Romanze Vol 5:

Continuity and Variation in Germanic and Romance Sam Wolfe, Christine Meklenborg, 2021-05-20 This volume offers a range of synchronic and diachronic case studies in comparative Germanic and Romance morphosyntax. These two language families spoken by over a billion people today have played a central role in linguistic research but many significant questions remain about the relationship between them. Following an introduction that sets out the methodological, empirical and theoretical background to the book, the volume is divided into three parts that deal with the morphosyntax of subjects and the inflectional layer, inversion, discourse pragmatics and the left periphery, and continuity and variation beyond the clause. The contributors adopt a diverse range of approaches, making use of the latest digitized corpora and presenting a mixture of well known and under studied data from standard and non standard Germanic and Romance languages. Many of the chapters challenge received wisdom about the relationship between these two important language families. The volume will be an indispensable resource for researchers and students in the fields of Germanic and Romance linguistics, historical and comparative linguistics and morphosyntax. Romance Languages and Linguistic Theory 2008 Reineke

Bok-Bennema, Brigitte Kampers-Manhe, Bart Hollebrandse, 2010-11-24 This volume assembles a significant number of selected papers that were presented at the 22nd edition of Going Romance held at the University of Groningen in December 2008. Though it contains a variety of topics, tense, mood and aspect is represented most extensively. This volume contains a rich variety of Romance languages: Cape Verdean, European Portuguese, French, Italian, Romanian and Spanish. The collection of papers is representative of the research carried out nowadays on Romance languages within theoretical linguistics and shows the vitality of this research. **Manual of Deixis in Romance Languages** Konstanze Jungbluth, Federica Da

Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures, not only the items themselves but also the oppositions between them, reflect the fact that neither the notions of space, time, person nor our use of them are identical cross culturally. This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties. This volume will provide an overview of the field, focusing on Romance languages but also reaching beyond this perspective. Chapters on diachronic developments, language change, comparisons with other non European languages and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers, regardless of their familiarity with Romance languages, will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world. **The Cambridge History of the Romance**

Languages: Volume 1, Structures Martin Maiden, John Charles Smith, Adam Ledgeway, 2011 This Cambridge history is the

definitive guide to the comparative history of the Romance languages Volume I is organized around the two key recurrent themes of persistence structural inheritance and continuity from Latin and innovation structural change and loss in Romance
