Roman Archaeology:

Roman Archaeology for Historians Ray Laurence, 2012-06-25 Roman Archaeology for Historians provides students of Roman history with a guide to the contribution of archaeology to the study of their subject. It discusses the issues with the use of material and textual evidence to explain the Roman past and the importance of viewing this evidence in context. It also surveys the different approaches to the archaeological material of the period and examines key themes that have shaped Roman archaeology. At the heart of the book lies the question of how archaeological material can be interpreted and its relevance for the study of ancient history. It includes discussion of the study of landscape change, urban topography, the economy, the nature of cities, new approaches to skeletal evidence and artefacts in museums. Along the way, readers gain access to new findings and key sites, many of which have not been discussed in English before and many for which access may only be gained from technical reports. Roman Archaeology for Historians provides an accessible guide to the development of archaeology as a discipline and how the use of archaeological evidence of the Roman world can enrich the study of ancient history while at the same time encouraging the integration of material evidence into the study of the period's history. This work is a key resource for students of ancient history and for those studying the archaeology of the Roman period.

Roman Bioarchaeology Elizabeth A. Bews, Kathryn E. Marklein, 2025-02-11 In this book, researchers use human skeletal remains uncovered from throughout the Roman world to portray how ordinary people lived and died, spanning the empire's vast geography and 1,000 years of ancient history.

Romans and Barbarians Beyond the Frontiers Sergio Gonzalez Sanchez, Alexandra Gugliemi, 2017-03-31 This first thematic volume of the new series TRAC Themes in Roman Archaeology brings renowned international experts to discuss different aspects of interactions between Romans and barbarians in the northwestern regions of Europe. Northern Europe has become an interesting arena of academic debate around the topics of Roman imperialism and Roman barbarian interactions as these areas comprised Roman provincial territories, the northern frontier system of the Roman Empire, the *limes* or buffer zone, and the distant *barbaricum*. This area is today host to several modern European nations with very different historical and academic discourses on their Roman past, a factor in the recent tendency towards the fragmentation of approaches and the application of postcolonial theories that have favored the advent of a varied range of theoretical alternatives. Case studies presented here span across disciplines and territories from American anthropological studies on transcultural discourse and provincial organization in Gaul to historical approaches to the propagandistic use of the *limes* in the early 20th-century German empire, from Danish research on warrior identities and Roman-Scandinavian relations to innovative ideas on culture contact in Roman Ireland and from new views on Romano-Germanic relations in Central Europe's *Barbaricum* to a British comparative exercise on frontier cultures. The volume is framed by a brilliant theoretical introduction by Prof. Richard Hingley and a comprehensive concluding discussion by Prof. David Mattingly.

Archaeology of Greek and Roman Troy Charles Brian Rose,2014 An overview of all excavations that have been conducted at Troy from the nineteenth century through the latest discoveries between 1988 and the present **The Oxford Handbook**

of Roman Britain Martin Millett,Louise Revell,Alison Jane Moore,2016 This handbook is currently in development with individual articles publishing online in advance of print publication At this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site Please note that the online publication date for this handbook is the date that the first article in the title was published online Roman Britain is a critical area of research within the provinces of the Roman empire Within the last 15 20 years the study of Roman Britain has been transformed through an enormous amount of new and interesting work which is not reflected in the main stream literature **Theoretical Roman Archaeology** Peter Rush,1995

This volume had its origins in the second Theoretical Roman Archaeology Conference held in 1992 at Bradford which followed the ethos of the first conference an essentially egalitarian arena for discussion of and fighting over the introduction and application of theory in Roman archaeology Accepting the need for explicit awareness of theory in Roman archaeology the contributors get on with the business of showing how a wide variety of perspectives and intellectual approaches offer

new insights or alternative interpretations of a range of data This the second volume on theoretical Roman archaeology surely demonstrates not only the enthusiasm generated by new ideas but something of the intellectual rigour required to use them

Rome and Barbaricum: Contributions to the Archaeology and History of Interaction in European Protohistory
 Roxana-Gabriela Curcă,Alexander Rubel,Robin P. Symonds,Hans-Ulrich Voß,2020-05-28 How did the Barbarians influence Roman culture What did Roman ness mean in the context of Empire What did it mean to be Roman and or Barbarian in different contexts 9 papers explore concepts of Romanisation and of Barbaricum from a multi disciplinary and comparative standpoint covering Germania Dacia Moesia Inferior Hispania and more

Roman Officers and English Gentlemen
 Richard Hingley,2013-04-15 This landmark book shows how much Victorian and Edwardian Roman archaeologists were influenced by their own experience of empire in their interpretation of archaeological evidence This distortion of the facts became accepted truth and its legacy is still felt in archaeology today While tracing the development of these ideas the author also gives the reader a thorough grounding in the history of Roman archaeology itself

Beyond the Romans
 Irene Selsvold,Lewis Webb,2020-04-09 This latest volume in the TRAC Themes in Theoretical Roman Archaeology series takes up posthuman theoretical perspectives to interpret Roman material culture These perspectives provide novel and compelling ways of grappling with theoretical problems in Roman archaeology producing new knowledge and questions about the complex relationships and interactions between humans and non humans in Roman culture and society

Posthumanism constitutes a multitude of theoretical positions characterised by common critiques of anthropocentrism and human exceptionalism In part they react to the dominance of the linguistic turn in humanistic sciences These positions do not exclude the human but instead stress the mutual relationship between matter and discourse Moreover they consider the agency of non humans e g animals material culture landscapes climate and ideas their entanglement with humans and the situated nature of research Posthumanism has had substantial impacts in several fields including critical studies archaeology feminist studies even politics but have not yet emerged in any fulsome way in Classical Studies and Classical Archaeology This is the first volume on these themes in Roman Archaeology aimed at providing valuable perspectives into Roman myth art and material culture displacing and complicating notions of human exceptionalism and individualist subjectivity

Contributions consider non human agencies particularly animal material environmental and divine agencies critiques of binary oppositions and gender roles and the Anthropocene Ultimately the papers stress that humans and non humans are entangled and imbricated in larger systems we are all post human

The Archaeology of Early Rome and Latium Ross R. Holloway,2014-05-12 The archaeology of early Rome has progressed rapidly and dramatically over the last century most recently with the discovery of the shrine of Aeneas at Lavinium and the reports of the walls of the Romulan city discovered on the city slopes of the Palatine Hill The Archaeology of Early Rome and Latium presents the most recent discoveries in Rome and its surroundings princely tombs inscriptions and patrician houses are included in a complete overview of the subject and

the controversies surrounding it This comprehensively illustrated study fills the need for an accessible English guide to these new discoveries and in preparation the author interviewed most of the leading figures in current research on the early periods of Rome *The Archaeology of Roman Britain* Adam Rogers,2014-10-10 Within the colonial history of the British Empire there are difficulties in reconstructing the lives of people that came from very different traditions of experience The Archaeology of Roman Britain argues that a similar critical approach to the lives of people in Roman Britain needs to be developed not only for the study of the local population but also those coming into Britain from elsewhere in the Empire who developed distinctive colonial lives This critical biographical approach can be extended and applied to places structures and things which developed in these provincial contexts as they were used and experienced over time This book uniquely combines the study of all of these elements to access the character of Roman Britain and the lives experiences and identities of people living there through four centuries of occupation Drawing on the concept of the biography and using it as an analytical tool author Adam Rogers situates the archaeological material of Roman Britain within the within the political geographical and temporal context of the Roman Empire This study will be of interest to scholars of Roman archaeology as well as those working in biographical themes issues of colonialism identity ancient history and classics **The Bloomsbury**

Handbook of Experimental Approaches to Roman Archaeology Lee Graña Nicolaou,Tatiana Ivleva,Bill Griffiths,2024-12-12 This volume is the first comprehensive overview of Roman experimental archaeology exploring its key themes methodologies and applications through a diverse array of international case studies Experiments simulations and reconstructions are important methods for understanding the past from uncovering how ancient objects and structures were made used destroyed deposited and affected underground to illuminating the experiences of tasting ancient foods fighting alongside comrades or living in replicated structures Although the incorporation of experimentation has had great success in prehistoric studies greater reliance on the wealth of literary and material sources remaining from the classical period has meant that its potential for Roman studies has yet to be fully realised The 26 chapters in this book are divided into 5 thematic parts each of which opens with a contextualizing introduction that frames the detailed case studies found in individual chapters and showcases the actual and potential diversity of experimentation as applied to the Roman past by scholars re-enactors and practitioners in the heritage sector In laying out a detailed guide to Roman experimental archaeology the volume as a whole maps its past present and future and provides a firm foundation for further practical research and collaboration In doing so it reasserts that experiments and reconstructions are a significant resource for testing or developing theories rather than merely artistic replicas and that the vast amount of quantifiable data they yield can be invaluable in support of interpretations of relevant archaeological or historical evidence regardless of the period in question and beyond the confines of academia *Roman Theatres* Frank Sear,2006-07-20 This book is an up to date and comprehensive account of Roman theatre architecture It contains information plans and photographs of every theatre in the

Roman Empire for which there is archaeological evidence together with a full analysis of how Roman theatres were designed built and paid for and how theatres differ in different parts of the Roman Empire It is lavishly illustrated with plans text figures photographs and maps

Roman Finds Richard Hingley, Steven Willis, 2007-04-10 Studies on finds in Roman Britain and the Western Provinces have come to greater prominence in the literature of recent years The quality of such work has also improved and is now theoretically informed and based on rich data sets Work on finds over the last decade or two has changed our understanding of the Roman era in profound ways and yet despite such encouraging advances and such clear worth there has to date been little in the way of a dedicated forum for the presentation and evaluation of current approaches to the study of material culture The conference at which these papers were initially presented has gone some way to redressing this and these papers bring the very latest studies on Roman finds to a wider audience Twenty papers are here presented covering various themes

The Oxford Handbook of the Archaeology of Roman Germany Simon James, Stefan Krmnicek, 2020 This Handbook makes the work of modern German and overwhelmingly German language scholarship on the archaeology of Roman Germany available in English presenting the latest developments in current research and providing a truly international perspective on the topic

The Edges of the Roman World Staša Babić, Marko Jankovic, 2014-06-12 The Edges of the Roman World is a volume consisting of seventeen papers dealing with different approaches to cultural changes that occurred in the context of Roman imperial politics Papers are mainly focused on societies on the fringes both social and geographical and their response to Roman Imperialism This volume is not a textbook but rather a collection of different approaches which address the same problem of Roman Imperialism in local contexts The volume is greatly inspired by the first Imperialism and Identities at the Edges of the Roman World conference held at the Petnica Science Center in 2012

Materialising the Roman Empire Jeremy Tanner, Andrew Gardner, 2024-03-19 Materialising the Roman Empire defines an innovative research agenda for Roman archaeology highlighting the diverse ways in which the Empire was made materially tangible in the lives of its inhabitants The volume explores how material culture was integral to the processes of imperialism both as the Empire grew and as it fragmented and in doing so provide up to date overviews of major topics in Roman archaeology Each chapter offers a critical overview of a major field within the archaeology of the Roman Empire The book's authors explore the distinctive contribution that archaeology and the study of material culture can make to our understanding of the key institutions and fields of activity in the Roman Empire The initial chapters address major technologies which at first glance appear to be mechanisms of integration across the Roman Empire roads writing and coinage The focus then shifts to analysis of key social structures oriented around material forms and activities found all over the Roman world such as trade urbanism slavery craft production and frontiers Finally the book extends to more abstract dimensions of the Roman world art empire religion and ideology in which the significant themes remain the dynamics of power and influence The whole builds towards a broad exploration of the nature of imperial power

and the inter connections that stimulated new community identities and created new social divisions *Iron Age and Roman Coin Hoards in Britain* Roger Bland, Adrian Chadwick, Colin Haselgrove, David Mattingly, 2020-06-30 More coin hoards have been recorded from Roman Britain than from any other province of the Empire This comprehensive and lavishly illustrated volume provides a survey of over 3260 hoards of Iron Age and Roman coins found in England and Wales with a detailed analysis and discussion Theories of hoarding and deposition and examined national and regional patterns in the landscape settings of coin hoards presented together with an analysis of those hoards whose findspots were surveyed and of those hoards found in archaeological excavations It also includes an unprecedented examination of the containers in which coin hoards were buried and the objects found with them The patterns of hoarding in Britain from the late 2nd century BC to the 5th century AD are discussed The volume also provides a survey of Britain in the 3rd century AD as a peak of over 700 hoards are known from the period from AD 253 296 This has been a particular focus of the project which has been a collaborative research venture between the University of Leicester and the British Museum funded by the AHRC The aim has been to understand the reasons behind the burial and non recovery of these finds A comprehensive online database <https://finds.org.uk/database> underpins the project which also undertook a comprehensive GIS analysis of all the hoards and field surveys of a sample of them
