Buckley, Jeremy Clegg, 2016-07-27 This volume identifies and analyses the crucial issues in the impact of multinational enterprises MNEs on less developed countries LDCs Although the authors take a variety of wide stances on the important questions a uniformity of approach emerges The perspective is essentially that of economic analysis but it is enlivened by unorthodox concepts derived from related social science disciplines The chapters cover the process of development paying attention to entrepreneurship cultural factors and management styles and examine the impact on welfare and income distribution in the host country Service Industry Databook B. Elango, 2015-09-08 Locating empirical information on specific service industry characteristics is not an easy task even for an individual familiar with various sources of data This book is a quick source of information on service industry statistics across many nations of the world The reader is introduced to finding key sources of data building analytical ratios from diverse sources and understanding the advantages and disadvantages of data selection methods in the service sector The global nature of the data compiled in this book especially an extensive coverage of the United States makes it an invaluable resource to active researchers and stakeholders in the service industry as well as those who seek to enter it
