

TRANSNATIONALISM

Transnationalism is a concept that refers to the connections, flow and exchange of economic, political and social processes across national borders.

DEFINITION

Transnationalism refers to the process where individuals and groups establish connections and networks across national boundaries, often involving a dual or multiple-country sense of belonging. It involves the complex interaction between and among different cultures, but lead to divided loyalties, identity confusion, and potential social tensions in host countries.

KEY THEORIES

- **Migrant Communities:** People who move overseas continue to maintain links with their home country. This creates a sense of connection that extends beyond national borders.
- **Global Companies:** Corporations such as Apple or Toyota operate in multiple countries at once reflecting an economic process known as transnational capitalism.

Nationalism And Transnationalism:

Old Nations, New Voters David C. Earnest, 2008 In this groundbreaking study David C Earnest analyzes why democracies give noncitizens the right to vote Bringing together theoretical debates in international relations and comparative politics about globalization sovereignty nationalism citizenship and state building he examines how twenty five democracies are coping with growing populations of immigrants who increasingly demand political rights Earnest employs statistical analyses along with case studies to uncover surprising facts that national courts are not necessarily progressive and that the left right differences of political parties disguise intriguing coalitions that may either welcome or marginalize immigrants The author concludes that rather than undermining the rights of citizens the enfranchisement of noncitizens reflects shared national myths In this respect when faced with growing migration old nations welcome new voters in ways that reinforce the bond between the nation and state

Transnationalism from Below Michael Peter Smith, Luis Eduardo Guarnizo, 1998-01-01 Expansion of transnational capital and mass media to even the remotest of places has provoked a spate of discourse on transnationalism A core theme in this debate is the penetration of national cultures and political systems by global and local driving forces The nation state is seen as weakened by transnational capital global media and emergent supranational political institutions It also faces the decentering local resistances of the informal economy ethnic nationalism and grass roots activism *Transnationalism From Below* brings together a rich combination of theoretical and grounded studies of transnational processes and practices discussing both their positive and negative aspects The editors examine the scope and limits of transnationalism The volume is divided into four parts Theorizing Transnationalism Transnational Economic and Political Agency Constructing Transnational Localities and Transnational Practices and Cultural Reinscription Contributors include Andre C Drainville Josephine Smart Alan Smart Minna Nyberg S0rensen George Fouron Nina Glick Schiller Luin Goldring Sarah J Mahler Linda Miller Matthei Louisa Schein David A Smith and Robert C Smith Moving easily between micro and macro analyses this book expands the boundaries of the current scholarship on transnationalism locates new forms of transnational agency and poses provocative questions that challenge prevailing interpretations of globalization *Transnationalism From Below* is a pioneering collection that will make a significant addition to the libraries of anthropologists sociologists international relations specialists urban planners political scientists and policymakers

Nationalism and Transnationalism in Spain and Latin America, 1808-1923, 2017-02-01 The twin focus of this book is on the importance of the Spanish heritage on nation and state building in nineteenth century Spanish speaking Latin America alongside processes of nation and state building in Spain and Latin America Rather than concentrating purely on nationalism and national identity the book explores the linkages that remained or were re established between Spain and her former colonies as has increasingly been recognised in recent decades the nineteenth century world was marked by the rise of the modern nation state but also by the development of new transnational connections and this book accounts for these

processes within a Hispanic context *Nationalism, Transnationalism, and Political Islam* Mohanad Hage Ali, 2017-09-07
This book sheds light on how Hizbullah has transformed religious rituals and supernatural narratives in order to mobilize the Shi'a community. The author examines how Hizbullah has altered its institutional structure and reconstructed Lebanese Shi'a history in a manner similar to that of nationalist movements. Through fieldwork and research, the project finds that Hizbullah has centralized around the concept of Wilayat al-Faqih, Guardianship of the Islamic Jurists, in essence, the absolute authority of Iran's Supreme Leader over the Shi'a nation.

Nationalism in a Transnational Age Frank Jacob, Carsten Schapkow, 2021-11-22
Nationalism was declared to be dead too early. A postnational age was announced and liberalism claimed to have been victorious by the end of the Cold War. At the same time, postnational order was proclaimed in which transnational alliances like the European Union were supposed to become more important in international relations. But we witnessed the rise of a strong nationalism during the early 21st century instead, and right-wing parties are able to gain more and more votes in elections that are often characterized by nationalist agendas. This volume shows how nationalist dreams and fears alike determine politics in an age that was supposed to witness a rather peaceful coexistence by those who consider transnational ideas more valuable than national demands. It will deal with different case studies to show why and how nationalism made its way back to the common consciousness and which elements stimulated the re-establishment of the aggressive nation-state. The volume will therefore look at the continuities of empire, actual and imagined, the role of foreign and otherness for nationalist narratives, and try to explain how globalization stimulated the rise of 21st-century nationalisms as well.

The Fiction of Nationality in an Era of Transnationalism Nyla Ali Khan, 2013-10-15
The book focuses on the representation of South Asian life in works by four Anglophone writers: V.S. Naipaul, Salman Rushdie, Amitav Ghosh, and Anita Desai. Concentrating on the intertwined topics of nationalism, transnationalism, and fundamentalism, the book addresses the dislocation associated with these phenomena, offering a critical dialogue between these works and contemporary history, using history to interrogate fiction and fiction to think through historical issues. Despite all their differences, the works of these authors delineate the asymmetrical relations of colonialism and the aftermath of this phenomenon as it is manifested across the globe. The binary structures created by the colonial encounter undergo a process of dialectical interplay in which each culture makes incursions into the other. This dialogic interplay becomes the basis for strategies that enable transnational and postcolonial writers to reimagine themselves and their world. The book shows, for instance, how Naipaul articulates a sensibility created by multilayered identities and the remapping of old imperial landscapes in the process, suggesting a new dynamic of power relations in which politics and selfhood, empire and psychology, prove to be profoundly interrelated. How Rushdie encourages a nationalist self-imagining and a rewriting of history that incorporate profound cultural, religious, and linguistic differences into our sense of identity? How Ghosh is critical of the putative cultural and religious necessity to forge a unified nationalist identity, arguing that no single theory sufficiently frames the multiple

inheritances of present diasporic subjectivities and how Desai seeks to imagine a responsible form of artistic social and political agency Although transnationalism then can have positive effects which have been celebrated in terms such as hybridity the book suggests why this sort of term too cannot be a stopping place for our thinking about a world radically transformed by postcolonial struggles

Curriculum of Global Migration and Transnationalism Elena Toukan, Rubén Gaztambide-Fernández, Sardar Anwaruddin, 2020-11-02 Curriculum of Global Migration and Transnationalism seeks to address the question What is the curriculum of global transnational migration The authors in this collection explore the multifaceted implications of movement for curriculum teaching and learning teacher education cultural practice as well as educational research and policy In this book the authors consider the following among other questions is the current experience of global transnational mobility and or migration really a new phenomenon or is it an extension of existing processes and dynamics e g colonialism capitalism imperialism What does global transnational mobility imply for schools and other educational institutions and processes as spatially located entities What approaches to curriculum are needed in the constantly shifting context of global movement How are the global and local re imagined through the experiences of mobility and migration This book was originally published as a special issue of Curriculum Inquiry

Transnational South America Ori Preuss, 2016-01-29 At the crossroad of intellectual diplomatic and cultural history this book examines flows of information men and ideas between South American cities mainly the port capitals of Buenos Aires and Rio de Janeiro during the period of their modernization The book reconstructs this largely overlooked trend toward connectedness both as an objective process and as an assemblage of visions and policies concentrating on diverse transnational practices such as translation travel public visits and conferences the print press cultural diplomacy intertextuality and institutional and personal contacts Inspired by the entangled history approach and the spatial turn in the humanities the book highlights the importance of cross border exchanges within the South American continent It thus offers a correction to two major traditions in the historiography of ideas and identities in modern Latin America the predominance of the nation state as the main unit of analysis and the concentration on relationships with Europe and the U S as the main axis of cultural exchange Modernization it is argued brought segments of South America s capital cities not only close to Paris London and New York as is commonly claimed but also to each other both physically and mentally creating and recreating spaces ways of thinking and cultural political projects at the national and regional levels

The Transnationalism of American Culture Rocío G. Davis, 2013 This book studies the transnational nature of American cultural production specifically literature film and music examining how these serve as ways of perceiving the United States and American culture The volume s engagement with the reality of transnationalism focuses on material examples that allow for an exploration of concrete manifestations of this phenomenon and trace its development within and outside the United States Contributors consider the ways in which artifacts or manifestations of American culture have traveled and what has happened to the texts in the process inviting readers to

examine the nature of the transnational turn by highlighting the cultural products that represent and produce it Emphasis on literature film and music allows for nuanced perspectives on the way a global phenomenon is enacted in American texts within the U S also illustrating the commodification of American culture as these texts travel The volume therefore serves as a coherent examination of the critical and creative repercussions of transnationalism and by juxtaposing a discussion of creativity with critical paradigms unveils how transnationalism has become one of the constitutive modes of cultural production in the 21st century

Turner, 2017-04-20 This edited book explores the impact of globalisation on the relationship between religion and politics religion and nation religion and nationalism and the impact that transnationalism has on religious groups In a post Westphalian and transnational world with increased international communication and transportation a plethora of new religious recompositions religions now take part in a network society that cuts across borders This collection through its analysis of historical and contemporary case studies explores the growth of both national and transnational religious movements and their dealings with the various versions of modernity that they encounter It considers trends of religious

transnational actors in the context of international relations with a focus on both security and order With renewed scholarly interest in the involvement of religion in international relations many observers and scholars have found this move unexpected because it challenges conventional wisdom about the nature and long term historical impact of secularisation The return of religion to international relations necessarily involves deprivatisation Recent challenges to international security and order emanate from various entities notably extremists people often said to be excluded from the benefits of globalisation for reasons of culture history and geography This study looks at the dynamics of this new religious pluralism as it influences the global political landscape Several specific transnational religious actors are examined in the chapters including American Evangelical Protestants Roman Catholics the Organisation of the Islamic Conference Sunni extremist groups al Qaeda and Lashkar e Taiba and Shia transnational networks While varying widely in what they seek to achieve they
