Rethinking International Relations Theory Martin Griffiths,2011-03-02 International Relations IR theory has seen a proliferation of competing and increasingly trenchant worldviews with no consensus on how to evaluate their relative strengths and weakness This innovative new text provides an original interpretation of how best to navigate the clash of perspectives in contemporary IR theory The book provides a systematic overview of the main worldviews such as realism

liberalism and constructivism and their associated theoretical underpinnings Placing liberal internationalism at the heart of the debate it argues that the main division in IR theory is between liberal internationalism and its critics Griffiths examines both the strengths and weaknesses of liberal internationalism as a worldview and also explores the competing worldviews that have been generated by the perceived flaws of this perspective Examination of crucial policy issues is incorporated throughout the text restoring the relevance of theory for those who wish to understand those policy issues Moreover this book revitalises the raison d'être of contemporary IR theory and shows the role it can play in making sense of the twenty first century

Peace Research Abstracts Journal, 2004

Self-Determination and Collective Responsibility in the Secessionist Struggle Costas Laoutides, 2016-03-03 The often violent emergence of new independent states following the end of the Cold War generated discussion about the normative grounds of territorial separatism A number of opposing approaches surfaced debating whether and under which circumstances there is a right for a community to secede from its host country Overwhelmingly these studies placed emphasis on the right to secession and neglected the moral stance of secessionist movements as agents in international relations In this book Costas Laoutides explores the collective moral agency involved in secessionist struggles offering a theoretical model for the collective responsibility of secessionist groups Case studies on the Kurds and the people of Moldova Transdniestria illustrate the author's theoretical arguments as he seeks to establish how although the principle of self determination was envisaged as a means of gradually bestowing political power upon the people it never managed to realize its full potential because it was interpreted strictly within a framework of exclusionary politics of identity

Minorities, Peoples And Self-determination Nazila Ghanea-Hercock, Alexandra Xanthaki, Patrick Thornberry, 2005 This volume presents new thinking on minority and indigenous rights in international law Debates that receive attention in this volume include self determination definitional issues collective rights and rights to natural resources Other chapters unravel challenges that have not attracted sufficient attention to date such as multiculturalism integration colour as a ground for discrimination and the economic and social rights of minorities The volume also looks critically at the work of the World Bank the African Union the Council of Europe and the OSCE in this arena Finally case studies highlight the regrettable similarities in the suffering of groups in different parts of the world as well as the stark contrast between state claims and their actual practice

Anti-genocide Activists and the Responsibility to Protect Annette Jansen, 2017-05-08 Although the Genocide Convention was already adopted by the UN General Assembly in 1948 it was only in the late 1990s that groups of activists emerged calling for military interventions to halt mass atrocities The question of who these anti genocide activists are and what motivates them to call for the use of violence to end violence is undoubtedly worthy of exploration Based on extensive field research *Anti genocide Activists and the Responsibility to Protect* analyses the ideological convictions that motivate two groups of anti genocide activists East Timor solidarity activists and Responsibility to Protect R2P advocates The book argues that there is an existential undercurrent to the call for mass

atrocities interventions that mass atrocities shock the activists belief in a humanity that they hold to be sacred The book argues that the ensuing rise of anti genocide activism signals a shift in humanitarian sensibilities to human suffering and violence which may have substantial implications for moral judgements on human lives at peril in the humanitarian and human rights community This book provides a fascinating insight into the worldviews of activists which will be of interest to practitioners and researchers of human rights activism humanitarian advocacy and peace building *Jewish*

Self-Determination Beyond Zionism Jonathan Graubart,2023-03-04 Seeks to develop a new Jewish vision of dissent by reconceiving Jewish self determination to feature social justice inclusiveness internationalism and reconciliation with Palestinians synthesizing and adapting the ideas of Martin Buber and Hannah Arendt and putting them in dialogue with a range of contemporary Jewish and Palestinian critical perspectives *Profiles of Self-determination* David Chanaiwa,1976

Populist Authoritarianism Wenfang Tang,2016-01-04 Populist Authoritarianism focuses on the Chinese Communist Party which governs the world s largest population in a single party authoritarian state Wenfang Tang attempts to explain the seemingly contradictory trends of the increasing number of protests on the one hand and the results of public opinion surveys that consistently show strong government support on the other hand The book points to the continuity from the CCP s revolutionary experiences to its current governing style even though China has changed in many ways on the surface in the post Mao era The book proposes a theoretical framework of Populist Authoritarianism with six key elements including the Mass Line ideology accumulation of social capital public political activism and contentious politics a hyper responsive government weak political and civil institutions and a high level of regime trust These traits of Populist Authoritarianism are supported by empirical evidence drawn from multiple public opinion surveys conducted from 1987 to 2015 Although the CCP currently enjoys strong public support such a system is inherently vulnerable due to its institutional deficiency Public opinion can swing violently due to policy failure and the up and down of a leader or an elite faction The drastic change of public opinion cannot be filtered through political institutions such as elections and the rule of law creating system wide political earthquakes **Peoples and International Law** James Summers,2014-04-09

Peoples and International Law is a detailed survey of the law of self determination with a focus on the concept of nations and peoples It engages with different aspects of this law with particular emphasis on the drafting and implementation of international instruments The second edition includes new coverage of the Declaration on the Rights of Indigenous Peoples and the African and Arab charters It considers recent practice by the Human Rights Committee Committee on Economic Social and Cultural Rights and African Commission on Human and Peoples Rights dealing with the emerging political economic and environmental aspects of the right The book looks at the interaction of international law nationalism and liberalism in theories of nationhood and self determination as well as the historical development of the right and the decisions of international bodies Lastly it examines practice in this area including new developments in remedial independence and international territorial administration Also available in

hardback **Ethnonationalism in the Contemporary World** Daniele Conversi, 2003-08-29 In Ethnonationalism in the Contemporary World world renowned scholars employ various aspects of Connor s work to explicate the recent upsurge of nationalism on a global scale In keeping with the growing awareness that the study of ethnonationalism requires an interdisciplinary approach the contributors represent a number of academic disciplines including anthropology geography history linguistics social psychology sociology and world politics The book discusses issues such as identity ethnicity and nationalism primordialism social constructionism ethnic conflict separatism and federalism It also features case studies on the Basque country South Africa and Canada **Socio-Legal Struggles for Indigenous Self-Determination in Latin America** Roger Merino, 2021-05-16 This book is an interdisciplinary study of struggles for indigenous self determination and the recognition of indigenous territorial rights in Latin America Studies of indigenous peoples opposition to extractive industries have tended to focus on its economic political or social aspects as if these were discrete dimensions of the conflict In contrast this book offers a comprehensive and interdisciplinary understanding of the tensions between indigenous peoples territorial rights and the governance of extractive industries and related state developmental policies Analysing the contentious process pushed by indigenous peoples for implementing pluri nationality against extractive projects and pro extractive policies the book compares the struggle for territorial rights in Bolivia Ecuador and Peru Centrally it argues that indigenous territorial defenses against the extractive industries articulate a politics of self determination that challenges coloniality as the foundation of the nation state The resource governance of the nation state assumes that indigenous peoples must be integrated or assimilated within multicultural arrangements as ethnic minorities with proprietary entitlements so they can participate in the benefits of development As the struggle for indigenous self determination in Latin America maintains that indigenous peoples must not be considered as ethnic communities with property rights but as nations with territorial rights this book argues that it offers a radical re imagination of politics development and constitutional arrangements Drawing on detailed case studies this book s multidisciplinary account of indigenous movements in Latin America will appeal to those with relevant interests in politics law sociology and development studies
