Vargo, 2014-12-18 Expanding on the editors award winning article *Evolving to a New Dominant Logic for Marketing* this book presents a challenging new paradigm for the marketing discipline This new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy Service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing It moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process The editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice **The People's Bible** Joseph Parker, 1887 **Innovations and Institutions** Patrick Vermeulen, Jorg Raab, 2007-02-15 This new book uses extensive and multifaceted data and sophisticated data analysis to explore product innovation in the financial services sector Merging academic and critical analysis with practical recommendations for companies this book provides a full and rich account of how new products are brought to market considering both successes and failures Providing insight into the organization of product innovation processes in the financial services sector and setting up guidelines for the improvement of these processes it is essential reading for those in banking finance and insurance sectors with an interest in innovation studies

Population Control Jen Rinaldi,Kate Rossiter,2023-11-15 Violence is an inescapable through line across the experiences of institutional residents regardless of facility type historical period regional location government or staff in power or type of population Population Control explores the relational conditions that give rise to institutional violence whether in residential schools internment camps or correctional or psychiatric facilities This violence is not dependent on any particular space but on underlying patterns of institutionalization that can spill over into community settings even as Canada closes many of its large scale facilities Contributors to the collection argue that there is a logic across community settings that claim to provide care for unruly populations a logic of institutional violence which involves a deep entanglement of both loathing and care This loathing signals a devaluation of the institutionalized and leaves certain populations vulnerable to state intervention under the guise of care When that offer of care is polluted by loathing however there comes along with it an unavoidable and socially prescribed violence Offering a series of case studies in the Canadian context from historical asylums and laundries for fallen women to contemporary prisons group homes and emergency shelters Population Control understands institutional violence as a unique and predictable social phenomenon and makes inroads toward preventing its reoccurrence
