*A Discourse Analysis of Corruption* Blendi Kajsiu, 2016-03-16 Why did Albania enjoy some of the most successful anti corruption programs and institutions along with what appeared to be growing levels of corruption during the period 1998 2005 Looking at corruption through a post structuralist discourse analysis perspective this book argues that the dominant corruption discourse in Albania served primarily to institute the neoliberal order rather than eliminate corruption It did so in four interrelated ways First blaming every Albanian failure on corruption avoided a critical engagement with the existing neoliberal developmental model Second the dominant articulation of corruption as abuse of public office for private gain consigned it to the public sector transforming neoliberal policies of privatisation and expanding markets into anticorruption measures Third international anticorruption campaigns reproduced

an asymmetric relationship of dependency between Albania and the international institutions that monitored it by articulating corruption as internal to the Albanian condition Finally against corruption international and local actors could articulate a neoliberal order that was free of internal contradictions and fully compatible with democratization As a rare example of post structuralist discourse analysis of corruption this book can be useful for future research on discourses of corruption in other countries of the region and beyond Women, Civil Society and the Geopolitics of Democratization Denise M.
