rethink the most powerful conventional wisdoms and stubborn moral problems of the day *Worse Than War* gets to the heart of the phenomenon genocide that has caused more deaths in the modern world than military conflict In doing so it challenges fundamental things we thought we knew about human beings society and politics Drawing on extensive field work and research from around the world Goldhagen explores the anatomy of genocide explaining why genocides begin are sustained and end why societies support them why they happen so frequently and how the international community should and can successfully stop them As a great book should *Worse than War* seeks to change the way we think and to offer new possibilities for a better world It tells us how we might at last begin to eradicate this greatest scourge of humankind

**Phenomenologies of the Stranger** Richard Kearney, Kascha Semonovitch, 2011 What is strange Or better who is strange When do we encounter the strange This volume takes the question of hosting the Stranger to the deeper level of embodied imagination and the senses It asks How does the embodied imagination relate to the Stranger in terms of hospitality or hostility given the common root of hostis as both host and enemy How do humans sense the dimension of the strange and alien in different religions arts and cultures How do the five physical senses relate to the spiritual senses especially the famous sixth sense as portals to an encounter with the Other Is there a carnal perception of alterity which would operate at an affective prereflective preconscious level What exactly do embodied imaginaries of hospitality and hostility entail And what finally are the topical implications of these questions for an ethics and practice of tolerance and peace Empire of Liberty Anthony Bogues, 2010 An original and stimulating critique of American empire **Final**

**Solutions** Sabby Sagal, 2013-10-09 What causes genocide Through an examination of four modern genocides the Native Americans the Armenians the Jews and the Rwandan Tutsis Sabby Sagal formulates a theoretical framework for understanding some of the darkest hours of humanity Drawing on the scholarship of a range of Marxist psychoanalysts from the Frankfurt School to Wilhelm Reich shows how genocides are enacted by social classes or communities that have experienced isolation and denial of human needs prostration and humiliation at the hands of major historical defeats or powerlessness These denials or degradations produce severe reactions hatred destructiveness and an impotent rage which is often projected onto a perceived other Through close analysis and theorising of the commonalities and differences between recent genocides Sagal hopes to produce greater understanding of the socio psychological rationale behind atrocities in order to prevent recurrences **Genocide, Mass Atrocity, and War Crimes in Modern History** James Larry

Taulbee, 2017-02-06 Defining genocide as an international crime this two volume set provides a comparative study of historical cases of genocide and mass atrocity clearly identifying the factors that produced the attitudes and behaviors that led to them discusses the reasons for rules in war and examines how the five principles laid out in the Geneva Conventions and other international agreements have functioned in modern warfare Written by an expert on international politics and law *Genocide Mass Atrocity and War Crimes in Modern History* Blood and Conscience is an easy to understand resource that

explains why genocides and other atrocities occur why humanity saw the need to create rules that apply during war and how culture rules about war and the nature of war intersect The first volume addresses the history and development of the normative regime s that define genocide and mass atrocity Through a comparative study of historical cases that pay particular attention to the factors involved in producing the attitudes and behaviors that led to the incidents of mass slaughter and mistreatment the author identifies the reasons that genocides and mass atrocities in the 20th century were largely ignored until the early 1990s and why even starting then responses were inconsistent The second book discusses why rules in war exist which factors may lead to the adoption of rules what defines a war crime and how the five fundamental principles laid out in the Geneva Conventions and other international agreements have actually functioned in modern warfare It also poses and answers the interesting question of why we should obey rules when our opponents do not The final chapter examines what actions could serve to identify future situations in which mass atrocities may occur and identifies the problems of timely humanitarian intervention in international affairs
