A Garden on the Edge Lorin Knapp, 2013-05-31 Daily life for most of us particularly Americans frequently achieves a pace that becomes busy to the point of being harried As one activity spins into another each day distinguishes itself little from any other day In a like manner our immediate surroundings of buildings products or media set a uniform scene for our lives Meanwhile the sameness spreads from one place to another relentlessly leaving cities and suburbs where once could be found bucolic countryside native landscape and wildlife habitat Many people seek an escape That escape need not be far away It can be as close as a home garden particularly one based upon a natural design that belongs where it is located Particularly well suited to providing an escape from the mundane is a garden filled with native plants that belong in the general area of the site and that are chosen to specifically fit the conditions of the site By being within such a garden the authenticity of its site lets both people and wildlife know that they are home A garden that provides such authenticity finds itself resting gently on the land gracing the site with a natural style that belongs That garden breaks away from some of the conventions of design promoted by various media and the horticulture industry that intend first to sell profitably produced plants and landscaping material across the nation Media promoted gardening styles including the plants in them besides intended for use just about anywhere come in and out of fashion and use One years set of must have plants and landscaping materials promoted by the media replaces another in succession Meanwhile the horticultural industry naturally in pursuit of as much business as possible touts varieties of plants

for garden use that are adaptable to as wide an area as possible As a result similar looking gardens or at least the plants in them appear across the country and even around the world often out of context of the area in which the garden grows Having the latest plants and garden style at a minimum provides a point of conversation for the gardener and visitors to the garden even if much the same plants and landscaping appear across town or across the continent Just as uniformity in garden styles and ubiquitous plants seem nearly to overtake suburban and urban areas a movement to landscape with native plants has begun to gain acceptance Any gardener can be a part of this The effort to include native plants reflects a desire by some gardeners and landscapers to create a garden anchored with a sense of the place that includes the garden This new direction may be happening just in time More and more native habitats disappear leaving fewer places for the native plants that lived there not to mention the wildlife that joins them Both native plants and wildlife need new places in which to live Home gardens that incorporate places for native plants and wildlife may be those sanctuaries All gardeners are in fact gardening on the edge of an era in which widely dispersed cultivated gardens may be the key in continuing the existence of some plants and maybe even some of the other living things that go with them In order to show an example of how a new garden style incorporating native plants can be done in nearly every garden the story of the evolution of the gardens at Windflower Grove has been used for illustration Growing on the tallgrass prairie of central Iowa along a woodland edge the gardens continue to be the authors own life work which continues on as it has for over sixty years Many specific methods proven in the gardens to work for growing native plants are shared in order to make inclusion of native plants a little easier for others Gardening with inclusion of native plants and encouragement of wildlife gradually evolved over the years at Windflower Grove into a garden style that can be described as heritage habitat gardening Specific rules of the style are few and flexible in o The Ultimate Wildlife Habitat Garden Stacy Tornio,2024-02-06 The Ultimate Wildlife Habitat Garden helps you become more intentional about attracting birds bees and more to the garden you can build a beautiful garden for all seasons while simultaneously striving to support wildlife Horticulture The Ultimate Wildlife Habitat Garden is a beginner friendly handbook that helps homeowners create a beautiful garden that attracts birds bees butterflies and more Everyone wants a garden buzzing with life and Stacy Tornio makes it easy by sharing details about which plants attract specific creatures Stacy Tornio makes it easy to attract birds bees and butterflies to your home garden by sharing details about which plants attract specific creatures The simple organization makes it easy to find exactly what you want with chapters on attracting birds bringing in bees butterflies and welcoming wildlife If you are looking to build a garden from scratch there are ten plans with specific plant choices The plans include a hummingbird garden a birdseed garden and options that are low maintenance and drought resistant You ll also find expert advice on finding the right feeder avoiding pesticides and choosing native plants The Ultimate Wildlife Habitat Garden is a beautiful photo filled guide that will help you grow the earth friendly garden of your dreams The Green Garden Ellen Sousa,2011 This practical comprehensive and inspirational guidebook for New

Wildlife-Friendly Gardens Gertrude Harris, In an age of expanding cities and shrinking wild spaces our gardens have become more important than ever These patches of green whether sprawling backyards cozy courtyards or even balcony planters have the potential to support an incredible variety of life A wildlife friendly garden isn't just a beautiful retreat for us it's a sanctuary for the birds insects mammals and other creatures that are essential to the health of our environment Wildlife plays a vital role in maintaining the balance of nature Birds help control pests Pollinators like bees and butterflies are responsible for the reproduction of countless plant species including many of the fruits and vegetables we eat Frogs and hedgehogs keep slug populations in check while bats quietly go about reducing mosquitoes at dusk When we invite these creatures into our gardens we're not only creating a dynamic and lively outdoor space we're taking part in a much larger ecological process Unfortunately modern landscaping practices often work against these natural allies Lawns that are regularly mowed and treated with chemicals offer little in the way of food or shelter Ornamental plants especially non natives

may look appealing but can lack the nectar seeds or nesting material wildlife depend on By contrast a thoughtfully designed wildlife friendly garden embraces diversity encourages natural processes and shifts the focus from strict control to thoughtful collaboration with nature The good news is that transforming any garden into a wildlife haven doesn't require a complete overhaul Simple intentional choices planting native species adding a water source leaving a pile of brush or logs in a corner can have a profound impact Every garden no matter how small has the potential to become a stepping stone in the fragmented landscape offering food shelter and breeding space for creatures who might otherwise struggle to survive Perhaps most importantly wildlife friendly gardening reconnects us to the natural world Watching birds build a nest bees dance between blooms or frogs emerge after a summer rain deepens our sense of wonder and our responsibility as caretakers of the earth These daily interactions serve as quiet powerful reminders that we are part of something much greater than ourselves

The California Landscape Garden Mark Francis, Andreas Reimann, 1999-01-01 The beauty resources and natural processes of the California landscape are brought to the home garden in this fine testament to ecological gardening culture and design 117 illustrations 30 in color 4 site plans 6 tables

The Garden Primer Barbara Damrosch, 2008-01-01 Offers advice on buying and growing different kinds of plants with an emphasis on the use of native plant species and the techniques of organic gardening

Going Native Janet Marinelli, Brooklyn Botanic Garden, 1994 In this book the authors suggest that landscape maintenance could be reduced in a bid to help recreate the natural diversity of plants in the garden It offers extensive advice on ways to make use of trees wildflowers grasses and ferns
