geographers and historians with interests in migration mobility and cross cultural encounters *The Paradoxes of Japan's Cultural Identity* Roy Starrs, 2025-10-01 Japan is widely regarded as having a unique culture and a strong national identity Paradoxically however many basic elements of Japanese culture are not originally Japanese Since the beginning of its history Japan has been one of the world's major importers of foreign cultures Its culture was thoroughly hybrid long before that word became fashionable in contemporary global studies But this does not mean that Japan's culture lacks originality The Japanese have always made strikingly original contributions even improvements to whatever they imported Even more significantly the hybridity of their culture produced ongoing tensions that served as a kind of creative dynamo for Japanese writers artists and intellectuals This book explores the fundamental creative tension between the native and the foreign in many areas of Japanese culture from politics and religion to art and literature a tension also often interpreted as between tradition and modernity

Nationalism and Ethnic Conflict Berch Berberoglu, 2005-12-13 This book examines the origins and development of nationalism and national movements in the twentieth century and provides an analysis of the nature and dynamics of nationalism and ethnic conflict in a variety of national settings Examining the intricate relationship between class state and nation the book attempts to develop a critical approach to the study of nationalism and ethnonational conflict within the broader context of class relations and class struggles in the age of globalization The book consists of three parts made up of seven chapters Part I examines classical and contemporary conventional and Marxist theories of nationalism Part II provides a series of empirical comparisons of nationalism and ethnic conflict on a world scale focusing on the Third World the advanced capitalist countries and Eastern Europe and the former Soviet Union A highlight of this section of the book is a detailed comparative case study of the Palestinian and Kurdish nationalism and national movements Part III provides a political analysis of the relationship between class state and nation and lays out the class nature of nationalism and the role of the state in ethnonational conflicts that are the political manifestations of deeper class struggles that have been the driving force of nationalism and ethnic conflict in the era of globalization Berberoglu contends that future studies of nationalism and ethnonational conflict must pay closer attention to the dynamics of class forces that are behind the ideology of nationalism by examining national movements in class terms For only through a careful class analysis of these forces and their ideological edicts will we be able to clearly understand the nature of nationalism and ethnonational conflicts around the world

Post-Colonial Nations in Historical and Cultural Context Dmitri M. Bondarenko, 2023-05-30 Using historical and anthropological analysis in *Post Colonial Nations in Historical and Cultural Context* Dmitri M Bondarenko examines nation building in Tanzania Uganda and Zambia He examines the nation and state as concepts and how these are changing globally particularly in regard to the idea that the fundamental characteristic of a nation is a culturally homogeneous community This feature became a cornerstone of the concept of the nation at its formation in the West by the end of the eighteenth century but post colonial migration flows from the Global South to the Global North are increasing multi

culturalism in the North In contrast liberated states of Asia and Africa have been multi cultural from earlier on as they inherited the colonial borders in which typically many peoples were united Throughout the book Bondarenko argues that this history of multi culturalism is an advantage to development in the Global South and that it s necessary to depart from the classical Western concept of the nation to simultaneously support citizen unity while preserving cultural diversity

thorough revamp of the security and defense relationship with the US and alarmingly vigorous pursuit of Japan's acquisition of nuclear weapons

The Palgrave Handbook of Political Norms in Southeast Asia Gabriel Facal, Elsa Lafaye de Micheaux, Astrid Norén-Nilsson, 2024-06-07 This open access handbook aims to constitute a reference point on political norm dynamics in Southeast Asia by bringing together the array of normative repertoires that frame the possibilities for citizens to participate in set agendas for make decisions in and contest not only electoral and institutional politics but also informal and imaginary political spaces It sheds light on intersecting political and social transformations and their consequences from the vantage point of political norms While chapters lay out and analyse how political norms across Southeast Asia have been shaped in successive historical phases the core of the handbook addresses current dynamics involved in defining and transforming political norms

Asianisms Marc Frey, Nicola Spakowski, 2015-11-11 At the core of this book is a seemingly simple question What is Asia In search of common historical roots traditions and visions of political cultural integration first Japanese then Chinese Korean and Indian intellectuals

politicians and writers understood Asianisms as an umbrella for all conceptions imaginations and processes which emphasized commonalities or common interests among different Asian regions and nations This book investigates the multifarious discursive and material constructions of Asia within the region and in the West It reconstructs regional constellations intersections and relations in their national transnational and global contexts Moving far beyond the more well known Japanese Pan Asianism of the first half of the twentieth century the chapters investigate visions of Asia that have sought to provide common meanings and political projects in efforts to trace and construct Asia as a united and common space of interaction By tracing the imagination of civil society actors throughout Asia the volume leaves behind state centered approaches to regional integration and uncovers the richness and depth of complex identities within a large and culturally heterogeneous space

Federalism in Asia Baogang He, Brian Galligan, Takashi Inoguchi, 2009-01-01 This book is a collection of 13 articles which grew out of a workshop on federalism and democratisation in Asia But unlike a great many of the publications which have their origins in conferences this volume has a clear theme running through its contributions almost all of which are excellent The individual country studies are highly informative most making imaginative use of the country's history and current politics to illustrate the theme of the tension between nationalising centralisation and pressures for regional decentralisation Many of these chapters have innovative conclusions about ways in which this tension can be understood this is a serious book very well produced and indexed Its chapters are well written with useful notes and lists of references The volume will be of great interest to specialists on the countries concerned and has much to offer for anyone with an interest in federalism and the relationship between regionalism and democratisation Campbell Sharman The Australian Journal of Public Administration Federalism in Asia provides a valuable resource both for scholars of Asia in general and for political theorists of federalism In an academic climate where edited volumes are often assumed to be a lightweight option Federalism in Asia demonstrates how rewarding this form of publication can be Graham K Brown Political Studies Review Until now there have been few attempts to examine the different models of federalism appropriate in Asia let alone to trace the extent to which these different perspectives are compatible converging or mutually influencing each other This book redresses the balance by demonstrating the varieties of Asian federalism Federalism in Asia explores the range of theoretical perspectives that shape debates over federalism in general and over territorial multinational hybrid and asymmetric federalism in particular relation to Asia The contributors share their understanding of how federal or quasi federal institutions manage ethnic conflicts and accommodate differences how democratization facilitates the development of federalism and how federalism facilitates or inhibits democratization in Asia Their conclusion is that hybrid federalism or quasi federalism is more prevalent in some Asian countries than others and the need and potential for greater federalism in more Asian countries makes this sortie into this area worthwhile While federalism is relevant to Asia the working pattern of Asian federalism does not necessarily follow a Western style Hybrid federal institutional design can be seen as an Asian

strategy of managing ethnic conflicts through federal arrangements This unique book will be of great interest to a wide range of scholars and researchers who work on issues of federalism political economy public policy ethnic relations cultural diversity and democratization in the Asian region Policymakers and activists dealing with issues of minority rights and ethnic conflict in the region government officials and NGOs within Asia and officials in international agencies and organizations will also find much to engage them

Technology and Nationalism in India Rohit Chopra, 2008 This book examines the phenomenon of technocultural Hindu nationalism or the use of the internet by global Indian communities for the promotion of Hindu nationalist ideologies Since the introduction of Western science and technology under colonial rule in the eighteenth century science and technology have been used as instruments of transforming Indian society Scientific and technological expertise have been authorized as essential attributes of a modern Indian selfhood And the possessors of technological skills have historically been vested with the authority to speak for the nation The associations between technology and nationalism have condensed in ideas about self and other they have been incorporated in imaginings of the state and the nation and they have materialized as claims about identity community and society In the present historical moment this relationship manifests itself in one form as an online Hindu nationalism that combines cultural majoritarian claims with technological triumphalism Technocultural Hindu nationalism yokes together the core proposition of Hindu nationalist doctrine the idea that India is a Hindu nation and that religious minorities are outsiders to it with arguments about the imminent rise of Hindu India as a technological superpower in the global capitalist economy of the twenty first century Additionally while technocultural Hindu nationalism is obsessed with Western technology it also defines itself in strategic respects in opposition to Western civilization On Hindu nationalist websites this apparent paradox is resolved through the construction of a narrative where Hinduism is defined as the historical and philosophical foundation of global capitalist modernity itself and Hindus are presented as the natural heirs to that heritage This book locates these and other characteristics of Hindu nationalist identity politics in cyberspace with reference to the relationship between technology and nationalism in India from the period of British colonial rule in the mid eighteenth century to the present era of an economically and technologically interconnected world This book argues that technocultural Hindu nationalism needs to be understood in terms of the general dynamic of technology and nationalism with its continuities and discontinuities through the period of colonial rule till Indian independence in 1947 the period of Nehruvian nationalism with its emphasis on technological development in a socialist framework and the current post 1991 context following the liberalization of the Indian economy which accords pride of place to information technology and the internet This book also proposes that the particularities of technocultural Hindu nationalism need at the same time to be assessed with reference to the modalities of online communication Toward this end the book takes shape as an interdisciplinary endeavor combining qualitative and quantitative research methodologies and drawing on historical scholarship about South Asia social and cultural theory and
