Peasants Merchants And Markets:

Peasants, Merchants, and Markets James Masschaele, 1997 *Peasants Merchants and Markets* deals with the development of regional networks of trade and social interaction in the two centuries before the Black Death a period which saw dynamic changes in relations between towns and their rural hinterlands By examining the economic interests of urban merchants and peasant traders the commodities they exchanged and the markets and transportation networks they used to engage in trade the book explores how commerce helped to erode the localism of medieval society and to create enduring institutions and motivations for a more expansive social and economic life The book offers original interpretations and original use of historical source material and will be of interest to scholars and students of medieval and English history as well as historians dealing with commercial development in other periods and places *Peasants and historians* Phillipp Schofield, 2016-09-01 *Peasants and historians* is an examination of historical discussion of the medieval English peasantry In this book the first such study of its kind the author traces the development of historical research aimed at exploring the nature of peasant society In separate chapters the author examines the three main defining themes which have been applied to the medieval economy in general including change affecting the medieval peasantry In subsequent chapters debates in relation to demography family structure women in rural society and the nature of village community are each considered in turn A final chapter on peasant culture also suggests areas of development and potentially at least future directions in research and writing Offering an informed grounding in the main areas of historical writing in this area it will be of interest to researchers as well as to those coming new to the topic including undergraduate and postgraduate students *Shaping Medieval Markets* Jessica Dijkman, 2011-08-11 The late Middle Ages witnessed the transformation of the county of Holland from a peripheral agrarian region to a highly commercialised and urbanised one This book examines how the organisation of commodity markets contributed to this remarkable development Comparing Holland to England and Flanders the book shows that Holland's specific history of reclamation and settlement had given rise to a favourable balance of powers between state nobility towns and rural communities that reduced opportunities for rent seeking and favoured the rise of efficient markets This allowed burghers peasants and fishermen to take full advantage of new opportunities presented by changing economic and ecological circumstances in the late fourteenth and early fifteenth centuries *Money, Markets and Trade in Late Medieval Europe* Lawrin Armstrong, Martin M. Elbl, Ivana Elbl, Lawrin David Armstrong, 2007 The volume explores late medieval market mechanisms and associated institutional fiscal and monetary organizational decision making legal and ethical issues as well as selected aspects of production consumption and market integration The essays span a variety of local regional and long distance markets and networks *People, Power and Identity in the Late Middle Ages* Gwilym Dodd, Helen Lacey, Anthony Musson, 2021-07-12 This collection of ground breaking essays celebrates Mark Ormrod's wide ranging influence over several generations of scholars The seventeen chapters in this collection focus primarily on the fourteenth and

fifteenth centuries and are grouped thematically on governance and political resistance culture religion and identity

Markets, Trade and Economic Development in England and Europe, 1050-1550 Richard Britnell, 2023-05-31 England's economy between 1050 and 1550 mirrored that of much of continental Europe in its growing dependence upon trade over both short distances and long. The essays in this collection are the fruit of forty years of research into the complex and interrelated issues involved. Describing this change can be achieved in part through quantitative indices such as the number and size of towns, markets and fairs and the volume of monetary circulation. A full account also requires a discussion of widespread changes of work experience, customary practices and moral values as households became more dependent upon markets. In addition, the evidence of transformative commercial growth in the medieval period gives rise to numerous questions concerning its relationship to more modern times. Modern economic growth and modern capitalism have often been contrasted starkly with medieval economic stagnation and traditionalism, but recent research implies a more continuous process of economic development than that implied by these older stereotypes. Many of the items in this collection are also relevant to this more discursive aspect of medieval commercialisation.

Merchants, Market and Monarchy Tengda Hua, 2021-08-09 This book explores the vital role of merchants within early modern China. Unlike European merchants, their Sino colleagues have long been regarded as certain social pariahs after the pre-Qin period, despite the fortune they made. The key mission of this monograph is to investigate whether the standing of merchants in the Ming Empire has been improved compared with their predecessors. Generally, their status is reflected in state-merchant relationship and their role in the market, which can be found in miscellaneous economic activities such as market monopoly, commercial taxation, international trade and consumption. This book aims to be of relevance to students and researchers interested in early modern history, eastern commerce, Ming merchants and contemporary global affairs.

Peasant and Community in Medieval England, 1200-1500 P. Schofield, 2002-12-17 In recent years, work on the medieval English peasant has tended to stress the degree of interaction between the village and the world beyond its bounds. This book not only provides an overview of this research but also develops this approach. Phillip R. Schofield describes the traditional world of the peasant with attention given to such issues as relations between lord and tenant and the nature of the peasant family and places the peasantry of the late middle ages within the wider political, legal, ecclesiastical and commercial world of the medieval community.

State, Peasant, and Merchant in Qing Manchuria, 1644-1862 Christopher Mills Isett, 2007 This study seeks to lay bare the relationship between the sociopolitical structures that shaped peasant lives in Manchuria, northeast China, during the Qing dynasty and the development of that region's economy. The book is written in three parts. It begins with an analysis of the ideological, political and economic interests of the Qing ruling house in defending its homeland in the northeast against occupation by non-Manchus and examines how these interests informed state policy and the reconfiguration of the region's social landscape in the first decades of the dynasty. The book then addresses how this agrarian configuration unraveled under challenge from

settler peasant communities and gives an account of the resulting property and labor regimes The study ends with an account of how that social formation configured peasant economic behavior and in so doing established the limits of economic change and trade growth The Rise of Market Society in England, 1066-1800 Christiane Eisenberg,2013-12-01 Focusing on England this study reconstructs the centuries long process of commercialization that gave birth to the modern market society It shows how certain types of markets e g those for real estate labor capital and culture came into being and how the social relations mediated by markets were formed The book deals with the creation of institutions like the Bank of England the Stock Exchange and Lloyd s of London as well as the way the English dealt with the uncertainty and the risks involved in market transactions Christiane Eisenberg shows that the creation of a market society and modern capitalism in England occurred under circumstances that were utterly different from those on the European continent In addition she demonstrates that as a process the commercialization of business society and culture in England did not lead directly to an industrial society as has previously been suggested but rather to a service economy Modelling the Middle Ages John Hatcher,Mark Bailey,2001 Most of what has been written on the economy of the middle ages is deeply influenced by abstract concepts and theories The most powerful and popular of these guiding beliefs are derived from intellectual foundations laid down in the eighteenth and nineteenth centuries by Adam Smith Johan von Th nen Thomas Malthus David Ricardo and Karl Marx In the hands of twentieth century historians and social scientists these venerable ideas have been moulded into three grand explanatory ideas which continue to dominate interpretations of economic development These trumpet in turn the claims of commercialization population and resources or class power and property relations as the prime movers of historical change In this highly original book John Hatcher and Mark Bailey examine the structure and test the validity of these conflicting models from a variety of perspectives In the course of their investigations they provide not only detailed reconstructions of the economic history of England in the middle ages and sustained critical commentaries on the work of leading historians but also discussions of the philosophy and methods of history and the social sciences The result is a short and readily intelligible introduction to medieval economic history an up to date critique of established models and a succinct treatise on historiographical method **Credit and Debt in Medieval England c.1180-c.1350** Phillipp Schofield,Nicholas Mayhew,2002-08-07 The essays in this volume look at the mechanics of debt the legal process and its economics in early medieval England Beneath the elevated plane of high politics affairs of the Crown and international finance of the Middle Ages lurked huge numbers of credit and debt transactions The transactions and those who conducted them moved between social and economic worlds merchants and traders clerics and Jews extending and receiving credit to and from their social superiors equals and inferiors These papers build upon an established tradition of approaches to the study of credit and debt in the Middle Ages looking at the wealth of historical material from registries of debt and legal records to parliamentary roles and statutes merchant accounts rents and leases wills and probates Four of the six papers in this volume were given at a

conference on Credit and debt in medieval and early modern England held in Oxford in 2000 The other two papers draw upon new important postgraduate theses Contents Introduction Phillipp Schofield Aspects of the law of debt 1189 1307 Paul Brand Christian and Jewish lending patterns and financial dealings during the twelfth and thirteenth centuries Robin R Mundill Some aspects of the business of statutory debt registries 1283 1307 Christopher McNall The English parochial clergy as investors and creditors in the first half of the fourteenth century Pamela Nightingale Access to credit in the medieval English countryside Phillipp Schofield Creditors and debtors at Oakington Cottenham and Dry Drayton Cambridgeshire 1291 1350 Chris Briggs

duration of largescale religious festivals *Markets, Class and Social Change* B. Crow,2001-10-10 At the beginning of the twenty first century an idealized view of markets informs government policy Real differences in how markets interact with social change are obscured and public action on poverty is constrained Markets Class and Social Change uses a detailed study of the grain trade in Bangladesh to show how socially constrained patterns of market involvement may systematically benefit the rich while disadvantaging the poor More generally the book suggests that markets are implicated in the making of society its divisions identities and directions *Regional Analysis* Carol A.
