Natural Affairs A Botanist Looks At The Attachments Between Plants And People:

Natural Affairs Peter Bernhardt, 1993 The botanist author of *Wily Violets* and *Underground Orchids* explores the relationships between people and plants documenting the life cycles of some unusual plants as well as the individuals and societies who have become fascinated with them *The Rose's Kiss* Peter Bernhardt, 2002-04-15 In *The Rose's Kiss* botanist Peter Bernhardt rekindles our sense of wonder at the plant life all around us He presents a fascinating and wide ranging look at the natural history of flowers their forms and functions as well as their hidden interactions with the surrounding environment and the other living organisms upon which they depend for survival *The Rose's Kiss* will hold wide appeal for nature lovers garden enthusiasts and anyone interested in learning more about the inner workings of the natural world

Letters from the Hive Stephen Buchmann, Banning Repplier, 2006-05-30 They work hard are devoted to family love sex and know the importance of a good piece of real estate Honey bees and the daily workings of their close knit colonies are one of nature's great miracles And they produce one of nature's greatest edible bounties honey More than just a palate pleaser honey was once an offering to the gods a preservative and a medicine whose sought after curative powers were detailed in ancient texts and are being rediscovered by modern medical science In *Letters from the Hive* Prof Stephen Buchmann takes us into the hive nursery honey factory queen's inner sanctum and out to the world of backyard gardens open fields and deserts in full bloom where the age old sexual dance between flowers and bees makes life on earth as we know it possible Hailed for their hard work harmonious society and mistakenly for their celibacy bees have a link to our species that goes beyond biology In *Letters from the Hive* Buchmann explores the fascinating role of bees in human culture and mythology following the honey hunters of native cultures in Malaysia the Himalayas and the Australian Outback as they risk life and limb to locate a treasure as valuable as any gold To contemplate a world without bees is to imagine a desolate place culturally and biologically and Buchmann shows how with each acre of land sacrificed to plow parking lot or shopping mall we inch closer to what could become a chilling reality He also offers honey based recipes cooking tips and home remedies further evidence of the gifts these creatures have bestowed on us Told with wit wisdom and affection and rich with anecdote and science *Letters from the Hive* is nature writing at its best This is natural history to be treasured a sweet tribute that buzzes with life *Encyclopedia of Cultivated Plants* Christopher Cumo, 2013-04-25 Readers of this expansive three volume encyclopedia will gain scientific sociological and demographic insight into the complex relationship between plants and humans across history Comprising three volumes and approximately half a million words this work is likely the most comprehensive reference of its kind providing detailed information not only about specific plants and food crops such as barley corn potato rice and wheat but also interdisciplinary content that draws on the natural sciences social sciences and humanities The entries underscore the fascination that humans have long held for plants identifies the myriad reasons why much of life on earth would be impossible without plants and points out the intertwined relationship of plants and humans

and how delicate this balance can be While the majority of the content is dedicated to the food plants that are essential to human existence material on ornamentals fiber crops pharmacological plants and carnivorous plants is also included

Bizarre Botanicals Paula Gross,Larry Mellichamp,2010-10-13 Gardeners love tulips lilies and pansies the common but beautiful plants found in the average garden But there are realms in the plant world far beyond these familiar favorites In Bizarre Botanicals plant experts Larry Mellichamp and Paula Gross take readers on a curious botanical journey of weirdly wonderful plants that can be grown at home Bizarre Botanicals features over 75 astonishing plants that have extraordinary abilities from pyrotechnic spores that can burst into flame when ignited to flowers that lure insects to their deaths Each plant profile includes essential care and cultivation information A difficulty scale alerts gardeners to how easy or difficult it is to grow the plant at home There s no reason to forsake lilies and petunias But after reading Bizarre Botanicals gardeners will want to take a walk on the weird side and try a few of these peculiar plants for themselves Wily Violets and Underground Orchids Peter Bernhardt,2003-05-17 In this book Peter Bernhardt takes us on a grand tour of the botanical realm weaving engaging descriptions of the lovely shapes and intriguing habits of flowering plants with considerations of broader questions such as why there are only six basic shapes of flowers and why the orchid family is so numerous and so bizarre Everyone from amateur naturalists and gardeners to plant scientists will find Wily Violets and Underground Orchids a lively guide to botanical lore Nectar and Ambrosia Tamra Andrews,2000-10-26 A publishing first Nectar and Ambrosia presents an encyclopedic treatment of the magic properties and uses of food by mortals and immortals alike from the pages of myth and legend Now for the first time the magic properties and uses of food by both mortals and immortals as represented in the world s myths and legends are brought together and explained in Nectar and Ambrosia This A Z volume is filled with an abundance of exotic lore and legend A Marriage of Philosophy and Music Erich Welling,2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art *The Anther* William G. D'Arcy,1996-03-07 Publisher Description **Public Garden Management:**

a Global Perspective BIJAN DEHGAN, 2014-04-15 Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing managing and maintaining one Although suitable as a textbook its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden a fact reflected in the extensive reference citations The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he she was in a natural but well ordered garden environment Thus began the art of garden making Many volumes have been written on every applicable subject discussed in this and similar publications Indeed the voluminous literature on history design horticulture and numerous related subjects is nothing short of overwhelming Accordingly anyone involved in management of public gardens whether as a director or area supervisor and irrespective of the type and size of such facility would have to have familiarity with various aspects of garden organization and administration However despite the enormous number and diversity of such publications there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book These volumes provide the essential background information on plants animals management maintenance fundraising and finances as well as history art design education and conservation They also cover a host of interrelated subjects and responsible organization of such activities as creating a childrens garden horticultural therapy conservatories zoological gardens and parks hence administration of multidimensional public gardens Nearly 500 full color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management The 15 chapters begin with the need for public gardens types of public gardens historical backgrounds as well as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival Visitors of zoological gardens expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the publics desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San

Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles involved in public garden management it does not claim to be a substitute for broader familiarity Gods and Goddesses in the Garden Peter Bernhardt,2008-03-11 Zeus Medusa Hercules Aphrodite Did you know that these and other dynamic deities heroes and monsters of Greek and Roman mythology live on in the names of trees and flowers Some grow in your local woodlands or right in your own backyard garden In this delightful book botanist Peter Bernhardt reveals the rich history and mythology that underlie the origins of many scientific plant names Unlike other books about botanical taxonomy that take the form of heavy and intimidating lexicons Bernhardt s account comes together in a series of interlocking stories Each chapter opens with a short version of a classical myth then links the tale to plant names showing how each plant resembles its mythological counterpart with regard to its history anatomy life cycle and conservation You will learn for example that as our garden acanthus wears nasty spines along its leaf margins it is named for the nymph who scratched the face of Apollo The shape shifting god Proteus gives his name to a whole family of shrubs and trees that produce colorful flowering branches in an astonishing number of sizes and shapes Amateur and professional gardeners high school teachers and professors of biology botanists and conservationists alike will appreciate this book s entertaining and informative entry to the otherwise daunting field of botanical names Engaging witty and memorable *Gods and Goddesses in the Garden* transcends the genre of natural history and makes taxonomy a topic equally at home in the classroom and at cocktail parties *Bibliography of Agriculture with Subject Index* ,1993-10 **The Carrot Purple and Other Curious Stories of the Food We Eat** Joel S. Denker,2015-10-01 How many otherwise well educated readers know that the familiar orange carrot was once a novelty It is a little more than 400 years old Domesticated in Afghanistan in 900 AD the purple carrot in fact was the dominant variety until Dutch gardeners bred the young upstart in the seventeenth century After surveying paintings from this era in the Louvre and other museums Dutch agronomist Otto Banga discovered this stunning transformation The story of the carrot is just one of the hidden tales this book recounts Through portraits of a wide range of foods we eat and love from artichokes to strawberries *The Carrot Purple* traces the path of foods from obscurity to familiarity Joel Denker explores how these edible plants were in diverse settings invested with new meaning They acquired not only culinary significance but also ceremonial medicinal and economic importance Foods were variously savored revered and reviled This entertaining history will enhance the reader s appreciation of a wide array of foods we take for granted From the carrot to the cabbage from cinnamon to coffee from the peanut to the pistachio the plants beans nuts and spices we eat have little known stories that are unearthed and served here with relish Food and World Culture Linda S. Watts,Kelty Clark-Mahoney,2022-08-23 This book uses food as a lens through which to explore important matters of society and culture In exploring why and how people eat around the globe the text focuses on issues of health conflict struggle contest inequality and power Whether because of its necessity

pleasure or ubiquity the world of food and its lore proves endlessly fascinating to most people The story of food is a narrative filled with both human striving and human suffering However many of today s diners are only dimly aware of the human price exacted for that comforting distance from the lived world realities of food justice struggles With attention to food issues ranging from local farming practices to global supply chains this book examines how food s history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization such as colonization conquest enslavement and oppression The main text is structured alphabetically around a set of 70 ingredients from almonds to yeast Each ingredient s story is accompanied by recipes Along with the food profiles the encyclopedia features sidebars These are short discussions of topics of interest related to food including automats diners victory gardens and food at world s fairs This project also brings a social justice perspective to its content weighing debates concerning food access equity insecurity and politics *New York Times Saturday Book Review Supplement* ,1993-04 Exercises in Herb Science Lyle E. Craker,Kara M. Dinda,1998 **Science, Technology & Society** ,1996 **The Library Journal** ,1993 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **Science, Technology and Society** ,1996 **Riverside Quarterly** ,1993
