Christianity in Western and Northern Europe Todd M. Johnson,Annemarie C Mayer,Kenneth R. Ross,2024-04-30 Although the origins of Christianity lie in the Near East Europe and Christianity have an exceptional relationship since most Europeans perceive Christianity as a Western more precisely as a European religion The region has seen rapid social change in the 21st century set off by factors including energy crisis and environmental awareness poverty and exclusion falling birthrates and increased migration changing attitudes to sexuality gender and family life and challenges to Europe's idea of itself and place in the global order Amidst all this flux this volume focuses on one particular issue the rapidly changing profile of the Christian faith that has shaped the life of the European continent for a millennium and more At a time when patterns of Christian life and worship appear to be dying out yet traces of new life are also appearing this volume maps out the current reality of Christianity in Western and Northern Europe with all its questions and uncertainties

Non-Western Educational Traditions Timothy G. Reagan,2004-09-22 This text provides a brief yet comprehensive overview of a number of non Western approaches to educational thought and practice Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters The value of this informative mind opening text for preservice and in service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter New in the Third Edition Chapter 2 Conceptualizing Culture I We and The Other is new to this edition It is a response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest in indigenous peoples their languages cultures and histories Various points throughout the text have been expanded and clarified and chapters have been updated as needed

Race, Racism, and Science John P. Jackson,Nadine M. Weidman,2006 Since the eighteenth century when natural historians created the idea of distinct racial categories scientific findings on race have been a double edged sword For some antiracists science holds the promise of one day providing indisputable evidence to help eradicate racism On the other hand science has been enlisted to promote racist beliefs ranging

from a justification of slavery in the eighteenth century to the infamous twentieth century book *The Bell Curve* whose authors argued that racial differences in intelligence resulted in lower test scores for African Americans. This well organized readable textbook takes the reader through a chronological account of how and why racial categories were created and how the study of race evolved in multiple academic disciplines including genetics, psychology, sociology, and anthropology. In a bibliographic essay at the conclusion of each of the book's seven sections, the authors recommend primary texts that will further the reader's understanding of each topic. Heavily illustrated and enlivened with sidebar biographies, this text is ideal for classroom use.
