Metropolitan Planning in Britain Peter Roberts, Kevin Thomas, Gwyndaf Williams, 2014-02-04 Metropolitan Planning in Britain is the first comparative analysis and assessment of metropolitan areas and their strategic planning for almost two decades Changes in population distribution styles of local government business practices and attitudes to the environment have all had an impact on cities in recent years which planners and other policy makers must take into consideration Based on a series of research projects and the activities of a study group supported by the Regional Studies Association the book examines in detail nine major urban areas their specific characters and requirements and how metropolitan planning is adapting to fulfil those requirements It also discusses the possible future evolution of metropolitan planning especially in the light of new regional arrangements and devolution

Regional Development and Spatial Planning in an Enlarged European Union Neil Adams, 2016-04-01 The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders

Territory, Identity and Spatial Planning Mark Tewdwr-Jones, Philip Allmendinger, 2006-09-27 This book provides a multi disciplinary study of territory identity and space in a devolved UK through the lens of spatial planning It draws together leading internationally renowned researchers from a variety of disciplines to address the implications of

The European Dimension of British Planning Mark Tewdwr-Jones, Richard H. Williams, 2005-07-08 The UK government of Tony Blair is committed to fostering a European dimension of planning practice Significant developments in relation to planning within Europe are occurring The creation of the European Spatial Development Perspective the reform of the Structural Funds and the implementation of programmes to foster trans national co operation between governments will all impact on UK government and on planning system in particular Even within the UK devolution and regionalisation will bring new pressures for overall co ordination on the issue of European spatial planning Issues concerning the revisions of the Structural Funds in 2000 and 2006 and funding opportunities for local authorities are closely connected with the theme of this book More importantly it is expected that the link between funding and spatial policy within British planning will become more clearly defined during this period The European dimension of British planning as a consequence may grow significantly over the next few years The authors tackle four key issues in their discussion of this topic British political attitudes to Europeanisation issues The changing relationships between different arms of the state The often complex interdependencies between tiers of governance The rapidly changing definition of British urban and regional planning

early 1990s and provides an in depth and revealing assessment of both the Major and Blair governments terms of office The book will prove to be an invaluable guide to the British planning system today and the political demands on it Students and activists within urban and regional studies planning political science and government environmental studies urban and rural geography development surveying and planning will all find the book to be an essential companion to their work *Planning and Urban Change* Stephen Victor Ward,2004-03-08 Fully revised and thoroughly updated the Second Edition of *Planning and Urban Change* provides an accessible yet richly detailed account of British urban planning Stephen Ward demonstrates how urban planning can be understood through three categories ideas urban planning history as the development of theoretical approaches from radical and utopian beginnings to the new right thinking of the 1980s and recent interest in green thought and sustainability policies urban planning history as an intensely political process the text explains the complicated relation between planning theory and political practice and impacts urban planning history as the divergence of expectation and outcome each chapter shows how intended impacts have been modified by economic and social forces This Second Edition features an entirely new chapter on the key policy changes that have occurred under the Major and Blair governments together with a critical review of current policy trends *Institutions, Discourse, and Regional Development* Henrik Halkier,2006 Why are some regional development strategies adopted and others rejected Only limited systematic attention has been paid to the politics of regional policy including the role of institutions discourse and political debate in shaping this major area of public policy The book develops an institutionalist approach to the study of regional policy capable of spanning major European development paradigms and accounting for the dynamic relationship between organisations policies and political discourse This conceptual framework is then applied to the Scottish Development Agency a development body famed across Europe for its innovative policies but surrounded by political controversy in Scotland A detailed study of corporate strategies policy implementation and the wider British environment questions existing interpretations of the organisation which tend to vilify anti interventionist Thatcherites or glorify shrewd development professionals Instead the author proposes an alternative synthesis which highlights the interplay between institutions discourse and regional development in the politics of regional policy
