Charles Morris and the Criticism of Discourse Richard A. Fiordo, 1977

Charles S. Peirce, 1839–1914 Gérard Deledalle, 1990-01-01 This work is the intellectual biography of the greatest of American philosophers Peirce was not only a pioneer in logic and the creator of a philosophical movement pragmatism he also

proposed a phenomenological theory quite different from that of Husserl but equal in profundity and long before Saussure and in a totally different spirit a semiotic theory whose present interest owes nothing to passing fashion and everything to its fecundity Throughout his life Peirce wrote continually about sign and phenomenon or phaneron Consequently his writings must be studied chronologically if they are not to appear incomprehensible or contradictory One of the merits of this book is to clarify Peirce's thought by analysing its development chronologically We follow the evolution of Peirce's thought from his critique of Kantian logic and Cartesianism Chap I Leaving the Cave 1851 1870 to his discovery of modern logic and pragmatism Chap II The Eclipse of the Sun 1870 1887 and finally to a semiotic founded on a phenomenology the base of which is the logic of relations and the crowning point scientific metaphysics Chap III The Sun Set Free 1887 1914 The book includes a detailed chronology a general bibliography and an index

Economic Writings Otto Neurath, 2006-03-03 This book makes available for the first time in English a substantial part of Otto Neurath's economic writings The essays and small monographs translated here extend from his student years to his last ever finished piece They chart not only Neurath's varied interests in the economic history of antiquity in war economics and schemes for the socialisation of peacetime economies in the theory of welfare measures and social indicators and in issues of the theory of collective choice but also show his philosophical interests emerging in his contributions to seminal debates of the German Social Policy Association This volume shows that Neurath's important contributions to the socialist calculation debate are but one aspect of a many-sided and original oeuvre The translations are preceded by an introductory essay by one of the editors which contextualises the selections by locating them in the various debates of the time that provided their original setting This book is of interest to economists philosophers of social science and of economics as well as to historians of philosophy of science and of analytic philosophy

Shook,2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history The Standard ,1942 **The Cambridge Companion to Logical Empiricism** Alan Richardson,Thomas Uebel,2007-09-03 If there is a movement or school that epitomizes analytic philosophy in the middle of the twentieth century it is logical empiricism Logical empiricists created a scientifically and technically informed philosophy of science established mathematical logic as a topic in and tool for philosophy and initiated the project of formal semantics Accounts of analytic philosophy written in the middle of the twentieth century gave logical empiricism a central place in the project The second wave of interpretative accounts was constructed to show how philosophy should progress or had progressed beyond logical empiricism The essays survey the formative stages of logical empiricism in central Europe and its acculturation in North America discussing its main topics and achievements and failures in different areas of philosophy of science and assessing its influence on philosophy past present and future **The Ethical Outlook** ,1942 **Classics of Semiotics** Martin Krampen,Klaus Oehler,Roland Posner,Thomas A. Sebeok,Thure von Uexküll,2013-06-29 This book is designed to usher the reader into the realm of semiotic studies It analyzes the most important approaches to semiotics as they have developed over the last hundred years out of philosophy

linguistics psychology and biology As a science of sign processes semiotics investigates all types of communication and information exchange among human beings animals plants internal systems of organisms and machines Thus it encompasses most of the subject areas of the arts and the social sciences as well as those of biology and medicine Semiotic inquiry into the conditions functions and structures of sign processes is older than any scientific discipline As a result it is able to make the underlying unity of these disciplines apparent once again without impairing their function as specializations Semiotics is above all research into the theoretical foundations of sign oriented disciplines that is it is General Semiotics Under the name of Zei chenlehre it has been pursued in the German speaking countries since the age of the Enlightenment During the nineteenth century the systematic inquiry into the functioning of signs was superseded by historical investigations into the origins of signs This opposition was overcome in the first half of the twentieth century by American Semiotics as well as by various directions of European structuralism working in the tradition of Semiology Present day General Semiotics builds on all these developments

The Humanistic Background of Science Philipp Frank, 2021-10-01 Philipp Frank 1884 1966 was an influential philosopher of science public intellectual and Harvard educator whose last book The Humanistic Background of Science is finally available Never published in his lifetime this original manuscript has been edited and introduced to highlight Frank's remarkable but little known insights about the nature of modern science insights that rival those of Karl Popper and Frank's colleagues Thomas Kuhn and James Bryant Conant As a leading exponent of logical empiricism and a member of the famous Vienna Circle Frank intended his book to provide an accessible engaging introduction to the philosophy of science and its cultural significance The book is steadfastly true to science to aspirations of peace unity and human flourishing after World War II and to the pragmatic philosophies of Charles S Peirce William James and John Dewey that Frank embraced in his new American home Amidst the many recent surveys and retrospective analyses of midcentury philosophy of science The Humanistic Background of Science offers an original first hand view of Frank's post European life and of intellectual dramas then unfolding in Chicago New York City and Boston

Becoming Mead Daniel R. Huebner, 2014-10-09 This study contributes to the sociology of knowledge and the history of the human sciences by tracing the complex social action processes through which knowledge is produced about a major classical author George Herbert Mead The case raises acute questions regarding how authoritative knowledge comes to be produced about an intellectual and about the social nature of knowledge production in academic scholarship
