National Attributes and Behavior Rudolph J. Rummel, 1979 *National Choices and International Processes* Zeev Maoz, 1990-06-29 National Choices and International Processes will be of interest to students and specialists in foreign policy and international relations theory Resources in Education, 1981 *Political Culture and Foreign Policy in Latin America* Roland H. Ebel, Ray Taras, James D. Cochrane, 1991-01-01 This book explores the impact of Latin America's political culture on the international politics of the region. It offers a general account of traditional Iberian political culture while examining how relations among states in the hemisphere where the United States has been the central actor have evolved over time. The authors assess the degree of consistency between domestic and international political behavior. The assessments are supported by case studies Approaches to Long Range Forecasting, 1970 Long-range Forecasting and Planning, 1967

Counter-Hegemony and Foreign Policy Randolph B. Persaud, 2001-03-29 It is not uncommon for scholars and policy makers to assume that small and dependent states must follow the lead of great or middle powers. But is this always the case? Drawing on the increasingly influential Gramscian approach to international relations, this book shows the ways in which marginalized social forces in Jamaica were mobilized against the hegemonic practices emanating from the global political economy. Persaud emphasizes the counter-hegemonic cultural activities of these forces as well as the attempt of the Jamaican government to form a global trade union of the poor British Foreign Policy and the National Interest T. Edmunds, J. Gaskarth, R. Porter, 2014-11-18 Whose interests does British foreign policy serve? Is the national interest a useful explanatory tool for foreign policy analysts? This interdisciplinary collection responds to these questions exploring ideas of Britain's national interest and their impact on strategy, challenging current thinking and practice in the making of foreign policy.

Vasquez, 1998 In this new and much expanded edition of his classic study, John Vasquez examines the power of the power politics perspective to dominate inquiry and evaluates its ability to provide accurate explanations of the fundamental forces underlying world politics American National Election Studies Data Sourcebook, 1952-1986 Warren Edward Miller, Santa A. Traugott, Santa Traugott, 1989 Who votes in national elections? What are their preferences on issues? How important is their party identification? How does their demographic profile change over time? Reflecting an unbroken record of eighteen studies of voter behavior conducted biennially since 1952, this volume presents data on hundreds of elements influencing voters that will interest political scientists, journalists, consultants, and students of political history. The information was obtained from face-to-face interviews with national full probability samples of all citizens of voting age as part of the University of Michigan National Election Studies conducted by the Center for Political Studies. The data provide both an unrivaled occasion to gain a deeper understanding of congressional

and presidential elections and a basis for making or challenging broad generalizations about American politics since World War II Major sections include personal characteristics age education gender religion occupation income union membership urbanism race ethnicity partisanship party identification open ended evaluations of parties and candidates issues ideological self placement issue preferences perceptions of economic conditions candidate traits thermometer ratings of individuals and groups voter preferences media exposure and voter turnout and political participation The editors present these attributes in terms of stability and change and the sequence in which the various elements acquire relevance for the voter's choice The book is organized to give time series distributions of data from all items included on three or more studies during the thirty four years covered and presents first level analyses through a logically structured series of bivariate tables It is the only book to include the basic data from National Election Studies

The past decade has witnessed a decline in saving throughout the developed world the United States has the dubious distinction of leading the way The consequences can be serious For individuals their own economic security and that of their families is jeopardized For society inadequate rates of saving have been blamed for a variety of ills decreasing the competitive abilities of American industry slowing capital accumulation increasing our trade deficit and forcing the sale of capital stock to foreign investors at bargain prices Restoring acceptable rates of saving in the United States poses a major challenge to those who formulate national economic policy especially since economists and policymakers alike still understand little about what motivates people to save In *National Saving and Economic Performance* edited by B Douglas Bernheim and John B Shoven that task is addressed by offering the results of new research with recommendations for policies aimed to improve saving Leading experts in diverse fields of economics debate the need for more accurate measurement of official saving data examine how corporate decisions to retain or distribute earnings affect household level consumption and saving and investigate the effects of taxation on saving behavior correlations between national saving and international investment over time and the influence of economic growth on saving Presenting the most comprehensive and up to date research on saving this volume will benefit both academic and government economists
