Stuffed and Starved Raj Patel, 2012-06-05 Completely updated and revised edition of one of the most widely praised food books of recent years It's a perverse fact of modern life There are more starving people in the world than ever before while there are also more people who are overweight To find out how we got to this point and what we can do about it Raj Patel launched a comprehensive investigation into the global food network It took him from the colossal supermarkets of California to India's wrecked paddy fields and Africa's bankrupt coffee farms while along the way he ate genetically engineered soy beans and dodged flying objects in the protestor packed streets of South Korea What he found was shocking from the false choices given us by supermarkets to a global epidemic of farmer suicides and real reasons for famine in Asia and Africa Yet he also found great cause for hope in international resistance movements working to create a more democratic sustainable and joyful food system Going beyond ethical consumerism Patel explains from seed to store to plate the steps to regain control of the global food economy stop the exploitation of both farmers and consumers and rebalance global sustenance

Land Use Controls and Property Rights John P. Lewis, 2007-07

The National Programme for IT in the NHS Great Britain: National Audit Office, 2006-06-16 The National Programme for Information Technology in the NHS the Programme is a ten year programme to use information technology IT to reform the way the NHS in England uses information and hence to improve services and the quality of patient care The core of the Programme will be the NHS Care Records Service but other elements include x rays accessible by computer electronic transmission of prescriptions and booking of first outpatient appointments The Programme was launched in 2002 and is now run by an agency NHS Connecting for Health This report examines the progress made in delivering the systems against the original plans and costs part 1 steps taken by the Department of Health the agency and the NHS to deliver the Programme part 2

how the IT systems have been procured part 3 how the NHS is preparing to use the systems part 4 The NAO estimates the gross cost of the Programme will be 12.4 billion to 2013/14. Although the pilot NHS Care Records Service will not be in place until late 2006 almost two years late and other milestones have been deferred the NAO reports substantial progress with the Programme. Management systems are in place contracts were placed quickly and achieved large reductions in prices from bidders and contract terms include important safeguards to secure value for money. Deployments of operational systems have begun and several additional tasks have been delivered that were outside the original brief. Three key areas are identified which present significant challenges to the successful implementation of the Programme: ensuring IT suppliers continue to deliver systems that meet the needs of the NHS to agreed timescales without further slippage; ensuring NHS organizations play a full part in implementing the systems; winning the support of NHS staff and the public in making the best use of the systems to improve services. The NAO report makes a number of recommendations for future management of the Programme.

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10. Co-published by Routledge for the American Educational Research Association (AERA). Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections the Handbook focuses on: 1. disciplinary foundations of educational policy; 2. methodological perspectives; 3. the policy process; 4. resources management and organization; 5. teaching and learning policy; 6. actors and institutions; and 7. education access and differentiation. Drawing from multiple disciplines the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research.
