Feltman, Sarah Thompson, 2019-03-08 Traditional histories of medieval art and architecture often privilege the moment of a work s creation yet surviving works designated as medieval have long and expansive lives Many have extended prehistories emerging from their sites and contexts of creation and most have undergone a variety of interventions including adaptations and restorations since coming into being The lives of these works have been further extended through historiography museum exhibitions and digital media Inspired by the literary category of biography and the methods of longue dur e historians the introduction and seventeen chapters of this volume provide an extended meditation on the longevity of medieval works of art and the aspect of time as a factor in shaping our interpretations of them While the metaphor of lives invokes associations with the origin of the discipline of art history focus is shifted away from temporal constraints of a single human lifespan or generation to consider the continued lives of medieval works even into our present moment Chapters on works from the modern countries of Italy France England Spain and Germany are drawn together here by the thematic threads of essence and continuity transformation memory and oblivion and restoration

Together they tell an object oriented history of art and architecture that is necessarily entangled with numerous individuals and institutions Worldwide Art Book Syllabus, 1966 The Art of Medieval Spain, A.D. 500-1200 Metropolitan Museum **Medieval Art** Veronica Sekules, 2001-04-26 This refreshing new look at Medieval art of Art (New York, N.Y.),1993 conveys a very real sense of the impact of art on everyday life in Europe from 1000 to 1500 It examines the importance of art in the expression and spread of knowledge and ideas including notions of the heroism and justice of war and the dominant view of Christianity Taking its starting point from issues of contemporary relevance such as the environment the identity of the artist and the position of women the book also highlights the attitudes and events specific to the sophisticated visual culture of the Middle Ages and goes on to link this period to the Renaissance The fascinating question of whether commercial and social activities between countries encouraged similar artistic taste and patronage or contributed to the defining of cultural difference in Europe is fully explored Cistercian Architecture and Medieval Society Maximilian Sternberg, 2013-08-15 In Cistercian Architecture and Medieval Society Maximilian Sternberg offers an account of the social functions of the built environment in medieval monasticism Few medieval monuments hold so privileged a place in the modern imagination as Cistercian abbeys yet Sternberg suggests it is precisely our own peculiarly modern fascination with the idea of Cistercian aesthetics that has hindered a full view of the complex social meanings of their architecture This book draws attention instead to the practical and symbolic means by which architecture helped the Cistercians to negotiate the dense web of relations that in actuality bound them to other spheres of medieval society It explores the permeability of monastic boundaries and considers their effectiveness in reconciling a simultaneous need for interaction and distance between monastic communities and these other social spheres **Illuminating a Legacy** Lynley Anne Herbert, Isabelle Lachat, Stephen M. Wagner, 2024-07-22 This anthology honors Lawrence Nees expansive contributions to medieval art historical inquiry and teaching on the occasion of his retirement from the University of Delaware These essays present a cross section of recent research by students colleagues and friends the breadth of subjects explored demonstrates the pertinence of Nees distinctive approach and methodology centering human agency and creativity The contributions follow three main threads Establishing Identity Patronage and Politics and Beyond the Canon Some authors draw upon Nees systematic analysis of iconographic idiosyncrasies and ornamental schemes whether adorning manuscripts or monumental edifices which elucidates their unique visual and material characteristics Others apply a Neesian engagement with the complex dynamics of cultural exchange visual manifestations of political ambitions and ideologies and selective mining of the classical past Ultimately this collection aims to illustrate the impact of Nees transformative scholarship and to celebrate his legacy in the field of medieval art history **Art in England** Sara N. James, 2016-10-31 Art in England fills a void in the scholarship of both English and medieval art by offering the first single volume overview of artistic movements in Medieval and Early Renaissance England Grounded in history and using the chronology of the reign of monarchs as a structure it is

contextual and comprehensive revealing unobserved threads of continuity patterns of intention and unique qualities that run through English art of the medieval millennium By placing the English movement in a European context this book brings to light many ingenious innovations that focused studies tend not to recognize and offers a fresh look at the movement as a whole The media studied include architecture and related sculpture both ecclesiastical and secular tomb monuments murals panel paintings altarpieces and portraits manuscript illuminations textiles and art by English artists and by foreign artists commissioned by English patrons
