Using Quality Benchmarks for Assessing and Developing Undergraduate Programs Dana S. Dunn, Maureen A. McCarthy, Suzanne C. Baker, Jane S. Halonen, 2010-12-21 Using Quality Benchmarks for Assessing and Developing Undergraduate Programs introduces selected performance criteria benchmarks to assist undergraduate programs in defining their educational goals and documenting their effectiveness. The book explores the attributes of undergraduate programs by focusing on educationally related activities in eight domains: program climate, assessment, accountability, and accreditation issues, student learning outcomes, student development, curriculum, faculty characteristics, program resources, and administrative support. Further, it conceptualizes a continuum of performance for each attribute in each of the domains to characterize underdeveloped, developing, effective, and distinguished achievement for undergraduate programs. The goal of the book is to encourage individual departments at various types of institutions to evaluate what they currently do well while identifying areas for refinement or future growth. When benchmarks reveal that a program is underdeveloped, faculty and administrators can plan for how they can best direct subsequent efforts and resources to improve a program's performance and ability to serve students. Emphasizing formative assessment over summative or punitive evaluation, the benchmarks in this book are designed to improve program quality, encourage more effective program reviews, and help optimally functioning programs compete more successfully for resources. Using performance benchmarks to identify areas of program strength can in turn be used to recruit and retain students, seek funding via grants or alumni support, and enhance the perceived rating of an institution.

The Full-Time Faculty Handbook Virginia Bianco-Mathis, Neal Chalofsky, 1999 The Full Time Faculty Handbook is a guide to the life of a college professor. Editors Virginia Bianco Mathis and Neal Chalofsky examine the major components of a life in the academy: teaching, advising, publishing, research, and service. Practical, comprehensive, and engaging, this handy guide appeals to a broad audience across all academic disciplines, from new professors to tenured faculty. Themes that are introduced and woven throughout the book include: The basics of academic life; Key strategies for success; Political realities vs. the ideal; Managing your career; creating your own schedule, roadmap, and network; Assessing where you are and what needs to be done; Finding, fueling, and maintaining your passion. The authors also address the latest trends in the field that are affecting time-honored teaching traditions such as distance learning, outcome assessment, continuous learning, and the evolving roles and responsibilities of full-time faculty.

Field Of Dreams Peggy O'Neill, 2003-04-01 One of the first collections to focus on independent writing programs, A Field of Dreams offers a complex picture of the experience of the stand-alone. Included here are narratives of individual programs from a wide range of institutions exploring such issues as what institutional issues led to their independence, how independence solved or created administrative problems, how it changed the culture of the writing program, and faculty sense of purpose, success, or failure. Further chapters build larger ideas about the advantages and

disadvantages of stand alone status covering labor issues promotion tenure issues institutional politics and others A retrospective on the famous controversy at Minnesota is included along with a look at the long established independent programs at Harvard and Syracuse Finally the book considers disciplinary questions raised by the growth of stand alone programs Authors here respond with critique and reflection to ideas raised by other chapters do current independent models inadvertently diminish the influence of rhetoric and composition scholarship Do they tend to ignore the outward movement of literacy toward technology Can they be structured to enhance interdisciplinary or writing across the curriculum efforts Can independent programs play a more influential role in the university than they do from the English department

In View of Academic Careers and Career-Making Scholars Victor N. Shaw, 2008-03-01 This volume connects career making to the general social context in which it takes place career making individuals to the large institutional establishment in which they operate and specifically career academicians to the overall knowledge enterprise from which they draw their intellectual inspiration on which they build their career achievements and to which they contribute their personal talents The main purpose is to explore what academic institutions the knowledge enterprise and the society as a whole can and ought to do to enhance productivity facilitate performance and improve experience of individual academicians in their career making endeavor Although various innovative ideas are presented to improve normal procedures or standard processes throughout academia answers to this focal question often lie in different levels of organizational units involved in academic operation That is what should a department do for its faculty a college for its departments a university for its colleges an association for its member organizations or a government for its academic institutions in the best interest of the latter Similarly although reformative measures are proposed to the attention of established entities or institutionalized systems change within the existing situation or practice to a large degree depends upon how people in various social roles relate to each other in attitude as well as in behavior when they perform their specific job In other words what should a professor do for graduate students a senior scholar for junior colleagues a chair for faculty members a dean for chairs a university chancellor for deans an editor for authors or an association president for the general membership from the due perspective of the latter The logic or legitimacy of examining this focal question and its organizational unit and social role is clear a shining academician owes much to the support of his or her assistants students and followers a rising university builds on the productivity of its individual divisions and a thriving knowledge enterprise depends upon the success of individual career making scholars Beyond its own functionality and success by division of labor the higher level or the larger system has an inescapable responsibility to ensure that individual players or components therein grow develop and perform to the best of their potential In content this volume consists of sixteen chapters Chapter 1 identifies main pathways and stages in academic careers Chapters 2 5 focuses on the career process exploring major requirements that an academician has to work on and fulfill in his or her career making endeavor These requirements include educational preparation job search institutional placement

and professional networking Chapters 6 15 centers on the career structure examining essential elements that a scholar has to build and maintain in his or her career identity These elements range from the academic degree position publication teaching presentation service grants awards and membership in academic associations to tenure The last chapter capitalizes on the curriculum vitae as a miniature of the academic personality that a career professional must present to the community of scholarship
