incidence of *Sphaerotilus natans* in laboratory scale activated sludge systems and the direct solid liquid separation using hollow fiber membrane in an activated sludge aeration tank. The succeeding parts discuss the theoretical and operational benefits of anaerobic and industrial wastewater treatment. These topics are followed by presentation of activated sludge models with particular emphasis on nitrification and precipitation modeling as well as dynamic modeling of trace contaminant removal in a municipal sewage treatment plant. The last part explores the characteristics of biological phosphorus and phosphate removal process. This book will prove useful to chemical and environmental engineers and researchers in the related fields. *Proceedings of the Water Reuse Symposium, March 25-30, 1979, Washington, D.C., 1979*

*Environmental Science and Biotechnology* A. G. Murugesan, C. Rajakumari, 2019-06-05 Environmental science and biotechnology are the fast developing subjects of today and therefore examination of waste water quality and biotechnological approach in effluent treatment gain more significance. This book discusses the basic principles of various instruments and the analytical methods in physical chemical and biological characterization of sewage industrial effluents and soil. It also deals with the suitable techniques for treating different kinds of waste waters. Advanced microbial and biotechnological methods are discussed in detail. It compiles a wide range of concise laboratory procedures providing a clear understanding about the concepts of the experiments and complete details about the methodology along with the theoretical background.

Aquaculture B. N. Pandey, 2007 Proceedings of the 17th All India Congress of Zoology and National Symposium on Coexistence with Friendly Fauna in India held at Baramati during 15-17 October 2006 **Microbial Aspects of Pollution** Glyn Barry Sykes, F. A. Skinner, 2013-10-22 Microbial Aspects of Pollution is the first of a new series that emerged from the annual Summer Conference of Society for Applied Bacteriology focusing on microbiological subjects of general topical interest. The subject of the 1971 symposium Microbial Aspects of Pollution is particularly topical. Pollution is an environmental problem and almost invariably arises from the activities of man. Microorganisms have their part to play both advantageously and disadvantageously and the 16 contributions written by recognized experts in the field range widely over the subject. They include considerations of the health hazards of pollution embracing the consequences of sewage pollution of our water supplies and a most important topic to the laboratory worker the safe disposal of infected material. A series of papers deals with water purification problems and the disposal of sewage and other wastes and their effects on the waters of rivers and lakes. Special attention is given in this context to the disposal of industrial wastes. Other contributions deal with the disposal of the newer industrial products of the organic chemist namely pesticides herbicides fungicides and plastic materials.

**Holistic Approach to Sustainable Development** Pramod Singh, 1995 This book deals with burning problems of the Indian Environment. The volume reveals the role of science and technology in the development of industry in rural urban and remote areas impact of new economic policy and the new role of government need for a new integrated science technology and industrial development policy strategy and perspective role of NGOs utilization of natural resources and their improved

Duckweed *L gibba* covered sewage lagoons DSLs are low cost treatment systems especially suitable for warm climates or in lands where there are warm seasons This study attempts to assess DSL system as a new technology contributing to the understanding of the different mechanisms in the system Duckweed covered sewage lagoons could either replace complete wastewater stabilization ponds WSPs or be introduced as a second stage in an integrated WSP DSL treatment system which could then be used for purifying municipal wastewater achieving suitable effluent for reuse in agriculture The duckweed harvested from DSL systems has in itself an intrinsic economic value
