Russian Style Julie A. Cassiday, 2023-12-19 In the two decades after the turn of the millennium Vladimir Putin's control over Russian politics and society grew at a steady pace As the West liberalized its stance on sexuality and gender Putin's Russia moved in the opposite direction remolding the performance of Russian citizenship according to a neoconservative agenda characterized by increasingly exaggerated gender roles By connecting gendered and sexualized citizenship to developments in Russian popular culture Julie A Cassiday argues that heteronormativity and homophobia became a kind of politicized style under Putin's leadership However while the multiple modes of gender performativity generated in Russian popular culture between 2000 and 2010 supported Putin's neoconservative agenda they also helped citizens resist and protest the state's mandate of heteronormativity Examining everything from memes to the Eurovision Song Contest and self help literature Cassiday untangles the discourse of gender to argue that drag or travesti became the performative trope par excellence in Putin's Russia Provocatively Cassiday further argues that the exaggerated expressions of gender demanded by Putin's regime are best understood as a form of cisgender drag This smart and lively study provides critical nuanced analysis of the relationship between popular culture and politics in Russia during Putin's first two decades in power

The Socialization of Emotions Michael Lewis, Carolyn Saari, 2012-12-06 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as on humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last decade or two seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity between those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which will bring together research on infant biology developing infant capacities animal models the impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances will serve these important social and scientific needs

Our Daily Meds Melody Petersen, 2025-06-25 In the last thirty years the big pharmaceutical companies have transformed themselves into marketing machines selling dangerous medicines as if they were Coca Cola or Cadillacs They pitch drugs with video games and soft cuddly toys for children promote them in churches and subways at NASCAR races and state fairs They've become experts at promoting fear of disease just so they can sell us hope No question drugs can save lives But the relentless

marketing that has enriched corporate executives and sent stock prices soaring has come with a dark side Prescription pills taken as directed by physicians are estimated to kill one American every five minutes And that figure doesn't reflect the damage done as the overmedicated take to the roads Our Daily Meds connects the dots for the first time to show how corporate salesmanship has triumphed over science inside the biggest pharmaceutical companies and in turn how this promotion driven industry has taken over the practice of medicine and is changing American life It is an ageless story of the battle between good and evil with potentially life changing consequences for everyone not just the 65 percent of Americans who unscrew a prescription cap every day An industry with the promise to help so many is now leaving a legacy of needless harm
