Jones, 2019-01-24 In the first centuries BCE and CE Roman wall painters frequently placed representations of works of art especially panel paintings within their own mural compositions Nathaniel B Jones argues that the depiction of panel painting within mural ensembles functioned as a meta pictorial reflection on the practice and status of painting itself This phenomenon provides crucial visual evidence for both the reception of Greek culture and the interconnected ethical and aesthetic values of art in the Roman world Roman meta pictures this book reveals not only navigated social debates on the production and consumption of art but also created space on the Roman wall for new modes of expression relating to pictorial genres the role of medium in artistic practice and the history of painting Richly illustrated the volume will be important for anyone interested in the social ethical and aesthetic dimensions of artworks in the ancient Mediterranean and beyond *The Splendor of Roman Wall Painting* Umberto Pappalardo, 2009 Thanks to this volume the reader can visit the Roman houses of Pompeii Herculaneum Boscoreale Oplontis and Rome that display superb Roman frescoes on their walls An essay by Donatella Mazzoleni highlights the connections between Roman architecture and the programs of illusionistic wall paintings employed in these magnificent structures Umberto Pappalardo examines the Roman domestic ideal and its realization in wall painting and through other elements of interior decoration The two essays precede a sumptuously illustrated guide to twenty eight of the most beautiful houses among them the Villa of the Mysteries the House of the Vettii and the House of the Faun in Pompeii the House of Livia the Villa Farnesina and the Domus Aurea in Rome the House of the Grand Portal in Herculaneum and the Villa of Publius Fannius Synistor in Boscoreale BOOK JACKET

The Oxford History of Western Art Martin Kemp,2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readersare given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully

selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the redefinition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Roman Art Paul Zanker, 2012-01-10 Traditional studies of Roman art have sought to identify an indigenous style distinct from Greek art and in the process have neglected the large body of Roman work that creatively recycled Greek

artworks Now available in paperback this fresh reassessment offers instead a cultural history of the functions of the visual arts the messages that these images carried and the values that they affirmed in late Republican Rome and the Empire The analysis begins at the point at which the characteristic features of Roman art started to emerge when the Romans were exposed to Hellenistic culture through their conquest of Greek lands in the third century B C As a result the values and social and political structure of Roman society changed as did the functions and character of the images it generated This volume presented in very clear and accessible language offers new and fascinating insights into the evolution of the forms and meanings of Roman art Zanker one of the foremost ancient Roman art historians has produced an excellent general study of Roman art and its reception This book would be ideal for students at all levels interested in Roman art history and culture
