

A photograph of ancient Roman ruins in a desert landscape. In the foreground, a large, rectangular stone block stands prominently. Behind it, a long colonnade of tall, fluted columns stretches across the middle ground, supported by a heavy entablature. To the right, another section of the ruins is visible, featuring a more complex arrangement of columns and a partially collapsed roof. The ground is uneven and covered with smaller stones and debris. The sky is a clear, deep blue, and the overall scene is bathed in the warm, golden light of late afternoon or early morning.

Roman Syria And The Near East:

Roman Syria and the Near East Kevin Butcher, 2003 Table of contents Near Eastern Cities from Alexander to the Successors of Muhammad Walter D. Ward, 2019-07-10 Near Eastern Cities from Alexander to the Successors of Muhammad compares the evolution of several cities in the Near East from the time of Alexander the Great until the beginning of the Islamic Abbasid Dynasty This volume examines both archaeological remains and literary sources to explain the diversity of imperial cultural and religious influences on urban life It offers several case studies chosen from different regions of the Roman Near East demonstrating that Greco Roman and Islamic culture spread unevenly through these various cities and that it is impossible to make broad generalizations It argues instead that there were different patterns of urbanism that demonstrate a continued vitality of civic life up to the Abbasid revolution Near Eastern Cities from Alexander to the Successors of Muhammad will be of particular interest to students of this period in the Ancient Near East as well as those studying ancient cities and everyday life **The Oxford Handbook of the Hellenistic and Roman Near East** Rubina Raja, 2025 The Near East during the Hellenistic and Roman periods has been studied for centuries This Handbook includes fifty chapters written by experts from a variety of disciplines archaeology including classical near eastern and Islamic ancient history anthropology art history data and network science epigraphy and historiography Together these chapters shed a fresh light on the vast regions that made up Hellenistic and later Roman Syria and the Near East The material and written evidence from the region is considered side by side with historical sources as well as scientific data coming out of archaeological science and network science and shows how new knowledge about the region can be brought to the forefront of current literature on the subject The dynamic volatile diverse and culturally rich regions that this volume focuses on have left an abundant cultural heritage and in many places these regions are under constant threat In this Handbook knowledge about the newest research on a myriad of these regions sites and locations is highlighted together with overviews of the centuries long history of research The Handbook is essential for students scholars and the archaeologically inclined reader and constitutes the definitive collection of current research in the field *The Near East*, 1916 **Testing the Canon of Ancient Near Eastern Art and Archaeology** Amy Gansell, Ann Shafer, 2020-01-06 Testing the Canon of Ancient Near Eastern Art and Archaeology invites readers to reconsider the contents and agendas of the art historical and world culture canons by looking at one of their most historically enduring components the art and archaeology of the ancient Near East Ann Shafer Amy Rebecca Gansell and other top researchers in the field examine and critique the formation and historical transformation of the ancient Near Eastern canon of art architecture and material culture Contributors flesh out the current boundaries of regional and typological sub canons analyze the technologies of canon production such as museum practices and classroom pedagogies and voice first hand heritage perspectives Each chapter thereby critically engages with the historiography behind our approach to the Near East and proposes alternative constructs Collectively the essays confront

and critique the ancient Near Eastern canon's present configuration and re-imagine its future role in the canon of world art as a whole. This expansive collection of essays covers the Near East's many regions, eras, and types of visual and archaeological materials, offering specific and actionable proposals for its study. *Testing the Canon of Ancient Near Eastern Art and Archaeology* stands as a vital benchmark and offers a collective path forward for the study and appreciation of Near Eastern cultural heritage. This book acts as a model for similar inquiries across global art, historical, and archaeological fields and disciplines.

Understanding Syria through 40 Monuments Ross Burns, 2024-06-27 How can a nation's archaeological treasures help explain its history, especially one as richly complex as Syria's? Ross Burns chooses 40 among Syria's outstanding range of sites, accompanied by over 200 colour illustrations, to take the reader through the tangled paths of this crossroads of the eastern Mediterranean where numerous world cultures intersected. Given the last 12 years of savage conflict, the author reports too on the plight of many of these monuments, addressing the common but unhelpful assumption that much of the country's archaeological treasures have been destroyed. A better approach is to recognise that Syria's heritage can play a role in the country's recovery and cannot simply be declared a write-off. This is a history which tells us much about how Syria's mixture of traditions defies simplistic categorisation through modern definitions of cultures and identities.

The New Cambridge History of Islam: Volume 1, The Formation of the Islamic World, Sixth to Eleventh Centuries Chase F. Robinson, 2010-11-04 Volume One of *The New Cambridge History of Islam*, which surveys the political and cultural history of Islam from its Late Antique origins until the eleventh century, brings together contributions from leading scholars in the field. The book is divided into four parts. The first provides an overview of the physical and political geography of the Late Antique Middle East. The second charts the rise of Islam and the emergence of the Islamic political order under the Umayyad and the Abbasid caliphs of the seventh, eighth, and ninth centuries, followed by the dissolution of the empire in the tenth and eleventh. Regionalism, the overlapping histories of the empire's provinces, is the focus of Part Three, while Part Four provides a cutting-edge discussion of the sources and controversies of early Islamic history, including a survey of numismatics, archaeology, and material culture.

Pageants and Processions Herman du Toit, 2009-10-02 Nowadays pageants often

take the form of parades of effervescent young women competing for popular recognition in hyped up media events However these beauty pageants are a mere pastiche of the elaborate historical parades of the medieval period that took significant social religious or civic events and their protagonists as subjects Pageants were historically characterized by resplendent costuming and elaborate processions that were often given to much pomp and ceremony Pageantry has formed an important part of the civic life of most societies both ancient and modern serving a variety of cultural and political purposes The use of drama and public spectacle as an instrument of civic social and religious activism has recently become the focus of renewed academic inquiry The essays in this interdisciplinary anthology provide carefully researched insights into the phenomenon of pageantry over the centuries and across broad cultural boundaries

The Oxford Handbook of the Second Sophistic Daniel S. Richter, William A. Johnson, 2017-10-24 Focusing on the period known as the Second Sophistic an era roughly co extensive with the second century AD this Handbook serves the need for a broad and accessible overview The study of the Second Sophistic is a relative new comer to the Anglophone field of classics and much of what characterizes it temporally and culturally remains a matter of legitimate contestation The present handbook offers a diversity of scholarly voices that attempt to define as much as is possible in a single volume the state of this rapidly developing field Included are chapters that offer practical guidance on the wide range of valuable textual materials that survive many of which are useful or even core to inquiries of particularly current interest e g gender studies cultural history of the body sociology of literary culture history of education and intellectualism history of religion political theory history of medicine cultural linguistics intersection of the Classical traditions and early Christianity The Handbook also contains essays devoted to the work of the most significant intellectuals of the period such as Plutarch Dio Chrysostom Lucian Apuleius the novelists the Philostrati and Aelius Aristides In addition to content and bibliographical guidance however this volume is designed to help to situate the textual remains within the period and its society to describe and circumscribe not simply the literary matter but the literary culture and societal context For that reason the Handbook devotes considerable space at the front to various contextual essays and throughout tries to keep the contextual demands in mind In its scope and in its pluralism of voices this Handbook thus represents a new approach to the Second Sophistic one that attempts to integrate Greek literature of the Roman period into the wider world of early imperial Greek Latin Jewish and Christian cultural production and one that keeps a sharp focus on situating these texts within their socio cultural context

Rome's Eastern Trade Gary K. Young, 2003-10-04 Utilising new archaeological research the author questions the traditionally held view that the imperial government had a strong political interest in eastern trade Instead he argues that their primary motivation was the tax income

The Assyrian Genocide Hannibal Travis, 2017-07-20 For a brief period the attention of the international community has focused once again on the plight of religious minorities in Iraq Syria and Turkey In particular the abductions and massacres of Yazidis and Assyrians in the Sinjar Mosul Nineveh Plains Baghdad and Hasakah regions in 2007 2015 raised questions about the prevention of genocide This book while principally analyzing the Assyrian genocide of 1914 1925 and its implications for the culture and politics of the region also raises broader questions concerning the future of religious diversity in the Middle East It gathers and analyzes the findings of a broad spectrum of historical and scholarly works on Christian identities in the Middle East genocide studies international law and the politics of the late Ottoman Empire as well as the politics of the Ottomans British and Russian rivals for power in western Asia and the eastern Mediterranean basin A key question the book raises is whether the fate of the Assyrians maps onto any of the concepts used within international law and diplomatic history to study genocide and group violence In this light the Assyrian genocide stands out as being several times larger in both absolute terms and relative to the size of the affected group than the

Srebrenica genocide which is recognized by Turkey as well as by international tribunals and organizations Including its Armenian and Greek victims the Ottoman Christian Genocide rivals the Rwandan Bengali and Biafran genocides The book also aims to explore the impact of the genocide period of 1914 1925 on the development or partial unraveling of Assyrian group cohesion including aspirations to autonomy in the Assyrian areas of northern Iraq northwestern Iran and southeastern Turkey Scholars from around the world have collaborated to approach these research questions by reference to diplomatic and political archives international legal materials memoirs and literary works
