Hardin, Günther Holst, 1992 **Essays on Brecht** Siegfried Mews, Herbert Knust, 2020-05-01 These essays represent the push to provide interdisciplinary Brecht research to English-speaking audiences following his death in 1956 and offer novel readings of his works indicative of the major literary questions of the time. The essays explore both Brecht's theoretical approach and political thought with many also taking a comparative approach to analysis of individual plays. The contributors are Reinhold Grimm, Karl Heinz Schoeps, Herbert Knust, Hans Meyer, Siegfried Mews, Raymond English, James Lyon, Darko Suvin, Gisela Bahr, Grace Allen, Ralph Ley, John Fuegi, Andrzej Wirth, and David Bathrick. University of Toronto Quarterly University of Toronto, 1895 **The Right to Exploit** Gijs van Donselaar, 2009-07-01 In 1895 an English farmer diverted the course of a stream that was flowing through his land, thereby cutting off the supply to the water reservoir of the neighboring community. The courts established that it had been his purpose to injure the plaintiffs by carrying off the water and to compel them to buy him off. Regardless of what the law says, most people will feel that the farmer's intentions were morally unjust: he was trying to abuse his property rights in order to take advantage of others. Yet as Gijs van Donselaar explains, the major traditions in the theory of economic justice, both from the libertarian right and from the egalitarian left, have failed to appreciate the moral objection to exploitative behavior that this case displays. Those traditions entertain radically opposed views on how private property should be distributed, but they do not consider the legitimacy of constraints on the exercise of property rights, however they are distributed. The second part of the book demonstrates how this failure clears the way for a recent egalitarian argument gaining in popularity for a so-called unconditional basic income. If all have an initial right to an equal share of the resources of the world, then it soon seems to follow that all have a right to an equal share of the value of the resources of the world, which could be cashed in as a labor-free income. That inference is only valid if moral behavior similar to that of the farmer is tolerated. Van Donselaar argues that ultimately a confusion about the nature and value of freedom of choice is responsible for the odd conception of private rights in resources that would justify exploitation.
