The Archaeology of Roman Britain Adam Rogers, 2014-10-10 Within the colonial history of the British Empire there are difficulties in reconstructing the lives of people that came from very different traditions of experience The Archaeology of Roman Britain argues that a similar critical approach to the lives of people in Roman Britain needs to be developed not only for the study of the local population but also those coming into Britain from elsewhere in the Empire who developed distinctive colonial lives This critical biographical approach can be extended and applied to places structures and things which developed in these provincial contexts as they were used and experienced over time This book uniquely combines the study of all of these elements to access the character of Roman Britain and the lives experiences and identities of people living there through four centuries of occupation Drawing on the concept of the biography and using it as an analytical tool author Adam Rogers situates the archaeological material of Roman Britain within the within the political geographical and temporal context of the Roman Empire This study will be of interest to scholars of Roman archaeology as well as those working in biographical themes issues of colonialism identity ancient history and classics

Hengest, Gwrtheyrn and the Chronology of Post-Roman Britain Flint F. Johnson, 2014-02-07 In this book the author makes use of the methodology he developed in *Origins of Arthurian Romances* McFarland 2012 in order to reevaluate the post Roman history of Britain He begins by delving into the historical contexts of the key traditional players of the fifth century Hengest and Gwrtheyrn A better understanding of these two characters allows for a reexamination of the persons and events of the fifth sixth and seventh centuries The text that follows entirely realigns how those centuries can be seen from a chronological as well as a military and political standpoint The fifth century was not a time of British and Germanic fragmentation as they separated from Rome but one of slow integration and the formation of kingships that were a result of the economic realities of surviving without the dying giant

The Material Fall of Roman Britain, 300-525 CE Robin Fleming, 2021-06-11 Although lowland Britain in 300 CE had been as Roman as any province in the empire in the generations on either side of 400 urban life the money economy and the functioning state collapsed Many of the most quotidian and fundamental elements of Roman style material culture ceased to be manufactured Skills related to iron and copper smelting wooden board and plank making stone quarrying commercial butchery horticulture and tanning largely disappeared as did the knowledge standing behind the production of wheel thrown kiln fired pottery and building in stone No other period in Britain's prehistory or history witnessed the loss of so many classes of once common skills and objects While the reasons for this breakdown remain unclear it is indisputable the collapse was foundational in the making of a new world we characterize as early medieval The standard explanation for the emergence of the new style material culture found in lowland Britain by the last quarter of the fifth century is that foreign objects were brought in by Anglo Saxon settlers Marshalling a wealth of archaeological evidence Robin Fleming argues instead that not only Continental immigrants but also the people whose ancestors had long lived in Britain built this new material world together from the ashes of the old forging an identity that their descendants would eventually come to think of as English As with most identities she cautions this was one rooted in neither birth nor blood but historically constructed and advanced and maintained over the generations by the shared material culture and practices that developed during and after Rome's withdrawal from Britain

The Culture of the English People N. J. G. Pounds, 1994-05-27 This wide ranging book first published in 1994 traces the development of popular culture in England from

the Iron Age to the eighteenth century Roman Britain and Early England, 55 B.C.-A.D. 871 Peter Hunter Blair, 1966 By the time of Caesar's first expedition to Britain in 55 B.C. migratory movements had established close ties of kinship and common interest between the peoples who lived in Gaul and some of the inhabitants of Britain. Because the source material is so meager for much of early British history Mr Blair is careful to explain just how scholars have arrived at an accurate knowledge of the first 900 years. The real history of Britain begins with the Roman occupation for the Romans were the first to leave substantial documentary and archaeological evidence. After the governorship of Agricola the written sources almost entirely disappear until the early Anglo Saxon era of the fifth century but archaeologists have been able to gather a great deal of information about the intervening centuries from excavations of old walled towns, roads and fortresses dating from the Roman period. Mr Blair skillfully describes the transition from Roman to Saxon England and shows why Rome's greatest legacy to her former colony, Christianity, flowered within Anglo Saxon culture. The source material on Saxon England is mainly documentary as these new inhabitants built in wood and little archaeological evidence has survived. However, Bede's Ecclesiastical History of the English Nation and other great Christian writings, the Anglo Saxon Chronicle, Beowulf, the stories of Caedmon and other poems and epics in the Germanic minstrelsy tradition have revealed much about English economic, social and cultural life up to the accession of Alfred the Great.

The Agrarian History of England and Wales: Volume 1, Prehistory to AD 1042 Stuart Piggott, Joan Thirsk, 2011-04-28 This volume surveys the evolution of the man-made landscape in Britain over the period of some three millennia before the Roman conquest.
