Sex Politics And Empire A Postcolonial Geography:

Sex, politics and empire Richard Phillips, 2018-02-01 Colonial governments institutions and companies recognised that in many ways the effective operation of the Empire depended upon sexual arrangements For example nuclear families serving agricultural colonization and prostitutes working for single men who powered armies and plantations mines and bureaucracies For this reason they devised elaborate systems of sexual governance such as attending to marriage and the family However they also devoted disproportionate energy to marking and policing the sexual margins In *Sex Politics and Empire* Richard Phillips investigates controversies surrounding prostitution homosexuality and the age of consent in the British Empire and revolutionises our notions about the importance of sex as a nexus of imperial power relations

Introducing Human Geographies, Second Edition Paul Cloke, Philip Crang, Mark Goodwin, 2013-01-11 *Introducing Human Geographies* is a comprehensive stimulating and innovative introduction to human geography This second edition has been thoroughly revised and updated to build upon the success of the acclaimed first edition Now in full colour and with sixteen new chapters discussion points and glossary definitions in the margin it is even more accessible Part one discusses the principal ideas through which human geographers understand and shape their subject Part two examines each of the main sub fields cultural geography development geography economic geography environmental geography historical geography political geography rural geography social geography urban geography Part three demonstrates how different thematic interests are combined in cutting edge human geographical debates *Introducing Human Geographies* continues to be the essential textbook for first year undergraduate geography students taking introductory courses in human geography [The Ashgate Research Companion to Critical Geopolitics](#) Merje Kuus, 2016-04-01 Since the late 1980s critical geopolitics has gone from being a radical critical perspective on the disciplines of political geography and international relations theory to becoming a recognised area of research in its own right Influenced by poststructuralist concerns with the politics of representation critical geopolitics considers the ways in which the use of particular discourses shape political practices Initially critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft Subsequent iterations have considered the role that popular representations of the international political world play As critical geopolitics has become a more established part of political geography it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice Again critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas non representational theory emotional geographies and affect It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of

its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics **Global City Futures** Natalie Oswin,2019-04-15 Global City Futures offers a queer analysis of urban and national development in Singapore the Southeast Asian city state commonly cast as a leading global city Much discourse on Singapore focuses on its extraordinary socioeconomic development and on the fact that many city and national governors around the world see it as a developmental model But counternarratives complicate this success story pointing out rising income inequalities the lack of a social safety net an unjust migrant labor regime significant restrictions on civil liberties and more With Global City Futures Natalie Oswin contributes to such critical perspectives by centering recent debates over the place of homosexuality in the city state She extends out from these debates to consider the ways in which the race class and gender biases that are already well critiqued in the literature on Singapore and on other cities around the world are tied in key ways to efforts to make the city state into not just a heterosexual space that excludes queer subjects but a heteronormative one that queers many more than LGBT people Oswin thus argues for the importance of taking the politics of sexuality and intimacy much more seriously within both Singapore studies and the wider field of urban studies **Writing imperial histories** Andrew S.

Thompson,2016-05-16 This book appraises the critical contribution of the Studies in Imperialism series to the writing of imperial histories as the series passes its 100th publication The volume brings together some of the most distinguished scholars writing today to explore the major intellectual trends in Imperial history with a particular focus on the cultural readings of empire that have flourished over the last generation When the Studies in Imperialism series was founded the discipline of Imperial history was at what was probably its lowest ebb A quarter of a century on there has been a tremendous broadening of the scope of what the study of empire encompasses Essays in the volume consider ways in which the series and the wider historiography have sought to reconnect British and imperial histories to lay bare the cultural expressions and registers of colonial power and to explore the variety of experiences the home population derived from the empire

Syphilis and Subjectivity Kari Nixon,Lorenzo Servitje,2017-12-14 This book demystifies the cultural work of syphilis from the late nineteenth century to the present By interrogating the motivations that engender habits of belief thought and conduct regarding the disease and notions of the self this interdisciplinary volume investigates constructions of syphilis that had a significant role in shaping modern subjectivity Chapters draw from a variety of scholarly methods such as cultural and literary studies sociology and anthropology Authors unravel the representations and influence of syphilis in various cultural forms cartography medical writings literature historical periodicals and contemporary popular discourses such as internet forums and electronic news media Exploring the ways syphilitic rhetoric responds to generates or threatens social systems and cultural capital offers a method by which we can better understand the geographies of blame that are central to the conceptual heritage of the disease This unique volume will appeal to students and scholars in the medical humanities medical

sociology the history of medicine and Victorian and modernist studies *Muslim Spaces of Hope* Richard Phillips,2013-07-04 Debates about contemporary Islam and Muslims in the West have taken some negative turns in the depressing atmosphere of the war on terror and its aftermath This book argues that we have been too preoccupied with problems not enough with solutions The increased mobilisation and scrutiny of Muslim identities has taken place in the context of a more general recasting of racial ideas and racism a shift from overtly racial to ostensibly ethnic and cultural including religious categories within discourses of social difference The targeting of Muslims has been associated with new forms of an older phenomenon imperialism New divisions between Muslims and others echo colonial binaries of black and white colonised and coloniser within practices of divide and rule This book speaks to others who have been marginalised and colonised and to wider debates about social difference oppression and liberation *A Global History of Sexuality* Robert M. Buffington,Eithne Luibhéid,Donna J. Guy,2014-02-24 A Global History of Sexuality provides a provocative wide ranging introduction to the history of sexuality from the late eighteenth century to the present day Explores what sexuality has meant in the everyday lives of individuals over the last 200 years Organized around four major themes the formation of sexual identity the regulation of sexuality by societal norms the regulation of sexuality by institutions and the intersection of sexuality with globalization Examines the topic from a comparative global perspective with well chosen case studies to illuminate the broader themes Includes interdisciplinary contributions from prominent historians sociologists anthropologists and sexuality studies scholars Introduces important theoretical concepts in a clear accessible way *Female Soldiers in Sierra Leone* Megan H. MacKenzie,2015-11 The eleven year civil war in Sierra Leone from 1991 to 2002 was incomprehensibly brutal it is estimated that half of all female refugees were raped and many thousands were killed While the publicity surrounding sexual violence helped to create a general picture of women and girls as victims of the conflict there has been little effort to understand female soldiers involvement in and experience of the conflict *Female Soldiers in Sierra Leone* draws on interviews with 75 former female soldiers and over 20 local experts providing a rare perspective on both the civil war and post conflict development efforts in the country Megan MacKenzie argues that post conflict reconstruction is a highly gendered process demonstrating that a clear recognition and understanding of the roles and experiences of female soldiers are central to both understanding the conflict and to crafting effective policy for the future **Decolonisation of Legal Knowledge** Amita Dhanda,Archana Parashar,2012-04-27 The premise of this book is that legal theory in general and critical legal theory in particular do not facilitate the identification of choices being made in the different facets of law whether in the enacting interpreting administering or theorising of law *British imperialism in Cyprus, 1878-1915* Andrekos Varnava,2017-03-01 This book explores the tensions underlying British imperialism in Cyprus Much has been written about the British Empire s construction outside Europe yet there is little on the same themes in Britain s tiny empire in Europe This study follows Cyprus progress from a perceived imperial asset to an expendable backwater by explaining how

the Union Jack came to fly over the island and why after thirty five years the British wanted it lowered Cyprus importance was always more imagined than real and was enmeshed within widely held cultural signifiers and myths British Imperialism in Cyprus fills a gap in the existing literature on the early British period in Cyprus and challenges the received and monolithic view that British imperial policy was based primarily or exclusively on strategic military considerations The combination of archival research cultural analysis and visual narrative that makes for an enjoyable read for academics and students of Imperial British and European history

The Victorian World Martin Hewitt, 2013-01-25 With an interdisciplinary approach that encompasses political history the history of ideas cultural history and art history The Victorian World offers a sweeping survey of the world in the nineteenth century This volume offers a fresh evaluation of Britain and its global presence in the years from the 1830s to the 1900s It brings together scholars from history literary studies art history historical geography historical sociology criminology economics and the history of law to explore more than 40 themes central to an understanding of the nature of Victorian society and culture both in Britain and in the rest of the world Organised around six core themes the world order economy and society politics knowledge and belief and culture The Victorian World offers thematic essays that consider the interplay of domestic and global dynamics in the formation of Victorian orthodoxies A further section on Varieties of Victorianism offers considerations of the production and reproduction of external versions of Victorian culture in India Africa the United States the settler colonies and Latin America These thematic essays are supplemented by a substantial introductory essay which offers a challenging alternative to traditional interpretations of the chronology and periodisation of the Victorian years Lavishly illustrated vivid and accessible this volume is invaluable reading for all students and scholars of the nineteenth century

Global Anti-Vice Activism, 1890-1950 Jessica R. Pliley, Robert

Kramm,Harald Fischer-Tiné,2016-07-04 The Chinese style of prostitution regulation *Missionaries and their medicine*

David Hardiman,2017-03-01 Missionaries and their medicine is a lucid and enthralling study of the encounter between Christian missionaries and an Indian tribal community the Bhils in the period 1880 to 1964 The study is informed by a deep knowledge of the people amongst whom the missionaries worked the author having lived for extensive periods in the tribal tracts of western India He argues that the Bhils were never the passive objects of missionary attention and that they created for themselves their own form of Christian modernity The book provides a major intervention in the history of colonial medicine as Hardiman argues that missionary medicine had a specific quality of its own which he describes and analyses in detail and that in most cases it was preferred to the medicine of colonial states He also examines the period of transition to Indian independence which was a highly fraught and uncertain process for the missionaries The East India Company and the Natural World

V. Damodaran,A. Winterbottom,A. Lester,2014-12-01 This book is the first to explore the deep and lasting impacts of the largest colonial trading company the British East India Company on the natural environment The contributors drawn from a wide range of academic disciplines illuminate the relationship between colonial capital and the changing environment between 1600 and 1857 **Sexuality, Rurality, and Geography**
