Fifty Ways to Achieve Excellence in Education Jerry D. Lamb, Dr Jerry D. Lamb, 2009-04 Effective instruction begins with effective relationships and this is particularly true in respect to educators who work with students coming from different cultural backgrounds While there are a great number of programs that will instruct you on how to effectively teach few share good ways to connect motivate and inspire students to succeed regardless of the various personal and societal challenges that they might face This book will introduce a series of ways to open the doors of dialogue and connection which is the basis from which students begin to believe in others and then in themselves You will discover that many students in order to be inspired by you have to believe and trust in you first Once they feel that you can be trusted as their leader they will empower you to become an effective leader In return you can empower them to believe in themselves by creating an environment that trains the mind to be constructive and optimistic For you success must be a mindset because the mind is the tool that each student will have to exercise to engineer and navigate his or her life Your role must be that of an architect in which you help each student design a blueprint of success This process can be a considerably lengthy journey and a formidable task This is however what leading educators will face if they are committed to positively affecting the lives of children and indirectly the community and the world one student at a time Make no mistake about it one person can make a difference and as an educator you are in the unique position to become a great person of influence Are you ready *Contemporary Metaethics* Alexander Miller, 2014-02-27 This new edition of Alexander Miller s highly readable introduction to contemporary metaethics provides a critical overview of the main arguments and themes in twentieth and twenty first century contemporary metaethics Miller traces the development of contemporary debates in metaethics from their beginnings in the work of G E Moore up to the most recent arguments between naturalism and non naturalism cognitivism and non cognitivism From Moore s attack on ethical naturalism A J Ayer s emotivism and Simon Blackburn s quasi realism to anti realist and best opinion accounts of moral truth and the non reductionist naturalism of the Cornell realists this book addresses all the key

theories and ideas in this field As well as revisiting the whole terrain with revised and updated guides to further reading Miller also introduces major new sections on the revolutionary fictionalism of Richard Joyce and the hermeneutic fictionalism of Mark Kalderon The new edition will continue to be essential reading for students teachers and professional philosophers with an interest in contemporary metaethics
