National Toxicology Programs Chemical Solubility Compendium:

National Toxicology Program's Chemical Solubility Compendium Lawrence H. Keith, Douglas B. Walters, 1991-12-10 This book is a compilation of experimentally determined solubility ranges of over 1 700 compounds in the National Toxicology Program's Chemical Repository. Each compound's solubility was determined in a consistent manner in one to six solvents. Solvents chosen were those most commonly used for toxicology studies, spill cleanups and chemical synthesis or chemical reaction experiments. These solvents include acetone, 95% ethanol, water, dimethyl sulfoxide, methanol and toluene. Data for many of the research and industrial chemicals featured in this volume do not exist anywhere else. If you are a toxicologist, safety professional, industrial hygienist or chemist, this book is a valuable reference tool you'll find yourself using every day.

The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith, Douglas B. Walters, 1991-12-19 This Compendium provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics and libraries.

The National Toxicology Program's Chemical Database Lawrence H. Keith, Douglas B. Walters, 1991-12-31 This database provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics and libraries. The National Toxicology Program's Chemical Database consists of eight volumes containing 50 fields that present detailed information on 2 270 different chemicals. The data is obtained from the literature or experimentally determined. Each compound is listed in every volume even when there is no information available for it in some volumes. Information in the NTP database was gathered and updated as compounds were used throughout a 12 year period from 1979 to 1991. Throughout the eight volumes, the primary chemical name and the Chemical Abstracts Service Registry Number (CAS No.) remain constant and all 2 270 chemicals are listed alphabetically in each volume. The NTP database can be sold as a set or individually. Each volume consists of one 3 1/2 and two 5 1/4 diskettes in addition to a 64 page manual that describes how to use the software. Diskettes will run on IBM or IBM compatible equipment with DOS 2.0 and higher, 640K internal memory (RAM) and a hard drive with at least 2 17MB of available disk space. Use the eight volumes together to get the full benefit of the NTP Chemical Repository Database or select only those volumes that contain the information you need and use them as stand alone databases. Each volume consists of one 3 1/2 and two 5 1/4 diskettes that will run on IBM or IBM compatible hardware.

National Toxicology Program's Chemical Solubility Database Lawrence H. Keith, Douglas B. Walters, 1991-12-20 This database is a compilation of experimentally determined solubility ranges of over 1 700 compounds in the National Toxicology Program's Chemical Repository. Each compound's solubility was determined in a consistent manner in one to six solvents. Solvents chosen were those most commonly used for toxicology studies, spill cleanups and chemical synthesis or chemical reaction experiments. These solvents include acetone, 95% ethanol, water, dimethyl sulfoxide, methanol and toluene. Data for many of the research and industrial chemicals featured in this database does not exist anywhere else. The database is also remarkably simple to use and offers

many features that make finding information quick and easy Compounds can be located by using partial names such as acids amines ketones cyanides and ethers You can also locate compounds by using their CAS Number or by entering the specific chemical name The program is entirely menu driven and can perform Boolean and or type searches It comes equipped with one 3 1 2 diskette and one 5 1 4 diskette a 20 page manual and can run on IBM or IBM compatible hardware Dos 2 0 or higher 640K of internal memory and 1mb of hard drive memory are required National Toxicology Program s Chemical Solubility Database is a must have program for toxicologists safety professionals and industrial hygienists and chemists

Agrochemicals Desk Reference John H. Montgomery,1993-04-27 The Second Edition of the Agrochemicals Desk Reference is a revised up to date volume Much new data has been added to this edition reflecting the wealth of literature in the field Featured are environmental and physical chemical data on more than 200 compounds including pesticides herbicides and fungicides Among the new additions and changes are The Environmental Fate section which has been expanded and is now subdivided into the following categories Biological Soil Plant Surface Water Groundwater Photo lytic and Chemical Physical Also the introduction of experimentally determined bioconcentration factors and half lives of chemicals in various media All compounds are listed in alphabetical order making it easy to find the data you need Safety in the Chemistry and Biochemistry Laboratory André Picot,P. Grenouillet,1996-12-17 Chemical and biochemical Laboratories are full of potentially dangerous chemicals and equipment Safety in the Chemistry and Biochemistry Laboratory provides the necessary information needed for working with these chemicals and apparatus to avoid fires explosions toxic fumes skin burns poisoning and other hazards Both authors Andr Picot and Philippe Grenouillet are recognized authorities in the field of lab safety and their book arrange the information not available in similar publications It is addressed to members of Chemical Health Safety as well as working chemists in labs everywhere Also Lab managers will find the book a useful addition to their bookshelf **Fundamentals of Air Pollution** Daniel Vallero,2007-10-01 Fundamentals of Air Pollution is an important and widely used textbook in the environmental science and engineering community Written shortly after the passage of the seminal Clean Air Act Amendments of 1990 the third edition was quite timely Surprisingly the text has remained relevant for university professors engineers scientists policy makers and students up to recent years However in light of the transition in the last five years from predominantly technology based standards maximum achievable control technologies or MACTs to risk based regulations and air quality standards the text must be updated significantly The fourth edition will be updated to include numerous MACTs which were not foreseen during the writing of the third edition such as secondary lead Pb smelting petroleum refining aerospace manufacturing marine vessel loading ship building printing and publishing elastomer production offsite waste operations and polyethylene terephthalate polymer and styrene based thermoplastic polymers production Focuses on the process of risk assessment management and communication the key to the study of air pollution Provides the latest information on the technological breakthroughs in environmental engineering since last edition Updated

information on computational and diagnostic and operational tools that have emerged in recent years *Environmental Contaminants* Daniel A. Vallero,2010-08-05 *Environmental Contaminants* serves as a tool for environmental professionals to produce technically sound and reproducible scientific evidence It identifies ways to clean up environmental problems in air water soil sediment and living systems Ethical issues environmental management and professionalism and environmental economic problems are illustrated to assist the reader in understanding and applying quantitative analysis of environmental problems Real life solutions for practicing environmental professionals Example problems sidebars and case studies to illustrate ethical issues environmental economic problems and environmental management Explanation of scientific principles and concepts needed for risk assessment waste management contaminant transport environmental hydrogeology and environmental engineering chemistry A fully supportive glossary appendices and tables throughout the text contain physical chemical and biological resources necessary for all environmental practitioners The National Toxicology Program's Chemical Data Compendium Lawrence H. Keith,Douglas B. Walters,1991-12-31 This Compendium provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies consultants academics and libraries Fundamentals Of Aquatic Toxicology Gary M. Rand,2020-08-06 This text is divided into three parts The first part describes basic toxicological concepts and methodologies used in aquatic toxicity testing including the philosophies underlying testing strategies now required to meet and support regulatory standards The second part of the book discusses various factors that affect transport transformation ultimate distribution and accumulation of chemicals in the aquatic environment along with the use of modelling to predict fate The final section of the book reviews types of effects or endpoints evaluated in field studies and the use of structure activity relationships in aquatic toxicology to predict biological activity and physio chemical properties of a chemical This section also contains an extensive background of environmental legislation in the USA and within the European Community and an introduction to hazard risk assessment with case studies

Fundamentals of Air Pollution Daniel A. Vallero,2014-07-26 *Fundamentals of Air Pollution* is an important and widely used textbook in the environmental science and engineering community This thoroughly revised fifth edition of *Fundamentals of Air Pollution* has been updated throughout and remains the most complete text available offering a stronger systems perspective and more coverage of international issues relating to air pollution Sections on pollution control have been reorganized and updated to demonstrate the move from regulation and control approaches to green and sustainable engineering approaches The fifth edition maintains a strong interdisciplinary approach to the study of air pollution covering such topics as chemistry physics meteorology engineering toxicology policy and regulation New material includes near road air pollution new risk assessment approaches indoor air quality the impact of biofuels and fuel additives mercury emissions forecasting techniques and the most recent results from the National Air Toxics Assessment Stronger systems approach emphasizing the impact of air pollution on ecosystems and human health Risks measures models and control of air pollution

are discussed at scale starting at the individual niche level and expanding to planetary global scale Increased emphasis on international issues including coverage of European initiatives and discussions of the impact of emerging economies like India and China Updated references standards and methods throughout the book make this the most current air pollution text reference on the market All new end of chapter problems enhance its usefulness as a course text *The Cumulative Book Index*, 1994 A world list of books in the English language
