Seventeen Simple Lectures On General Relativity Theory:

Seventeen simple lectures on general relativity theory Hans Adolph Buchdahl, 1981 Seventeen Simple Lectures on General Relativity Theory H. A. Buchdahl, 1981-11-27 A self contained critical introduction to Einstein's general theory of relativity that supplements the many conventional expository works on relativity Emphasis is on clarification of underlying notions assumptions prejudices and points of semantic confusion A First Course in General Relativity Bernard F. Schutz, 1985-01-31 This textbook develops general relativity and its associated mathematics from a minimum of prerequisites leading to a physical understanding of the theory in some depth **A First Course in General Relativity** Bernard Schutz, 2022-06-30 This widely used textbook explains general relativity for advanced undergraduates requiring only a minimal background in mathematics **Evolution of Black Holes in Anti-de Sitter Spacetime and the Firewall Controversy** Yen Chin Ong, 2015-11-27 This thesis focuses on the recent firewall controversy surrounding evaporating black holes and shows that in the best understood example concerning electrically charged black holes with a flat event horizon in anti de Sitter AdS spacetime the firewall does not arise The firewall which surrounds a sufficiently old black hole threatens to develop into a huge crisis since it could occur even when spacetime curvature is small which contradicts general relativity However the end state for asymptotically flat black holes is ill understood since their curvature becomes unbounded This issue is avoided by working with flat charged black holes in AdS The presence of electrical charge is crucial since black holes inevitably pick up charges throughout their long lifetime These black holes always evolve toward extremal limit and are then destroyed by quantum gravitational effects This happens sooner than the time required to decode Hawking radiation so that the firewall never sets in as conjectured by Harlow and Hayden Motivated by the information loss paradox the author also investigates the possibility that monster configurations might exist with an arbitrarily large interior bounded by a finite surface area Investigating such an object in AdS shows that in the best understood case such an object much like a firewall cannot exist Cosmology: The Physics Of The Universe - Proceedings Of The Eighth Physics Summer School Brian A Robson, N Visvanathan, William S Woolcock, 1996-11-27 **Relativity in General** J. Diaz Alonso, M. Lorente Paramo, 1995
