- The connection between a **nation** and its **territory** is particularly significant. The territory is an important ingredient in national identity and nationalism. However, nationalism can inspire tensions when two or more nations have conflicting aspirations. Often these result from historical memories of territory that overlaps.

Nationalism And Territory:

Nested Identities Guntram Henrik Herb, David H. Kaplan, 1999 This groundbreaking work explores the vital importance of territory and space to any genuine understanding of nationalism and identity Too often the contributors argue national identity is analyzed apart from the lands that are integral to its formation as territory is seen as a commodity to be brokered rather than as central to a group's self definition This volume combines theoretical insights with structured case studies on how national identity manifests itself in space and at different geographical scales Nationalism and Territory George W. White, 2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nation's identity both past and present With his detailed analysis of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war Foundations of Comparative Politics Kenneth Newton, Jan W. Van Deth, 2005-09 An authoritative new introductory text covering the key concepts theories and issues in comparative politics **Territory** David Storey, 2001

Nationalism David H. Kaplan, Kathryn Hannum, 2023-11-20 Nationalism provides a comprehensive exploration of nationalist identity ideology and practice which centers the geographic underpinnings of the phenomenon. It unpacks the fundamental principles and the many variations of this global phenomenon as it examines nationalism through a spatial lens. Nationalism is the dominant political force in the modern world and no other global ideology is so strongly tied to concepts like territory, homeland, frontiers, and boundaries. The authors delve into how nationalism is fundamentally related to territory and place, why mapping is critical to the nationalist endeavors, the role of performance and personification, ethnonationalism, multinationalism, nationalist movements, and how nationalism is evidenced and experienced in cities and towns throughout the world. These provide a solid summary of what makes nationalism so compelling, so uniting, and so dangerous. Nationalism provides a fresh and compelling perspective on a complicated and often controversial subject. Written in an accessible and attractive style, the book will be especially useful for classes in Geography, Global Studies, International Relations, Political Science, Sociology, History, and Anthropology. It provides information and conceptual insights to scholars interested in a concise and sophisticated synthesis of contemporary nationalism. For casual readers interested in the phenomenon of nationalism, this book provides clear explanations and compelling examples.

Territories David Storey, 2012-03-15 Politics and political relationships underpin the world we live in. From the division of the earth's surface into separate states to the placement of keep out signs, territorial strategies to control geographic space can be used to assert, maintain, or resist power and as a force for oppression or liberation. Forms of exclusion can be consolidated and reinforced through territorial practices, yet they can also be resisted through similar means. Territoriality can be seen as the spatial expression of power with borders dividing those inside from those outside. The extensively revised and updated second edition continues to provide an introduction to theories of territoriality and the outcomes of territorial control and resistance. It explores the construction of territories and the conflicts which often result, using a range of examples drawn from various spatial scales and from many different countries. It ranges in coverage from conflicts over national territory such as Israel/Palestine, Northern Ireland, South Ossetia, to divisions of space based around class, gender, and race. While retaining the key elements of the first edition, this new edition covers contemporary debates on nationalism, territorialization, globalization, and borders. It updates the factual content to explore the territorial consequences of 9/11, the war on terror, and the conflicts in Iraq and Afghanistan. It also examines migration, refugees, the territorial expansion of the European Union, and territorial divisions in the home and workplace. The book emphasizes the underlying processes associated with territorial strategies and raises important questions relating to place, culture, and identity. Key questions emerge concerning geographic space: who is allowed to be in particular spaces and who is barred, discouraged, or excluded? Written from a geographical perspective, the book is interdisciplinary, drawing on ideas and material from a range of academic disciplines including history, political science, sociology, international relations, and cultural studies. Each chapter contains boxed case studies, illustrations, and guides to further
