Keri Cronin, 2018-04-09 Animal rights activists today regularly use visual imagery in their efforts to shape the public's understanding of what it means to be kind cruel and inhumane toward animals *Art for Animals* explores the early history of this form of advocacy through the images and the people who harnessed their power Following in the footsteps of earlier formed organizations like the RSPCA and ASPCA animal advocacy groups such as the Victoria Street Society for the Protection of Animals from Vivisection made significant use of visual art in literature and campaign materials But enabled by new and improved technologies and techniques they took the imagery much further than their predecessors did turning

toward vivid pointed and at times graphic depictions of human animal interactions Keri Cronin explains why the activist community embraced this approach details how the use of such tools played a critical role in educational and reform movements in the United States Canada and England and traces their impact in public and private spaces Far from being peripheral illustrations of points articulated in written texts or argued in impassioned speeches these photographs prints paintings exhibitions magic lantern slides and films were key components of animal advocacy at the time both educating the general public and creating a sense of shared identity among the reformers Uniquely focused on imagery from the early days of the animal rights movement and filled with striking visuals Art for Animals sheds new light on the history and development of modern animal advocacy

Julian McAllister Groves, 1997 Living in a university town that is a center of biomedical research Groves found he could not ignore the intense opposition to research using animals He began to analyze the formation and activities of local protest groups attending meetings and talking to activists about their beliefs To his surprise many activists emphasized rational and scientific justifications for their commitment to the movement Conversely scientists frequently discussed their use of lab animals in the context of their attachment to pets or other animals and their concern for the environment Groves seeks to understand these positions in connection with popular beliefs about the place of emotions in public life Hearts and Minds looks past the placards and sound bites to people's intellectual and psychological explanations for their positions It discards worn generalizations and offers a nuanced portrait of people who are seriously engaged in reconciling their ethics and their behavior

Collard, 2020-08-24 Parrots and snakes wild cats and monkeys exotic pets can now be found everywhere from skyscraper apartments and fenced suburban backyards to roadside petting zoos In Animal Traffic Rosemary Claire Collard investigates the multibillion dollar global exotic pet trade and the largely hidden processes through which exotic pets are produced and traded as lively capital Tracking the capture of animals in biosphere reserves in Mexico Guatemala and Belize their exchange at exotic animal auctions in the United States and the attempted rehabilitation of former exotic pets at a wildlife center in Guatemala Collard shows how exotic pets are fetishized both as commodities and as objects Their capture and sale sever their ties to complex socio ecological networks in ways that make them appear as if they do not have lives of their own Collard demonstrates that the enclosure of animals in the exotic pet trade is part of a bioeconomic trend in which life is increasingly commodified and objectified under capitalism Ultimately she calls for a wild life politics in which animals are no longer enclosed retain their autonomy and can live for the sake of themselves [Animal Rights](#) Hilda Kean, 1998-08 In
