**The Building Program of Herod the Great** Duane W. Roller, 1998 Herod the Great King of Judaea from 444 B C is known as one of the world's great villains This notoriety has overshadowed his actual achievements particularly his role as a client king of Rome during Augustus's reign as emperor An essential aspect of Herod's responsibilities as king of Judaea was his role as a builder Remarkably innovative he created an astonishing record of architectural achievement not only in Judaea but also throughout Greece and the Roman east Duane W. Roller systematically presents and discusses all the building projects known to have been initiated by Herod and locates this material in a broad historical and cultural context Bringing together previously inaccessible material Roller enriches our understanding of the enigmatic Herod and provides new insights into Roman architecture Herod was instrumental in the diffusion of the Augustan architectural revolution into the provinces and was the first to build outside Italy such Italian architectural forms as the basilica amphitheater villa and Italian temple Herod's legacy provided a groundwork for the architectural Romanization of the east influencing the construction of the great temple complexes and palaces so familiar from later Roman architecture Herod like Augustus himself was not only interested in architecture but also in diplomatic and financial contacts among cities of the region In addition to providing a repertorium of the building projects this study is also an exploration of international relations in the eastern Mediterranean at the beginning of the Roman imperial period

*Roman Architecture* Rogan Fish, Roman architecture emerged as a distinctive style that blended elements from earlier

civilizations primarily Greek and Etruscan influences As Rome expanded from a small settlement into a powerful empire its architectural identity evolved incorporating new techniques and materials that allowed for grander and more functional structures The early foundations of Roman architecture set the stage for innovations that would shape the empire's urban landscape for centuries One of the most significant influences on Roman architecture came from the Etruscans a civilization that dominated central Italy before Rome's rise The Etruscans were skilled builders who introduced techniques such as the use of the arch and vault both of which would later become hallmarks of Roman engineering Etruscan temples with their high podiums and deep porches also served as models for early Roman religious structures Another major influence was Greek architecture which Romans admired and adapted to suit their needs The Greeks provided inspiration in the use of columns decorative friezes and symmetrical design elements that were later integrated into Roman temples public buildings and monuments Roman architectural development was also shaped by advancements in building materials and construction techniques The early Romans initially built using wood and mudbrick but as they refined their skills they transitioned to more durable materials like stone and concrete The introduction of concrete was a groundbreaking innovation allowing for stronger and more flexible structures Unlike the Greeks who relied heavily on marble the Romans preferred concrete for its affordability and adaptability enabling them to construct larger and more complex buildings such as amphitheaters aqueducts and domes

*Roman Architecture* Janet DeLaine, 2024-05-09 Roman Architecture casts new light not only on many familiar monuments of the city of Rome but also on less well known examples from across the Roman empire Rome and its empire were fundamental to the development of western architecture and its forms and motifs remain significant elements of our own built environments Roman Architecture places the varied architecture of ancient Rome from its humble apartment blocks to its grand public structures within the broader context of Roman society It takes as its starting point the

writings of the Roman architect Vitruvius as one voice in a broader contemporary debate about the nature and value of architecture What did the Romans themselves think architecture was for What was built by whom and why How was architecture represented in text and image The interplay of type and variation that are the hallmark Roman architecture are here traced back to the human actions and choices from which they originated Janet DeLaine explores how the desires of patrons for novelty and individuality were met by architects and builders working within the practical constraints of available materials and the moral prescriptions of religious and social norms to create new forms Ranging from early Rome to the late empire this volume casts new light on many familiar monuments of the city of Rome but also on less well known examples from across the empire Through an examination of the key types of buildings at the heart of Roman society and their decoration it reveals the symbolic meaning of architecture in terms of competitive power displays and commemoration and it explores how architecture helped to define being Roman at different times and in different places of the empire **The**
