Black River Canal Edward P. Fynmore,Harney J. Corwin,2005 Black River Canal documents in images how a manmade river transformed a region This upper New York State canal was an improbable engineering success In 1825 DeWitt Clinton proposed construction of a canal that would link the Erie Canal at Rome with the Black River at Lyons Falls The idea was well received but the obstacles were great The canal would have to run uphill In the end the 35 mile overland canal required a record 109 locks to negotiate a rise and fall of 1 079 feet Construction was authorized in 1836 and against all odds the Black River Canal was fully operational in 1855 The canal brought a measure of prosperity to an isolated region of the state and promoted development of a wood products industry that continues to this day Historic Canals & Waterways of South Carolina Robert J. Kapsch,2010 From the 1790s to the 1830s the Palmetto State was a preeminent leader in infrastructure improvements and developed an extensive system of more than two thousand miles of canals and waterways connecting virtually every part of the state with the coast and the port of Charleston Robert J Kapsch expertly recounts the complex history of innovation determination and improvement that fueled the canal boom in early nineteenth century South Carolina from publisher description Report of the Lake Superior and Mississippi River Canal Commission to the Legislature of Minnesota Lake Superior and Mississippi River Canal Commission,1914 *Practical River and Canal Engineering* Robert C.
