The 7-Phase Model

1 Introduction of Driving Question

This meaningful, open-ended, and higher-level question focuses on a real-world issue that students should answer before being given instruction (prior knowledge & plan appropriate instruction).

Intro of Culminating Challenge

Introduce an authentic assessment or performance to the students that will demonstrate mastery in content and skills. Students can be given a guided choice in demonstrating their knowledge and skills.

3 Develop Subject Matter Expertise

This instructional phase requires students to take up authentic roles and become subject matter experts through inquiry methods. Students should explore new concepts, but also be provided with background info.

Doing the Culminating Challenge

This phase is the performance assessment for the students to demonstrate their "expertise" in the new concept. If possible, provide a subject matter expert that can assess student work.

5 Debriefing CC (Subject Expert)

Debriefing involves student reflection through writing exercises or discussions. Ideally, the presence of a subject matter expert could provide valuable and immediate feedback to the students.

Responding to Driving Question

Have students answer their driving question once more to see if their responses are more sophisticated and present a deeper understanding of the concept. Have them compare their response to their initial response.

7 Summative Assessment

A summative assessment measures the learning objectives of each student. This assessment will only work if the tasks students were required to perform were aligned with instructional goals.

The 7 Essentials

1 A Need to Know

Students use the driving question and the entry event to find out what they will need to know and the skills they will need to gain to create the solution to the challenge.

Driving Question

Provide students with a clear driving question that will give them a sense of purpose during the unit. Driving questions should be abstract, open-ended, complex, and connected to an instructional goal.

3 Student Voice & Choice

Student voice & choice makes the project more meaningful. Students can choose to develop media kits, public service announcements, web pages, brochures, & etc.

21st Century Skills

The authentic tasks should require students to utilize collaboration, communication, creative, and critical thinking skills, as well as the use of technology.

5 Inquiry and Innovation

Students will find answers through the teacher, books, articles, websites, and experts. The gathered information will be used to create a product.

Feedback and Revision

Feedback and revision throughout the learning process shows students the importance of creating a high-quality product. Rubrics, exemplars, peer-editing, and adult mentors (experts) can be used for feedback/revision.

7 Present Product Publicly

Products of the culminating challenge are presented to numerous audiences, including parents, peers, experts, the global community. This motivates students to create high-quality products.
