Roman Technology And Crafts:

Roman Technology and Crafts Miranda Jane Aldhouse-Green, 1982 *Roman Technology and Crafts* Miranda Green, 1979 ***Roman Technology and Crafts*** Miranda J. Green, 1981 *The Oxford Handbook of Engineering and Technology in the Classical World* John Peter Oleson, 2008 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to engineering and technology This text highlights the accomplishments of the ancient societies the research problems and stimulates further progress in the history of ancient technology *Greek and Roman Technology: A Sourcebook* Andrew N. Sherwood, Milo Nikolic, John W. Humphrey, John P. Oleson, 2003-10-04 In this volume the authors translate and annotate key passages from ancient authors to provide a history and an analysis of the origins and development of technology Among the topics covered are energy basic mechanical devices agriculture food processing and diet mining and metallurgy construction and hydraulic engineering household industry transport and trade military technology The sourcebook presents 150 ancient authors and a diverse range of literary genres such as the encyclopedic *Natural Histories* of Pliny the Elder the poetry of Homer and Hesiod the philosophy of Plato Aristotle and Lucretius and the agricultural treatise of Varro Humphrey Oleson and Sherwood provide a comprehensive and accessible collection of rich and varied sources to illustrate and elucidate the beginnings of technology Glossaries of technological terminology indices of authors and subjects introductions outlining the general significance of the evidence notes to explain the specific details and a recent bibliography make this volume a valuable research and teaching tool *International Symposium on History of Machines and Mechanisms* Hong-Sen Yan, Marco Ceccarelli, 2009-01-11 The International Symposium on the History of Machines and Mechanisms is the main activity of the Permanent Commission PC for the History of Mechanism and Machine Science HMM of the International Federation for the Promotion of Mechanism and Machine Science IFToMM The first symposium HMM2000 was initiated by Dr Marco Ceccarelli and was held at the University of Cassino Cassino Italy on May 11 13 2000 The second symposium HMM2004 was chaired by Dr Marco Ceccarelli and held at the same venue on May 12 15 2004 The third symposium HMM2008 was chaired by Dr Hong Sen Yan and held at the National Cheng Kung University Tainan Taiwan on November 11 14 2008 The mission of IFToMM is to promote research and development in the field of machines and mechanisms by theoretical and experimental methods along with their practical applications The aim of HMM2008 is to establish an international forum for presenting and discussing historical developments in the field of Mechanism and Machine Science MMS The subject area covers all aspects of the development of HMM such as machine mechanism kinematics design method etc that are related to people events objects anything that assisted in the development of the HMM and presented in the forms of reasoning and arguments demonstration and identification and description and evaluation *Doing Museology Differently* Duncan Grewcock, 2013-09-05 One might believe that museum studies is a stable field of academic inquiry based on a set of familiar institutional forms and functions

But as institutions museums have never been stable or singular and neither has the discipline of museum studies Museum studies as a field of academic inquiry has received little critical attention One result of this neglect has arguably been a lack of invention in museum studies another is the distancing of academic museum studies from museum practice Doing Museology Differently charts a different course A critical creative reflection on academic practice the book takes the form of a narrative account of museological fieldwork A research story unfolds challenging academic conventions at the level of its own presentation the book combines critical museum visiting with an autobiographical voice The identification of a previously underexplored interdisciplinary space leads the author to experiment with museum studies using contemporary developments in the theory and practice of human geography The new approaches to museological research and representation that emerge from this unique inquiry challenge assumed institutional and intellectual boundaries and act as a call to further creative experimentation

Greek and Roman Technology Andrew N. Sherwood, Milorad Nikolic, John W. Humphrey, John P. Oleson, 2019-10-23 In this new edition of Greek and Roman Technology the authors translate and annotate key passages from ancient texts to provide a history and analysis of the origins and development of technology in the classical world Sherwood and Nikolic with Humphrey and Oleson provide a comprehensive and accessible collection of rich and varied sources to illustrate and elucidate the beginnings of technology Among the topics covered are energy basic mechanical devices hydraulic engineering household industry medicine and health transport and trade and military technology This fully revised Sourcebook collects more than 1 300 passages from over 200 ancient sources and a diverse range of literary genres such as the encyclopaedic Natural History of Pliny the Elder the poetry of Homer and Hesiod the philosophies of Plato Aristotle and Lucretius the agricultural treatises of Varro Columella and Cato the military texts of Philo of Byzantium and Aeneas Tacticus as well as the medical texts of Galen Celsus and the Hippocratic Corpus Almost 100 line drawings indexes of authors and subjects introductions outlining the general significance of the evidence notes to explain the specific details and current bibliographies are included This new and revised edition of Greek and Roman Technology will remain an important and vital resource for students of technology in the ancient world as well as those studying the impact of technological change on classical society JACT Review ,1992

Technology in Transition A.D. 300-650 Luke Lavan, Enrico Zanini, Alexander Sarantis, 2008-03-31 This book is the first general work to be published on technology in Late Antiquity It seeks to survey aspects of the technology of the period and to respond to questions about technological continuity stagnation and decline The book opens with a comprehensive bibliographic essay that provides an overview of relevant literature The main section then explores technologies in agriculture production metal ceramics and glass engineering and building Papers draw on both archaeological and textual sources and on analogies with medieval and early modern technologies Reference is made not only to the periods which preceded it but to the transition to the Early Middle Ages and to the technological heritage of Late Antiquity to the Islamic world Several papers focus on Italy whilst others

consider North Africa Asia Minor and the Near East **Technological Development, Society And State: Western And Chinese Civilizations In Comparison - Proceedings Of The Joint Conference** Welf Heinrich Schnell, Wolfgang Radtke, Hans Poser, W König, 1991-10-16 This is a collection of essays focused on problems concerning the philosophy of technology the concept of nature the relationships between policy and economic development on the one hand and technological development on the other hand with respect to philosophical principles historical and cultural background both in Western and Chinese Civilization The Archaeology of the Roman Economy Kevin Greene, 1986 **Humans, Animals, and the Craft of Slaughter in Archaeo-Historic Societies** Krish Seetah, 2018-10-25 This book conceptualizes butchery as an expression of technological knowledge and culture embedded in action defining the human animal relationship **The Concept of Work** Herbert Applebaum, 1992-09-30 This book presents an analysis and review of work starting with the Homeric period then dealing with classical Greece and classical Rome the early Christians and Jews the early Middle Ages the era of Charlemagne the high Middle Ages the views of Luther and Calvin the English and French Enlightenment the nineteenth century the twentieth century and prospects for the future of work It offers a rich and varied tapestry on the complexity of values regarding work criss crossing through crafts occupations and professions through slave and free born employments through lay and religious figures and through rural and urban contexts The permutations of work and its meanings are traced and related to the social and cultural contexts of each period of history dealt with ancient medieval and modern Applebaum offers projections for work in the future based on modern day technologies along with work within the context of new social conditions created by industrial cultures in the modern period The future of work is examined as one of the key elements for the possibility of change in the social structure of industrial cultures At a time when so many people are questioning the work ethic this book provides a valuable perspective on work in past societies how it has developed and been transformed and what are its prospects for the future **Masterworks of Technology** E. E. Lewis, 2010-05 In this absorbing exploration of technological creativity throughout the ages E E Lewis professor of mechanical engineering at Northwestern University eloquently tells the story of how science and engineering which had little in common until a few hundred years ago came together to create the technological world of the 21st century Today's technology is the product of a fascinating synergy of science's search for comprehension of the material universe and engineering's drive to build things and make them work In the 20th century this synergy achieved many unprecedented successes the most spectacular of which is arguably the first moon landing of the Apollo program Rocket science now symbolic of humanity's most complex technological endeavors is the culmination of centuries of achievements by architects of pyramids and cathedrals medieval craft guilds and pioneering inventors and scientists from the Renaissance through the Industrial Revolution Melding his own personal experiences from visiting Chartres Cathedral to flying aboard a Boeing 777 with vivid historical vignettes the author skillfully demonstrates the importance of craft tradition scientific method production organization economics and more to the

creation of modern technology The many topics that Lewis illuminates include the slow evolution of the wheelwright's craft the background and training of the architect engineers who undertook the construction of medieval cathedrals the importance of patronage and venture capitalists in realizing the big ideas of past and present the increasing use of visualization as seen in Leonardo's notebooks Galileo's immense contribution of bringing science and engineering together the increasing importance of basic science as the seedbed of engineering and design innovations the challenge of attempting unprecedented feats while minimizing risk as exemplified by space flight and much more Whether Lewis is discussing the distribution of weight along flying buttresses the challenges faced by Morse in engineering the telegraph or the Apollo program's monumental team effort the author's deep knowledge of and enthusiasm for his subject and his gift for engaging lively prose make for a fascinating exploration of science and engineering through the ages E. E. Lewis Evanston, IL the former chair of the Department of Mechanical Engineering is professor of mechanical engineering at the McCormick School of Engineering and Applied Science at Northwestern University He is the author of three engineering textbooks and numerous journal articles

Handbook to Life in Ancient Rome Lesley Adkins, Roy A. Adkins, Both Professional Archaeologists Roy A. Adkins, 2014-05-14 Describes the people places and events of Ancient Rome describing travel trade language religion economy industry and more from the days of the Republic through the High Empire period and beyond

Technology and the Common Good Allen Batteau, 2022-06-10 Building on the work of Elinor Ostrom Governing the Commons the author examines how the different shared goods of a democratic society are shaped by technology and demonstrates how club goods common pool resources and public goods are supported enhanced and disrupted by technology He further argues that as the common good is undermined by different interests it should be possible to reclaim technology if the members of the society conclude that they have something in common

The Temple Complex at Horvat Omrit Michael C. Nelson, 2015-04-21 Volume One of The Temple Complex at Horvat Omrit presents a detailed examination of the surviving architecture of the three Roman period temple phases at the newly excavated sanctuary at the archaeological site of Omrit in northern Israel All three temples were built according to the Corinthian order and the author describes and illustrates the state of the remains proposes reconstructions of each phase and places each temple in the broader historical context
