as deconstruction postsecular theory and political theology have different implications for cultures and societies that live with the debilitating effects of past imperialisms Arvind Mandair unsettles the politics of knowledge construction in which the category of religion continues to be central Through a case study of Sikhism he launches an extended critique of religion as a cultural universal At the same time he presents a portrait of how certain aspects of Sikh tradition were reinvented as religion during the late nineteenth and early twentieth centuries India s imperial elite subtly recast Sikh tradition as a sui generis religion which robbed its teachings of their political force In turn Sikhs began to define themselves as a nation and a world religion that was separate from but parallel to the rise of the Indian state and global Hinduism Rather than investigate these processes in isolation from Europe Mandair shifts the focus closer to the political history of ideas thereby recovering part of Europe s repressed colonial memory Mandair rethinks the intersection of religion and the secular in discourses such as history of religions postcolonial theory and recent continental philosophy Though seemingly unconnected these discourses are shown to be linked to a philosophy of generalized translation that emerged as a key conceptual matrix in the colonial encounter between India and the West In this riveting study Mandair demonstrates how this philosophy of translation continues to influence the repetitions of religion and identity politics in the lives of South Asians and the way the academy state and media have analyzed such phenomena **Constitutionalism and Democracy** Douglas Greenberg,Stanley N. Katz,Steven C. Wheatley,Melanie Beth Oliviero,1993-07-08 The political changes which have occurred in the last three years have been phenomenal the dissolving of the former Soviet Union the impending union of Western Europe and the evolution of democracy in Eastern Europe What changes have occurred in the legal structure of these

countries How have their constitutions been affected by these developments Stanley Katz Douglas Greenberg and other scholars and politicians from numerous countries discuss in this work the experiences of constitutionalism Previously little work has been done in this field but now Constitutionalism and Democracy represents the range and depth for serious constitutional analysis Discussing concrete issues such as human rights nationalism and pluralism this volume will be essential in understanding the phenomenon of constitutionalism in various parts of the world
