National Development And The World System:

National Development and the World System John W. Meyer, 1979 **State in Society** Joel S. Migdal, 2001-08-27

The essays in this book trace the development of Joel Migdal's state in society approach. The essays situate the approach within the classic literature in political science, sociology, and related disciplines but present a new model for understanding state-society relations. It allies parts of the state and groups in society against other such coalitions, determines how societies and states create and maintain distinct ways of structuring day-to-day life, the nature of the rules that govern people's behavior, whom they benefit and whom they disadvantage, which sorts of elements unite people and which divide them, and what shared meaning people hold about their relations with others and their place in the world.

Comparative National Development A. Douglas Kincaid, Alejandro Portes, 1994

What does it mean to speak of national development in the 1990s? As a result of the tumultuous changes in global economic and political structures, scholars and policymakers specializing in the study of national development must reassess the interpretive models they have relied upon in the past. This book brings together essays by a distinguished group of social scientists that address the dilemmas facing development theory today. These essays, grounded in sociological research, reclaim the important role once played by sociological theory in development studies. The collection provides an overview of traditional theories of development, assessing their strengths and weaknesses, and identifies the new actors, issues, and processes that future analysis must address. The essays discuss the impact of technological innovations in production and commerce, the changing relations of states and markets, regional development, inequalities, and the emergence of new social groups as participants in development processes.

An important building block for further advancing world system

theory this book considers the theory from the perspectives of global processes and antisystemic movements feminist theory and the aftermath of the colonial system The volume addresses three myths tied to Eurocentric forms of thinking objectivist and universalist knowledges the decolonization of the modern world and developmentalism All three myths the authors argue conceal the continued hierarchical and unequal relations of domination and exploitation between European and Euro American centers and non European peripheral regions In this volume world system scholars address these and related aspects of the modern colonial capitalist world system Addressing the myth of universalist knowledge the volume reminds us that our knowledge is situated in the gender class racial and sexual hierarchies of a specific region in the world system while the colonality of power additionally situates our knowledge The volume further argues that the postcolonial era retains the hierarchy of colonialism and the possibility of national development without global structural changes is one of the greatest 20th century myths Taking these perspectives into consideration the contributors examine and help to refine classic world system theory

Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups

are critical elements in the educative process. By viewing the school as a societal institution and highlighting the interaction between context and individual behavior, the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society. The second sociological insight that guides the research in the Handbook is that the school is a social system. A World-Systems Reader Thomas D. Hall, 2000-03-01. This book brings together some of the most influential new research from the world systems perspective. The authors survey and analyze new and emerging topics from a wide range of disciplinary perspectives from political science to archaeology. Each analytical essay is written in accessible language so that the volume serves as a lucid introduction both to the tradition of world systems thought and the new debates that are sparking further research today. **African American Perspectives on Political Science** Wilbur C. Development Studies Aphorpe, Kráhl, 2024-03-11. The Anthem Companion to Immanuel Wallerstein Patrick Hayden, Chamsy el-Ojeili, 2023-08-01. Immanuel Wallerstein, one of the most influential yet controversial sociologists of the past half century, is a touchstone in innumerable debates about globalization and the power of capitalism, the nature of development in the modern era, and how to come to grips with widespread inequalities while recovering the potential for social change. The Anthem Companion to Immanuel Wallerstein offers a compelling guide to his writings and ideas, his influences and reception, and the reasons for his enduring significance, with 10 original interpretive essays written by a distinguished group of international scholars. Importantly, the contributors also advance Wallerstein's work into neglected areas such as climate change, global pandemics, racism, and gender, and demonstrate his importance not just to debates in his intellectual context but to those of our times as well. This companion provides a multifaceted tool for thinking with Wallerstein while showing where those engaging with Wallerstein's thought can take his work in the contemporary world.

Problems of Communism, 1992. **Re-theorizing Discipline in Education** Zsuzsa Millei (Ed), Tom G. Griffiths, Robert John Parkes, 2010. Understandings that can make a difference in students' lives. **Tend the Olive, Water the Vine** Rachel Christina, 2006-08-01. Current international development wisdom promotes the inclusion of non-governmental organizations (NGOs) in national level policy making in the interest of strengthening state-civil society relationships supporting locally driven, culturally sensitive development and contributing to program and policy innovation. However, critics of increased state-NGO donor collaboration argue that it actually dilutes the power of NGOs to act in the interest of the local populations they were established to serve. This tension between the local and the global is connected to broader debates about the nature and role of contemporary educational development. Should education aim primarily at preparing citizens for participation in the global economy, thereby encouraging the integration of nation-states into a world economic system driven by the industrialized North? Or should it endeavor to develop in students and in communities North and South the ability to critique, resist, and transform that world system? Ultimately, this is a question of who owns development: international agencies and institutions or

the communities being developed This book examines the complexities of these negotiations in a particularly complicated and volatile context Palestine and a particularly hot development field early childhood development The international community's efforts to support early childhood programming in the developing world fall more broadly within the empowerment camp than do other development efforts and in this case in particular serve as a source of important lessons about the dynamics of donor state NGO relationships suggestions for improved development policy and insights into forms of education which promote justice and equity in an increasingly interdependent world

The Nation in the Global Era Jerry Harris, 2009 The Nation in the Global Era Conflict and Transformation makes available a unique blend of multi disciplinary research covering topics that present the most current thinking on key developments concerning globalization Its main focus covers questions of transnational class and identity in relationship to the nation state

Global Formation Christopher K. Chase-Dunn, 1998 The fall of communism the emergence of the information age and the expansion of economic globalism are the point of departure for this text The author shows how these seemingly new developments fit with earlier patterns of global formation and change This edition also evaluates studies of the modern world system and assesses the implications for the future of the contemporary system

Globalization: The nation-state and international relations Roland Robertson, Kathleen E. White, 2003 Containing articles on approaches to and theories of globalization this collection addresses the making of the modern world from different disciplinary perspectives This set investigates the major components of globalization in its most comprehensive sense the nation state and the system of international relations the question of self identity and the individual in the globalization process human rights citizenship and the environment institutional questions including matters of media communication education tourism multinational corporations migration and intercultural communication New introductions and a thorough index make this work an indispensable research tool
