Translation in the Digital Age Carsten Sinner,2020-06-29 Translation interpreting and translatology face major challenges today as new technologies provide new ways of investigating our profession analysing the process of performing these acts of linguistic mediation or the outcome of our work and even permit a fresh look at old data However aside from a certain improvement in terms of research possibilities what else does the future hold for translation and interpreting This volume proposes the label Translation 4 0 suggesting that contemporary translation should actually be understood as programmatic as expressions such as Industry 4 0 and Internet 4 0 which are often used to refer to the increasing application of Internet technology to facilitate communication between humans machines and products As the book shows Translation 4 0 is at least undergoing a process of formation if it is not already fully developed The contributions here not only look into developments in translation and interpreting per se but also explore the consequences of digitalisation for research in this field
