Visions of the Human Tom Slevin, 2015-05-28 In what ways do the artistic avant garde s representations of the human body reflect the catastrophe of World War I The European modernists were inspired by developments in the nineteenth century yielding new forms of knowledge about the nature of reality and repositioning the human body as the new object of knowledge New visions of the human subject were created within this transformation However modernity s reactionary political climate for which World War I provided a catalyst transformed a once liberal ideal between humanity environment and technology into a tool of disciplinary rationalisation *Visions of the Human* considers the consequences of this historical moment for the twentieth and twenty first centuries It explores the ways in which the technologies of the self that inspired the avant garde were increasingly instrumentalised by conservative politics urbanism consumer capitalism and the society of the spectacle This is an engaging and powerful study which challenges prior ideas and explores new ways of thinking about modern visual culture

The Imagery of Interior Spaces Michael J. Kelly, Dominique Bauer, 2019 On the unstable boundaries between interior and exterior private and public and always in some way relating to a beyond the imagery of interior space in literature reveals itself as an often disruptive code of subjectivity and of modernity The wide variety of interior spaces elicited in literature from the odd room over the womb secluded parks and train compartments to the city as a world under a cloth reveal a common defining feature these interiors can all be analyzed as codes of a paradoxical both assertive and fragile subjectivity in its own unique time and history They function as subtexts that define subjectivity time and history as profoundly ambiguous realities on interchangeable existential socio political and epistemological levels This volume addresses the imagery of interior spaces in a number of iconic and also lesser known yet significant authors of European North American and Latin American literature of the nineteenth twentieth and twenty first centuries Djuna Barnes Edmond de Goncourt William Faulkner Gabriel Garc a M rquez Benito P rez Gald s Elsa Morante Robert Musil Jules Romains Peter Waterhouse and mile Zola

Movement, Manifesto, Melee Milton A. Cohen,2004-09-14 The years before World War I were a fertile period for artists in Europe and the United States who were challenging aesthetic convention in music writing and the visual arts These early pioneers of modernism sometimes preferred to work alone but just as often they were associated with groups whose boundaries were permeable and freely changing While these individual groups including the Futurists Imagists Blue Rider and the Second Vienna School have been thoroughly studied scholars of the period have often neglected the formative and pervasive interactions of these groups across geographic and artistic boundaries Providing a historical taxonomy of this influential milieu Milton Cohen demonstrates how these groups were largely responsible for the artistic innovation and nearly all the avant garde agitation and major events of these years With concluding appendices intended for scholars and specialists this engagingly written book will be useful not only for classroom use and scholarly research but will appeal to anyone interested in reading a fresh approach to the history of early modernism

Colour and Culture John Gage, 2024-10-24 What does the language of colour tell us Where does one colour begin and another end Is it a radiant visual stimulus an intangible function of light or a material substance to be moulded and arrayed Colour is fundamental to art yet so diverse that it has hardly ever been studied in a comprehensive way Art historian John Gage considers every conceivable aspect of the subject in this groundbreaking analysis of colour in Western culture from the ancient Greeks to the late twentieth century Gage describes the first theories of colour articulated by Greek philosophers and subsequent attempts by the Romans and their Renaissance disciples to organize it systematically or endow it with symbolic power He unfolds its religious significance and its use in heraldry as well as how Renaissance artists approached colour with the help of alchemists He explores the analysis of the spectrum undertaken by Newton and continued in the nineteenth century by artists such as Seurat traces the influence of Goethe's colour theory and considers the extraordinary theories and practices that attempted to unite colour and music or make colour into an entirely abstract language of its own The first ever undertaking to suggest answers to many perennial questions about the role of colour in Western art and thought this study throws fresh light on the hidden meanings of many familiar masterpieces
