## **Romano Byzantine Infantry Equipment:**

**Romano-Byzantine Infantry Equipment** ,2006      *Romano-Byzantine Infantry Equipment* Ian P. Stephenson,2006

This companion to the author's authoritative survey *Roman Infantry Equipment* covers the long period from the accession of Diocletian 284 to the death of Heraclius 641 of which the central event is the end of the Western Empire in favor of Byzantium. Systematically, Stephenson looks at the evolution of the different components of armor and weaponry: helmets, shields, body armor, the spear, blades and bludgeons, missile weapons, and artillery. He also examines the tactical uses made of infantry, cavalry, and the shieldwall.      *Historical Dictionary of Byzantium* John H. Rosser,2012 The Byzantine Empire dates back to Constantine the Great, the first Christian ruler of the Roman Empire, who in 330 AD moved the imperial capital from Rome to a port city in modern-day Turkey, which he then renamed Constantinople in his honor. From its founding, the Byzantine Empire was a major anchor of east-west trade and culture; art, architecture, and the economy all prospered in the newly Christian empire. As Byzantium moved into the middle and late period, Greek became the official language of both church and state, and the Empire's cultural and religious influence extended well beyond its boundaries. In the mid-15th century, the Ottoman Turks put an end to 1,100 years of Byzantine history by capturing Constantinople, but the Empire's legacy in art, culture, and religion endured long after its fall. In this revised and updated second edition of the *Historical Dictionary of Byzantium*, author John H. Rosser introduces both the general reader and the researcher to the history of the Byzantine Empire. This comprehensive dictionary includes detailed alphabetical entries on key figures, ideas, places, and themes related to Byzantine art, history, and religion, and the second edition contains numerous additional entries on broad topics such as transportation and gender, which were less prominent in the previous edition. An expanded introduction introduces the reader to Byzantium, and a guide to further sources and suggested readings can be found in the extensive bibliography that follows the entries. A basic chronology and various maps and illustrations are also included in the dictionary. This book is an excellent access point for students, researchers, and anyone wanting to know more about Byzantium.

Technology in Transition A.D. 300-650 Luke Lavan, Enrico Zanini, Alexander Sarantis, 2008-03-31 This book is the first general work to be published on technology in Late Antiquity. It seeks to survey aspects of the technology of the period and to respond to questions about technological continuity, stagnation, and decline. The book opens with a comprehensive bibliographic essay that provides an overview of relevant literature. The main section then explores technologies in agriculture, production, metal, ceramics, and glass, engineering, and building. Papers draw on both archaeological and textual sources and on analogies with medieval and early modern technologies. Reference is made not only to the periods which preceded it but to the transition to the Early Middle Ages and to the technological heritage of Late Antiquity to the Islamic world. Several papers focus on Italy, whilst others consider North Africa, Asia Minor, and the Near East.      Eagles in the Dust Adrian Coombs-Hoar, 2015-01-30 In AD 376, large groups of Goths seeking refuge from the Huns sought admittance to the

Eastern Roman Empire Emperor Valens took the strategic decision to grant them entry hoping to utilize them as a source of manpower for his campaigns against Persia. The Goths had been providing good warriors to Roman armies for decades. However mistreatment of the refugees by Roman officials led them to take up arms against their hosts. The resultant battle near Adrianopolis in AD378 in which Valens lost his life is regarded as one of the most significant defeats ever suffered by Roman arms. The Roman historian Ammianus Marcellinus called it the worst massacre since Cannae nearly six hundred years previously. Modern historians have accorded it great significance both at a tactical level due to the success of Gothic cavalry over the vaunted Roman infantry and in strategic terms often citing it as the beginning of the end for the Empire.

Adrian Coombs Hoar untangles the debate that still surrounds many aspects such claims with an insightful account that draws on the latest research. Legions in Crisis: The Transformation of the Roman Soldier - 192 to 284 Paul Elliot, 2014-05-10

The third century AD was a turbulent and testing time for the Roman Empire. A new and powerful foe in the east had risen up to challenge Rome directly. Barbarians on the northern frontiers were now more aggressive and more numerous than before and internally the population of the empire had to contend with rampant inflation and a series of terrible plagues. Unfortunately the chaos became magnified by a lack of continuity on the imperial throne. The army had real political power in the third century making and unmaking emperors as it saw fit. It had been aided in this by Septimius Severus the African emperor who had won out in the civil wars following Commodus assassination. He increased the army's pay and granted other privileges. While the army gained rapidly in size stature and political savvy during the reign of Septimius Severus it also accelerated a material transformation. Armour shields helmets swords and javelins all began to be replaced with new styles. Legions in Crisis looks closely at the new styles of arms and armour comparing their construction use and effectiveness to the more familiar types of Roman kit used by soldiers fighting the earlier Dacian and Marcomannic Wars. What did this transformation in military technology mean for the tactical choices used on the battlefield? Although the outcome had looked in doubt the army and the empire it protected weathered the storm to emerge into the fourth century fully able to tackle the challenges of a new age.

Decorated Roman Armour Raffaele D'Amato, Andrey Evgenovich Negin, 2017-03-30

From the time of the Bronze Age the warriors of all tribes and nations sought to emblazon their arms and armour with items and images to impress upon the enemy the wealth and power of the wearer. Magnificently decorated shields were as much a defensive necessity as a symbol of social status. Equally decorative symbols on shields and armour defined the collective ideals and the self conceived important of the village or city state its warriors represented. Such items were therefore of great significance to the wearers and the authors of this astounding detailed and extensively researched book have brought together years of research and the latest archaeological discoveries to produce a work of undeniable importance. Shining Under the Eagles is richly decorated throughout and as well as battlefield armour details the tournament and parade armour from Rome's earliest days. Dr Andrey Negin is candidate of historical sciences Russian PhD member of the department of history of the

Ancient World and Classical Languages of Nizhny Novgorod State University named after N I Lobachevsky Russian Federation He has carried out fieldwork on ancient Roman armour and has published books and numerous articles on Roman military equipment Dr Raffaele D Amato is an experienced Turin based researcher of the ancient and medieval military worlds After achieving his first PhD in Romano Byzantine Law and having collaborated with the University of Athens he gained a second doctorate in Roman military archaeology He spent the last year in Turkey as visiting professor at the Fatih University of Istanbul teaching there and working on a project about the army of Byzantium He currently work as part time researcher at the Laboratory of the Danubian Provinces at the University of Ferrara under Professor Livio Zerbini
