D., 2025-07-12 The Book is first of its kind There is hardly any publication in which a comprehensive survey of existing accounting concepts has been made in a systematic way by a single author It was the result of long and sustained efforts made by the author who was an experienced teacher and his own interpretations coupled with the critical survey have enhanced the worth of the book Many long standing confusions as to basic concepts have been sought to be ably removed by the author The work is definitely a great contribution to the accounting literature The book is valuable for the postgraduate students of commerce and management A Survey of Accounting Ideas With an Approach Based on Claims to Services originally contained 28 well written Chapters in VI Parts The Survey received wide appreciation from renowned academics the world over as a piece of substantial work along with publications of Bell Sprouse and Moonitz Littleton and Zimmerman Stephen A Zeff According to another distinguished American author R T Sprouse Professor Roy's work was an evidence of high level scholarship The Theory of Claims to Services was his original contribution for which he had obtained accolades from international scholars of accountancy as mentioned above It was considered as his seminal contribution to accounting literature In brief the theory of Claims to Services envisages that all accounting attributes are claims to service positive or negative Assets and liabilities are claims and disclaims against and in favour of any entity Expenses are claims against proprietorship and incomes are disclaims in favour of it All transactions are exchanges in claims which bring about a change
