Couloumbis, Theodore C. Kariotis, 2013-01-11 This collective study examines the transformation metamorphosis that Greece has experienced over the course of the 20th century by exploring its gradual evolution into a consolidated democracy an advanced economy in the Eurozone and a balanced partner in the EU and NATO promoting a stabilizing role in southeastern Europe The book examines the variables contributing to the profiling of contemporary Greece emphasizing the conceptual inertia bedeviling the studies of Greece in recent years by focusing on the elements that indicated the slow pace in the country's modernization In conclusion there is a need for Greece's constant

commitment to functional adjustments regarding the country's economic, political and strategic priorities in order to promote effectively the role of regional stabilizer acting in concert with NATO and EU partners      Conflict and Security in the Former Soviet Union Maria Raquel Freire, 2018-01-17 Title first published in 2003 Conflict and Security in the Former Soviet Union examines the Organization for Security and Co-operation in Europe OSCE's approach to post Cold War tensions and conflicts in the former Soviet area the extent to which the new procedures mechanisms and instruments developed by the organization are useful and how the OSCE's activities may reveal innovative contributions to conflict studies      **Current Topics in Astrofundamental Physics: The Cosmic Microwave Background** Norma G. Sánchez, 2001-03-31 The book presents the fundamental physics underlying our increased understanding of the early universe the cosmic microwave background large scale structure formation the dark matter problem and the interplay between them focusing on the cosmic microwave background There is an emphasis on the mutual impact of fundamental physics and cosmology both at theoretical and experimental observational levels within a deep and well defined programme that additionally provides a careful interdisciplinarity Special sections cover fractals and scaling laws in astrophysics and cosmology and high energy and neutrino astrophysics The nature of the domain demands different approaches and points of view either complementary or contradictory Readers are provided with the basics of the different competitive lines of research affording them an excellent opportunity to learn about the real state of the disciplines and increasing their critical awareness Readership Experimental and theoretical physicists astrophysicists and astronomers from a variety of backgrounds An excellent reference for the young postdoctoral scientist Also useful for advanced undergraduate students and senior scientists      *NATO's Gamble* Dag Henriksen, 2013-11-15 Selected for the 2008 Royal Air Force Reading List In this revealing work Dag Henriksen discloses the origins and content of NATO's strategic and conceptual thinking on how the use of force was to succeed politically in altering the behavior of the Federal Republic of Yugoslavia FRY The air campaign known as Operation Allied Force was the first war against any sovereign nation in the history of NATO and the first major combat operation conducted for humanitarian purposes against a state committing atrocities within its own borders This book examines the key political diplomatic and military processes that shaped NATO and U.S. management of the Kosovo crisis and shows how air power became the main instrument in their strategy to coerce the FRY to accede to NATO's demands The book further shows that the military leaders set to execute the campaign had no clear strategic guidance on what the operation was to achieve and that the level of uncertainty was so high that the officers selecting the bombing targets watched NATO's military spokesman on CNN for guidance in choosing their targets Henriksen argues that structures preceding the Kosovo crisis shaped the management to a much greater degree than events taking place in Kosovo and that the air power community's largely institutionalized focus on high intensity conflicts like the 1991 Gulf War hampered them from developing strategies to fit the political complexities of crises Because fighting and wars in the lower end of the intensity spectrum are likely to surface again study of the Kosovo

crisis offers lessons for future international conflicts in which the combination of force and diplomacy will play a very significant role      *The Czech Republic* Rick Fawn,2004-08-02 Czechoslovakia has captured the nation's imagination throughout the twentieth century The Allied betrayal of the country to Nazi Germany in 1938 was to demonstrate the appalling consequences of naive appeasement of aggression The wholesale reform of Soviet communism in the Prague Spring of 1968 won western support and sympathy when it was crushed by Warsaw Pact tanks The fierce communist regime thereafter was brought down almost magically in 1989 Czechoslovakia added to the international political vocabulary the term Velvet Revolution and the velvet metaphor has characterised much of the country's path breaking postcommunist transformation and its peaceful break up in 1993 In separate chapters on history politics economics foreign relations and the new Czech identity this book not only applauds the successes of the Czech Republic since 1993 but also uncovers the frayed edges of the velvet nation      **The NATO Handbook** NATO,1998      *International Institutional Law* Henry G.

Schermers,Niels M. Blokker,2021-11-15 This book offers a comparative analysis of the institutional law of public international organizations covering issues such as membership institutional structure decisions and decision making legal status privileges and immunities It has been designed to appeal to both academics and practitioners      **Multi-problem Violent Youth** Raymond R. Corrado,2002 Annotation In the first product of an Advanced Research Workshop held in Cracow Poland from August to September 2000 criminologists psychologists and other professionals cover risk factors assessment issues selected legal and management issues and a conceptual framework for the risk needs management instrument The workshop considered the development of a procedure for assessing risk and needs factors for serious antisocial behavior especially violence by children and adolescents that procedure is intended to become the basis of ongoing international collaborative research projects There is no subject index Annotation c 2003 Book News Inc Portland OR booknews.com

The NATO Handbook North Atlantic Treaty Organization,1998      **Extending the European Security Community** Emilian Kavalski,2008-03-30 The region of the Balkans has become one of the emblematic features of the post Cold War geography of international relations Understanding the extension of the European zone of peace to the Balkans is at the heart of this pioneering work into the post Cold War socialisation of the region How is peace i.e. a security community order initiated in the Balkans Who are the dominant agents of such peace promotion What processes suggest the initiation of lasting peace in the Balkans Under what circumstances do regional states comply with international standards Looking at the order promoting processes of both the EU and Nato Emilian Kavalski offers us the first detailed and theoretically informed comparative analysis of the role played by external actors in the Balkan region as a whole In doing so he provides us with an insight into the processes of peace promotion in general and the patterns of security community building in the Balkans in particular      **Canada World View** ,1999
