Nations And Empires:

Nations and Empires Alan Palmer, 1974 Traces milestones in history from the Crimean War of 1854 to the publication of Sigmund Freud's treatise on dreams in 1900 **The Structure of Nations and Empires** Reinhold Niebuhr, 1959

Nations & Empires, 1969 This book is a collection of about 100 documents designed to act as an aid to study for sixth form college and university students who are covering European history from the seventeenth century to the present day. This collection of documents elaborates certain themes in the history of Europe since 1648. It has grown out of the working experience of a group of university teachers concerned to introduce first year university students to methods of historical study by reference to contemporary material. Each theme is an aspect of the basic process of European history in the modern era which is taken to be the continent and their readjustment to rising super powers on the oceanic and continental frontiers and to changing conditions in Africa and Asia. The varied attempts by European governments and statesmen to confront the political and social problems of a period of accelerating change are illustrated while further chapters provide the opportunity of studying in some depth two occasions when particularly important new ideas and expedients were tested: the French and Russian Revolutions. The backgrounds are considered not only from the point of view of international relations but also in wider and deeper perspectives. The varying character of the relationship between Europe and the wider world is the other principal theme of the collection. There are ten chapters each divided into sections. Each section contains one or more documents illustrating a particular topic. The editors have not aimed at comprehensive treatment of the period but rather have chosen to elaborate certain themes. These themes they believe to be extremely important ones which do provide at least one illuminating means of approaching recent European History. While all the documents in the collection should prove useful as illustrative material, most of them have been selected with particular reference to their usefulness as material for group discussions. It seems to the editors desirable that such material should direct discussion outwards to wide controversial issues and major themes in recent European History but at the same time make it possible for students to elucidate some detailed references and to gain the benefit of narrowing the focus of their attention at certain points. Whilst bearing these aims in mind, the editors have tried also to provide sufficient variety of material to make it possible for tutors to be flexible in their approaches: thus for example the problem of the New Imperialism could be studied with the aid of any one or all of four or five documents. In pursuit of these aims the editors have chosen documents from a wide variety of sources. Whilst including a few familiar documents, the collection generally avoids hackneyed material. Some of the choices are here translated into English for the first time. Front and back flaps of book jacket.

Alexander J. Motyl,1999 In this concise provocative and trenchant book Alexander J Motyl argues that social scientists must pay more rigorous attention to the formulation of concepts as they provide the basis for clear thinking good research and intelligent formulation of theories Focusing his conceptual explorations on three phenomena revolutions nations and nationalism and empires Motyl challenges the sloppy thinking that so often surrounds these three interrelated concepts and moves our understanding of them toward greater precision

the discourses and rhetoric of their rulers and defenders Kumar's writing is lively and free of jargon and his research is prodigious. He manages to bring clarity and perspective to a complex subject. Ronald Grigor Suny, author of *They Can Live in the Desert but Nowhere Else: A History of the Armenian Genocide*. A masterly piece of work. Anthony Pagden, author of *The Burdens of Empire: 1539 to the Present*. **A New Universal Gazetteer, Containing a Description of the Principal Nations, Empires, Kingdoms, States ...** Richard Brookes, 1843. Includes the population of the United States for 1830, a description of the various Indian tribes in North America. **Empires and Nations from the Eighteenth to the Twentieth Century** Antonello Biagini, 2014-08-11. This volume is the result of an international conference held at Sapienza University in Rome on June 20 and 21, 2013, as the final stage of the PRIN Progetto di rilevante interesse nazionale project *Empires and Nations from the 18th to the 20th century*, during which scholars from all over the world, academics, specialists, young researchers, PhD students, and post doctorates confronted diverse but connected topics on the relations between multinational empires and the idea of the nation. In this way, the reality of the historical empires and national states was represented, and concepts such as identity, nationality, and sovereignty analyzed. The second volume is dedicated to the age of empires and colonialism, with particular reference to the colonial policy of the Great Powers: England, Russia, and Italy; the reality of post-colonial states; and to the different patterns of decolonization, including specific cases such as South Sudan, Azerbaijan, Iraq, Afghanistan, and Palestine. Particular attention is paid to the economic systems of different countries and to the area of Southeastern Europe, particularly to Romania and its multicultural area, Transylvania. To the Great War and the dissolution of the multinational empires, ample space is dedicated, providing insights on border issues, ethnic conflicts, foreign policies, the Adriatic question, and the territorial conflict between Yugoslavia and Italy. The final part of the book analyzes communism, the bipolar system, and the East-West conflict that divided Europe for almost half a century, with specific contributions that discuss post-communist nations and states. **Civilization & Violence** Imbesat Daudi, MD, PhD, FACS, 2014-03-05. Is Islamic civilization violent? Many in the West believe that Islam and Muslims are indeed violent. In the Muslim world, this question itself implies Western prejudice. The answer can only be achieved by comparing various parameters of the violence of civilizations. In this book, violent conflicts of various civilizations of the last two centuries have been quantified, compared, and analyzed through well-established scientific principles and presented in layman's terms.

Uncovering the Treasures of the Apocalypse David L. Mathewson, 2022-07-15. The book of Revelation continues to baffle and confound present-day readers. Its strange imagery and the bewildering number of interpretations of the book have left most readers paralyzed with fear. What is needed is a book that introduces the reader to the most important keys to keep in mind when interpreting the last book of the Bible. This book provides just that: it offers, explains, and illustrates five of the most crucial keys for unlocking the message of the Apocalypse. These keys grow directly out of the kind of book Revelation is and reads it as the word of God for the church. It leads the reader to take Revelation seriously as a message first addressed to

seven historical churches in the first century before reading it as the word of God for today These five keys can instill greater confidence in understanding the book that has always been out of the reach of most readers *A New Universal Gazetteer, Containing a Descripton of the Principal Nations, Empires, Kingdoms, States ...* Richard Brookes,1832 *Imperial Ends* Alexander J. Motyl,2001-08-01 Despite their historical importance empires have received scant attention from social scientists Now Alexander J Motyl examines the structure dynamics and continuing relevance of empire and asks Why do empires decline Why do some empires collapse And why do some collapsed empires revive Rejecting choice centered theories of imperial decline Motyl maintains that the very structure of empires promotes decay and that decay in turn facilitates the progressive loss of territory Although most major empires have in fact declined in this manner some such as the Soviet Union have collapsed suddenly and comprehensively Motyl explains how and why collapse occurs why such an outcome is hard to foresee and why some collapsed empires revive While broad ranging historically and empirically *Imperial Ends* focuses on five modern empires the Soviet Romanov Ottoman Habsburg and Wilhelmine Examining the possibility of a revival of the Soviet empire Motyl points out that the expansion of NATO and the European Union along with increasing globalization will isolate Russia and its neighbors promoting their dependence upon one another and perhaps facilitating the rise of the former core With boldly stated conclusions and concise analytical interpretations *Imperial Ends* cohesively illustrates to policymakers and social scientists alike the importance of possible imperial revivals and the rise of future empires *The First World War* William Kelleher Storey,2020-12-07 In a compact but comprehensive and clear narrative this book explores the First World War from a genuinely global perspective Putting a human face on the war William Kelleher Storey takes into account individual decisions and experiences as well as environmental and technological factors such as food geography manpower and weapons *Civilization and Beyond* Scott Nearing,2019-12-17 In *Civilization and Beyond* Scott Nearing presents a thought provoking examination of societal development critiquing modern civilization s foundational structures and advocating for an alternative path towards a sustainable and equitable world Through a blend of historical analysis and philosophical inquiry Nearing employs a clear yet compelling literary style that invites readers to question both the achievements and failures of contemporary society His engagement with themes such as economic justice ecological balance and social ethics situates the book within the Progressive Era s broader movements for reform and deliberate change Scott Nearing a prominent social activist and economist was deeply influenced by his experiences in the early 20th century a time marked by rampant social inequality and ecological exploitation His commitment to radical politics and sustainable living shaped by both personal conviction and an academic background in economics underpins the profound arguments presented in this work Nearing s life long dedication to advocating for the rural and working class communities lends an authenticity to his critique making his insights not just theoretical but deeply rooted in lived experiences *Civilization and Beyond* is essential reading for anyone interested in the intricacies of social change sustainability and the ethical

dimensions of progress It challenges the reader to reconsider established norms and inspires a vision for a healthier more just society Nearing s extensive research combined with poignant prose makes this book a significant addition to the discourse on civilization s trajectory
