Explore the Concept of Gender and Explain the Roles of Different Forms of Communication Within Gender Marie Tolkemit, 2011-08 Essay from the year 2010 in the subject Gender Studies grade 1 7 University of Newcastle upon Tyne Communication and Culture language English abstract Lots of researchers define sex as a biological categorization classifying people as male or female based on their sex organs Basow 1992 Eckert Mc Connell Ginet 2003 and interpret gender as the social forming of the biological sex Eckert Mc Connell Ginet 2003 Butler agrees that gender is the cultural meaning of the sexed body but points out that the sexed body must not match with the biological sex What this means is that the category women can contain people with a male and a female body it is the same with the classification men For Butler sex or the sexed body is a cultural defined category of gender Butler 1990

There is lots of research in the field of gender differences in language use. This essay looked at varieties between the genders in verbal and nonverbal communication with the aim to find out which variables characterize the language use of each gender. In the field of talkativeness the researchers got opposite results; therefore nothing can be said about which gender has a larger amount of the conversation. Looking at the other points of comparison between the genders it could be detected that women use more affiliative speech which includes the use of different stylistic devices to avoid making a clear statements. Besides the observation of their visual behaviour showed that women use their view for orientation and as a source for information e.g. about their communication partner. Furthermore they use eye contact for getting a feedback about their own behaviour from their communication partner feeling uncomfortable when they can't see their opposite. In addition women are more involved use more expressions and feel easily embarrassed. Overall these results indicate unambiguously that women have a submissive communication style. Men on the contrary use affiliative sp. *Women and Men*

Communicating Laurie P. Arliss, Deborah Borisoff, 2001. *Different but Equal* Kay Payne, 2001-02-28. This study presents a theoretical and practical discussion of the changes that have occurred between men and women and how the sexes relate to one another from social, political and ethical perspectives. Not only do men and women reflect different gender roles through communication but they are also impacted by communication about gender especially from the media. Gender differences in communication have gained political importance due to the increasingly relevant issues of sexual harassment and political correctness. These social and political changes have influenced our value systems and have given the study of gendered communication an ethical importance. Payne argues that religious ideology is an important aspect of gendered development and that biological, psychological, social and cultural phenomena also affect sex roles. This volume will appeal to scholars and students in the communications disciplines as well as psychologists and sociologists. Organized around three major themes: the construction of the gendered self, the differences between men and women as they relate to one another through language, power and nonverbal communication and the effects of gendered communication in leadership and the media, this work covers much ground on the topic of communication between the sexes. *Gender Differences in Different Contexts* Aida Alvinus, 2017-02-01. The development of gender differences as an area of research has been rapid over the last decades. Varieties of studies have focused on the gender differences as well as the similarities of women and men. The common purpose of the research attempt is to find out the possibilities and even the consequences of gender differences and the impact on human beings on one side and social and cultural environment on the other. This book is an attempt to provide theoretical and empirical framework to better understand gender differences in various contexts and on different levels. Therefore the contributions cover an array of themes that span from an individual level to an organizational and societal level.
