Crossing Languages to Play with Words Sebastian Knospe, Alexander Onysko, Maik Goth, 2016-09-26 Wordplay involving several linguistic codes is an important modality of ludic language This volume offers a multidisciplinary approach to the topic discussing examples from different epochs genres and communicative situations The contributions illustrate the multi dimensionality linguistic make up and the special interactive potential of wordplay across linguistic and cultural boundaries including the challenging practice of translation *Morphologization: Studies in Latin and Romance Morphophonology*

Jürgen Klausenburger, 2017-12-04 No detailed description available for Morphologization Studies in Latin and Romance Morphophonology **Early Modern English Dialogues** Jonathan Culpeper, Merja Kytö, 2010-02-18 This book analyses

speech related genres in Early Modern English providing ideas of what spoken interaction in earlier times might have been like Language Typology and Language Universals Martin Haspelmath, 2001 This series of HANDBOOKS OF

LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes

are concerned It is felt that this *modus operandi* is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume

2010 [catalog] Degruyter, 2010-12-16 Reviews are an important aspect of scholarly discussion because they help filter out which works are relevant in the yearly flood of publications and are thus influential in determining how a work is received The IBR published again since 1971 as an interdisciplinary international bibliography of reviews it is a unique source of bibliographical information The database contains entries on over 1 2 million book reviews of literature dealing primarily with the humanities and social sciences published in 6 820 mainly European scholarly journals Reviews of more than 560 000 scholarly works are listed The database increases every year by 60 000 entries Every entry contains the following information On the work reviewed author title On the review reviewer periodical year edition page ISSN language subject area in German English Italian Publisher address of journal

Discourse Functions at the Left and Right

Periphery Kate Beeching, Ulrich Detges, 2014-08-14 A basic property of human language is that it unfolds in time the left and right margin of discourse units do not behave in a symmetrical fashion The working hypothesis of this volume is that discourse elements at the left periphery have mainly subjective and discourse structuring functions whereas at the right periphery such elements play an intersubjective or modalising role However the picture that emerges from the different contributions to this volume is far more complex While it seems clear that the working hypothesis cannot be upheld in a strong way most of the chapters especially those based on corpus data show that an asymmetry between left and right periphery does exist and that it is a matter of frequency

Linguistic Universals and Language Variation Peter Siemund, 2011-06-30 The volume explores the relationship between linguistic universals and language variation Its contributions identify the recurrent patterns and principles behind the complex spectrum of observable variation The volume bridges the gap between cross linguistic variation regional variation diachronic variation contact induced variation as well as socially conditioned variation Moreover it addresses fundamental methodological and theoretical issues of variation research The volume brings together internationally renowned specialists of their fields while at the same time offering a platform for gifted and highly talented young researchers The authors come from different theoretical backgrounds and through their work illustrate a rich array of scientific methods All authors share a strong belief in empirically founded theoretical work The contributions span a high number of languages and dialects from many parts of the world They are extremely broad in their empirical coverage addressing an impressive selection of grammatical domains

Reflexive Marking in the History of French Richard Waltereit, 2012-06-19 While French reflexive clitics have been widely studied other forms of expressing co reference within the clause have not received much attention This monograph offers a diachronic study of the wider system of clause mate co reference in French including the stressed

pronouns their suffixed form *soi lui elle m me* and also the intensifier use of the latter Its empirical backbone is a corpus analysis of the gradual replacement of stressed reflexive *soi* with the personal pronoun *lui elle* from Old to Modern French Apart from offering insights into the history of the language this is important for current issues in theoretical linguistics in particular binding specificity and the interaction of grammar and discourse Within a cognitive semantic framework a number of analyses will help elucidate some long standing puzzles in the study of French reflexives while contributing to the wider theory of reflexivity and related issues This book is of interest to the fields of French linguistics semantics discourse studies and historical linguistics
